

Rheology Conference

Rheology - A Practical Approach to Quality Control

Official Conference Book of Papers

Thursday 1st and Friday 2nd October, 1998

*On-Line and Off-Line Monitoring Techniques for Process Control and QA in the
Plastics and Rubber Processing Industries*

Published by:

RAPRA

Rheology Conference

A Practical Approach to Quality Control

Thursday 1st and Friday 2nd October 1998

Contents

- Introduction Why Rheology?**
F. S. Baker, Cambridge University, UK
- Paper 1 A New Approach to Polymer Rheology for Process and Quality Control**
D. E. De Laney and J. F. Reilly, DYNISCO Measurements and Control Group, UK
- Paper 2 The Use of Maximum Information Procedures in Quality Control and Assurance**
B. Costello, TA Instruments Limited., UK
- Paper 3 Extensional Flow Properties of Polymer Melts: Their Measurement and Effect on Processing Performance**
M. Rides, National Physical Laboratory, UK
- Paper 4 Quality in Polymer Processing Through Process Inspection**
M. T. Martyn, A. Dawson, R. M. Rose and P. D. Coates, University of Bradford, UK
- Paper 5 On-Line Rheometry and its Application to Polymer Processing**
F. S. Baker, Rheometric Scientific, UK
- Paper 6 First Normal Stress Difference Via Capillary Rheometry – Fact or Fiction?**
D. Fleming, Fleming Polymer Testing and Consultancy, UK
- Paper 7 Non-Conventional Rheological Monitoring of Polymer Processing**
J. M. Maia and J. A. Covas, University of Minho, Portugal
- Paper 8 Low Strain, High Resolution Rheometry**
G. Thomas, Rheologica Instruments, UK
Paper unavailable at time of print - abstract available
- Paper 9 PRECO: A Novel Means of Determining the Pressure Coefficient of Viscosity Using a Modified Capillary Extrusion Rheometer**
R. E. Carter & G. J. Privett, C. R. G. Allen, C. S. Brown, S. Chakravorty & M. Rides**, *Magna Projects & Instruments Ltd, UK and **National Physical Laboratory, UK*
- Paper 10 Photons in Manufacturing – Analysing Polymer Processes at the Speed of Light**
H. Herman, Actinic Technology and University of Surrey, UK
- Paper 11 Wall Slip: Measuring and Flow Modelling for Processing**
T. Dobbie, D. J. Fleming** and J. Busby***, *Rosand Precision Limited, UK, **Fleming Polymer Testing and Consultancy, UK, ***Symbolic Systems, UK*
- Paper 12 Re-melting Polymers and Making Rheological Measurements for Quality Control**
A. George, Porpoise Viscometres Limited, UK
- Paper 13 QC of Polyolefin Manufacturing by Dynamic Spectroscopy and Multivariate Analysis**
S. Eggen, Borealis, Norway
- Paper 14 Blending and Rheological Measurement Combined**
W. Morio, Gebr HAAKE GmbH, Germany
-
