# Contents

Preface.....	xiii
Acknowledgments .....	xv
Author.....	xvii
<b>Chapter 1 Introduction .....</b>	<b>1</b>
1.1 Sensory shelf life definition .....	1
1.2 Labeling regulations .....	2
1.3 Shelf life of foods <i>is</i> sensory shelf life .....	3
1.4 Importance of the consumer in defining food quality.....	4
1.5 Books on shelf life of foods .....	6
1.5.1 Labuza (1982).....	6
1.5.2 Gacula (1984).....	9
1.5.3 IFST guidelines (1993) .....	10
1.5.4 Man and Jones (1994).....	11
1.5.5 Taub and Singh (1998) .....	14
1.5.6 Kilcast and Subramaniam (2000a).....	16
1.5.7 Eskin and Robinson (2001) .....	18
1.5.8 Labuza and Szybist (2001) .....	18
References .....	20
<b>Chapter 2 Principles of sensory evaluation.....</b>	<b>23</b>
2.1 Introduction.....	23
2.2 Definition of sensory evaluation .....	23
2.2.1 Analyze and interpret.....	23
2.2.2 Other materials .....	24
2.2.3 Sight, touch, and hearing.....	24
2.3 Sensory analysis: Trained panels versus experts.....	25
2.4 General requirements and conditions for sensory tests .....	28
2.4.1 Testing area.....	28
2.4.2 Lighting.....	30
2.4.3 Time of day .....	31
2.4.4 Carriers.....	32
2.4.5 Temperatures of samples.....	32

2.4.6	Sample size .....	32
2.4.7	Number of samples .....	33
2.4.8	Coding and order of presentation.....	33
2.4.9	Palate cleansers .....	33
2.5	Physiological factors.....	34
2.6	Psychological factors .....	34
2.6.1	Expectation error .....	34
2.6.2	Error of habituation.....	35
2.6.3	Stimulus error .....	36
2.6.4	Logical error .....	36
2.6.5	Halo effect.....	36
2.6.6	Positional bias.....	36
2.6.7	Contrast effect and convergence error.....	37
2.6.8	Mutual suggestion.....	37
2.6.9	Lack of motivation.....	37
2.6.10	Capriciousness versus timidity .....	38
2.7	Sensory evaluation methods.....	39
2.7.1	Discrimination tests .....	39
2.7.1.1	Triangle test .....	39
2.7.1.2	Example of sensory shelf life (SSL) determined by a triangle test .....	40
2.7.1.3	Paired comparison test.....	44
2.7.1.4	Difference from control test .....	44
2.7.2	Descriptive tests.....	47
2.7.3	Affective tests.....	54
2.7.3.1	Selecting consumers.....	55
2.7.3.2	Test location .....	58
2.7.3.3	Quantitative affective test methods .....	59
	References .....	60
<b>Chapter 3 Design of sensory shelf-life experiments.....</b>		<b>63</b>
3.1	Initial considerations.....	63
3.2	Approximations of shelf-life values.....	64
3.2.1	Literature values .....	64
3.2.2	Values from the Internet.....	65
3.2.3	Values based on distribution times.....	66
3.3	Temperatures and storage times .....	67
3.3.1	Temperatures.....	67
3.3.2	Maximum storage time.....	68
3.3.3	Time intervals.....	69
3.3.4	Critical descriptor .....	70
3.3.5	Storing fresh samples.....	71

3.3.6	Basic and reversed storage designs.....	73
3.3.6.1	Basic design .....	73
3.3.6.2	Reversed storage design.....	75
3.3.7	How much sample should be stored for sensory shelf life studies? .....	79
3.3.7.1	Bananas .....	79
3.3.7.2	Vegetable oil.....	80
3.3.7.3	Yogurt .....	81
References	.....	82

**Chapter 4 Survival analysis applied to sensory shelf life ..... 83**

4.1	What is survival analysis?.....	83
4.2	Censoring.....	84
4.2.1	Right-censoring.....	84
4.2.2	Left-censoring .....	84
4.2.3	Interval-censoring .....	85
4.3	Survival and failure functions.....	86
4.4	Shelf life centered on the product or on its interaction with the consumer? .....	88
4.5	Experimental data used to illustrate the methodology .....	89
4.6	Censoring in shelf-life data .....	90
4.7	Model to estimate the rejection function .....	93
4.8	Calculations using the R statistical package.....	96
4.9	Interpretation of shelf-life calculations .....	103
4.10	An additional example.....	105
4.11	Should consumers be informed?.....	110
4.12	Is there a way to deal with totally new products? .....	110
References	.....	111

**Chapter 5 Survival analysis continued: Number of consumers,  
current status data, and covariates..... 113**

5.1	Number of consumers .....	113
5.2	Current status data .....	114
5.2.1	Introduction.....	114
5.2.2	Experimental data .....	116
5.2.3	Model and data analysis.....	116
5.2.4	Conclusions on current status data.....	122
5.3	Introducing covariates in the model.....	124
5.3.1	Consumer demographics .....	124
5.3.1.1	Experimental data.....	124
5.3.1.2	Covariate model .....	124
5.3.1.3	Calculations using R.....	126

5.3.2	Product formulations .....	132
5.3.2.1	Experimental data.....	133
5.3.2.2	Calculations using R.....	133
5.3.3	Quantitative covariates and number of covariates.....	139
5.3.3.1	Experimental data.....	139
5.3.3.2	Calculations using R.....	140
5.3.4	Number of covariates.....	145
References	.....	145
<b>Chapter 6</b>	<b>Cut-off point (COP) methodology.....</b>	<b>147</b>
6.1	When is the survival statistics methodology difficult to apply?...	147
6.2	Basics of the COP methodology .....	148
6.3	Approaches in establishing a COP.....	149
6.4	Methodology to measure the COP.....	151
6.4.1	Critical descriptors .....	151
6.4.2	Preparation of samples with increasing levels of sensory defects.....	152
6.4.3	Determination of intensity levels of samples by a trained sensory panel.....	152
6.4.4	Determination of acceptability levels of the same samples by a consumer panel.....	153
6.4.5	Calculation of the COP .....	154
6.5	Introduction to kinetics .....	159
6.5.1	Zero-order kinetics.....	159
6.5.2	First-order kinetics .....	159
6.5.3	Choosing between zero- and first-order kinetics .....	160
6.5.4	Sensory properties that present a lag phase.....	161
6.6	Using the COP to estimate shelf life .....	162
6.6.1	Sample storage and trained sensory panel evaluations....	162
6.6.2	Results and calculations .....	163
6.7	Instrumental COPs.....	166
6.8	Caveats for using COP methodology.....	166
References	.....	167
<b>Chapter 7</b>	<b>Accelerated storage .....</b>	<b>169</b>
7.1	Introduction.....	169
7.1.1	Acceleration factor fallacy .....	169
7.1.2	Methods of acceleration .....	170
7.2	Arrhenius equation and activation energy .....	171
7.2.1	Arrhenius equation .....	171
7.2.2	Data for activation energy calculations.....	172
7.2.3	Simple activation energy calculations .....	173
7.2.4	Activation energy calculations based on non-linear regression.....	176

7.3 The use of  $Q_{10}$  ..... 182

7.4 Survival analysis accelerated storage model ..... 184

    7.4.1 Accelerated storage model..... 184

    7.4.2 Experimental data ..... 186

    7.4.3 Calculations using R ..... 187

7.5 Potential pitfalls of accelerated shelf-life testing..... 193

    7.5.1 Pitfall 1: Multiple deterioration modes..... 194

    7.5.2 Pitfall 2: Failure in quantifying uncertainty..... 194

    7.5.3 Pitfall 3: Degradation and rejection affected by  
unforeseen variables ..... 195

    7.5.4 Pitfall 4: Masked rejection mode ..... 195

    7.5.5 Pitfall 5: Comparisons that do not hold..... 196

    7.5.6 Pitfall 6: Increasing temperature can cause  
deceleration..... 197

    7.5.7 Pitfall 7: Drawing conclusions from pilot-plant  
samples..... 198

7.6 Conclusion on accelerated testing..... 199

References ..... 199

**Chapter 8 Other applications of survival analysis in food  
quality ..... 201**

8.1 Consumer tolerance limits to a sensory defect ..... 201

    8.1.1 Survival analysis model..... 201

    8.1.2 Experimental data used to illustrate the methodology ... 203

    8.1.3 Rejection probability calculations ..... 204

    8.1.4 Conclusions ..... 208

8.2 Optimum concentration of ingredients in food products ..... 208

    8.2.1 Survival analysis model..... 209

    8.2.2 Experimental data used to illustrate the methodology ... 212

    8.2.3 Optimum color calculations..... 212

    8.2.4 Conclusions on optimum color estimations ..... 221

8.3 Optimum salt level in French bread ..... 222

    8.3.1 Experimental data used to illustrate the methodology ... 222

    8.3.2 Survival analysis model..... 224

    8.3.3 Optimum salt concentration calculations ..... 225

    8.3.4 Conclusions on optimum salt concentration  
estimation ..... 228

8.4 Internal cooking temperature of beef ..... 229

8.5 Optimum ripening times of fruits ..... 232

References ..... 236
