# Polymers in Defence & Aerospace Applications 2010

10-11 February 2010  
Marriott Hotel, Hamburg, Germany

## Contents

### Session 1: Novel Materials & Processes

- Paper 1 **Team MAST – Delivering materials and structures R & D to UK MOD**  
*Dr Dan Kells, BAE Systems, UK & Dr Eoin O'Keefe, QinetiQ Ltd, UK*
- Paper 2 **Phosphazene elastomer use in defence and aerospace**  
*Bill Goodwin & Raymond E Stiles, Materials Science Technology, USA*
- Paper 3 **Formulation and properties of rigid polyurethane foams**  
*Karen J Foster, K N Hunt, C N Warriner, D R Harbron & D A Broughton, AWE plc, UK*
- Paper 4 **Inkjet printing as a fabrication tool and its potential in defence & aerospace applications**  
*Dr Kay Yeong, Xennia Technology, UK*

### Session 2: Electronic Materials & Applications

- Paper 5 **Development of a thermoplastic printed circuit board for applications in the aviation industry**  
*Dipl-Ing Thomas Apeldorn, Universität Bayreuth, Germany*
- Paper 6 **Synthesis and characterization of novel conducting monomer showing chimeric polymerisation behaviour: Versatile applications in defence and aerospace research**  
*Dr Dhana Lakshmi, Cranfield University, UK et al*
- Paper 7 **Use of fluoropolymers in aerospace and defence: new applications and advantages**  
*Stefano Mortara, P Toniolo, M Gebert, A Marrani & M Bassi, Solvay Solexis SPA, Italy*
- Paper 8 **Rapid manufacturing of syntactic foams**  
*A.K. Walmsley, M. Carne, M. Swan, C. Warriner, K. Hunt AWE plc, UK, G.J. Gibbons, The University of Warwick, UK & S. Bubbs, 3T RPD, UK*
- Paper 9 **Design for manufacture and reliability of polymer-based electronics**  
*Chris Bailey, Tim Tilford & Hua Lu, University of Greenwich, UK & Marc Desmulliez, Heriot-Watt University, UK*

### Session 3: Composites

- Paper 10 **Rapid manufacture of structural thermoplastic composite components for aerospace and defence applications**  
*Charlotte Vacogne & Museok Kwak TWI, UK*
- Paper 11 **Novel high temperature polymers for demanding composite applications**  
*Dr Theo Dingemans, Delft University of Technology, The Netherlands*
- Paper 12 **Microfocus X-ray diffraction and its application to high performance polymers and composites**  
*Richard Davies, C Riekel & M Burghammer, European Synchrotron Radiation Facility, France & S J Eichhorn & R J Young, University of Manchester, UK*

#### **Session 4: Carbon Nano Fibre-based Materials**

- Paper 13 **Development of multifunctional advanced composites with polymer nanocomposite matrices for aerospace applications**  
*Marco Monti, Luigi Torre, R Petrucci & Prof Jose Kenny, University of Perugia, Italy*
- Paper 14 **Manufacture and evaluation of hybrid carbon nanofiber containing nonwoven papers**  
*Andrew Austin, Napier University, UK and J Haaland, Michael Jeschke & D Jhaveri, Technical Fibre Products, USA*
- Paper 15 **New generation of multifunctional composites with carbon nanotubes for aerospace applications**  
*Prof Dr Sergio H Pezzin & L A F Coelho, Santa Catrina State University, Brazil & S Amico, UFRGS, Brazil*

#### **Session 5: Inorganic Nano-materials**

- Paper 16 **Development of phenolic based nanocomposites for ablative rocket combustion chambers**  
*Luigi Torre, M Natali & J Kenny, University of Perugia, Italy*
- Paper 17 **High performance polyurethane shape - memory polymer and its composites**  
*Dr W M Huang & Y Zhao, Nanyang Technological University, Singapore and Y Q Fu, Heriot-Watt University, UK*
- Paper 18 **Ageing and performance predictions of polymer nanocomposites for exterior defence and aerospace applications**  
*Dr James Njuguna, Cranfield University, UK & K Pielichowski, Cracow University of Technology, Poland*
- Paper 19 **UK strategic focus: The Materials and Structures National Technical Committee**  
*Dr Dan Kells, BAE Systems, UK*
- Paper 20 **The role of micro and nanofillers on mechanical and tribological behaviour of polymer matrix composites for aerospace and automotive applications**  
*Prof B Suresha & Prof Mohammed Ismail, The National Institute of Engineering, India*

#### **Session 6: Coatings**

- Paper 21 **Engineered coatings for composites and polymers used in defence & aerospace: Now and the future**  
*Graham Armstrong, Indestructible Paint Ltd, UK*
- Paper 22 **Silicone based coatings for aircraft applications**  
*Bill Riegler, B Burkitt & R Thomaier, Nusil Technology, USA*
