SPRINGER SERIES IN OPTICAL SCIENCES 154

# Industrial Color Physics

 Springer

# Contents

<b>1 Introduction</b> . . . . .	1
References . . . . .	8
<b>2 Light Sources, Types of Colorants, Observer</b> . . . . .	11
2.1 Optical Radiation Sources and Interactions of Light . . . . .	11
2.1.1 Visible Spectrum and Colors . . . . .	12
2.1.2 Types of Light Sources . . . . .	14
2.1.3 Technical Light Sources . . . . .	18
2.1.4 Illuminants . . . . .	23
2.1.5 Geometric Optical Interactions . . . . .	25
2.1.6 Interference of Light . . . . .	34
2.1.7 Diffraction from Transmission and Reflection Gratings . . . . .	38
2.2 Absorbing Colorants . . . . .	43
2.2.1 Types and Attributes of Absorbing Colorants . . . . .	43
2.2.2 Pigment Mixtures and Light Transmittance . . . . .	48
2.2.3 Description of Color Attributes . . . . .	51
2.2.4 Color-Order Systems . . . . .	57
2.2.5 Surface Phenomenon . . . . .	59
2.3 Effect Pigments . . . . .	63
2.3.1 Types of Metallic Pigments . . . . .	65
2.3.2 Morphology of Metallic Particles . . . . .	69
2.3.3 Coloristic Properties of Metallic Pigments . . . . .	76
2.3.4 Sorts of Pearlescent and Interference Colorants . . . . .	82
2.3.5 Interference Pigments Consisting of Multiple Layers . . . . .	85
2.3.6 Spectral Behavior of Pearlescent and Interference Colorants . . . . .	91
2.3.7 Opaque Films Containing Absorbing and Effect Pigments . . . . .	101
2.3.8 Colors of Diffraction Pigments . . . . .	104
2.4 Observer . . . . .	109
2.4.1 Color Perception and Color Theories . . . . .	110
2.4.2 Color Perception Phenomenon . . . . .	114
2.4.3 Subtractive and Additive Mixing of Colors . . . . .	116
2.4.4 Tristimulus Color-Matching Experiments . . . . .	120

2.4.5	Determination of Tristimulus Values . . . . .	123
2.4.6	CIE 1931 and CIE 1964 Standard Colorimetric Observers . . . . .	125
	References . . . . .	129
<b>3 Systems of Standardized Tristimulus Values, Color Qualities,</b>		
	<b>Chroma of Effect Pigments . . . . .</b>	<b>133</b>
3.1	Systems of Standardized Tristimulus Values . . . . .	133
3.1.1	CIE 1931 Tristimulus Values . . . . .	134
3.1.2	Chromaticity Coordinates and Chromaticity Diagram . . . . .	137
3.1.3	CIE 1976 Color Spaces . . . . .	141
3.1.4	DIN99o Color Space . . . . .	148
3.2	Color Difference Metrics and Color Tolerances . . . . .	152
3.2.1	CMC(l:c) Color Difference Formula . . . . .	153
3.2.2	CIE94 Color Difference Expression . . . . .	154
3.2.3	CIEDE2000 Color Difference Equation . . . . .	157
3.2.4	Efficiency of Color Difference Formulas, CIE Color Appearance Models . . . . .	159
3.2.5	Color Tolerances . . . . .	161
3.3	Color Constancy and Metamerism . . . . .	164
3.3.1	Chromatic Adaptation and Color Constancy . . . . .	164
3.3.2	Index of Color Inconstancy . . . . .	166
3.3.3	Kinds of Metamerism . . . . .	169
3.3.4	Special Metamerism Indices . . . . .	172
3.4	Specific Qualities of Colorants . . . . .	175
3.4.1	Build-up and Coloring Potential . . . . .	176
3.4.2	Strength and Depth of Color . . . . .	179
3.4.3	Covering Capacity . . . . .	185
3.4.4	Transparency and Coloring Power . . . . .	189
3.4.5	Color Fastness and Turbidity . . . . .	192
3.4.6	Stability of Effect Pigments . . . . .	197
3.5	Chroma of Effect Pigments . . . . .	200
3.5.1	Coloristic Quantities of Effect Pigments . . . . .	201
3.5.2	Color Difference Equation for Metallics . . . . .	206
3.5.3	Chroma of Pearlescence and Interference Pigments . . . . .	209
3.5.4	Mixtures of Effect Pigments . . . . .	214
3.5.5	Color Development of Diffraction Pigments . . . . .	221
	References . . . . .	228
<b>4 Measuring Colors . . . . .</b>		
4.1	Measurement of Reflecting and Transmitting Materials . . . . .	234
4.1.1	Measurement of Colors and Visual Judgment . . . . .	235
4.1.2	Measurement Geometries . . . . .	239
4.1.3	Sample Requirements . . . . .	248
4.1.4	Transparent, Translucent, Opaque Colors . . . . .	250

4.1.5	Color Matching . . . . .	252
4.1.6	Acceptability and Tolerance Agreement . . . . .	255
4.2	Measuring Methods . . . . .	257
4.2.1	Tristimulus Colorimeter . . . . .	257
4.2.2	Spectrophotometer . . . . .	259
4.2.3	Accuracy of Spectrophotometers . . . . .	263
4.2.4	Reflectance and Transmittance of Layers . . . . .	266
4.2.5	Auxiliary Optical Methods for Effect Pigments . . . . .	271
4.2.6	Fluorescent, Thermochromic, Photochromic Colors . . . . .	274
4.3	Uncertainties of Spectral Color Measurement . . . . .	278
4.3.1	Qualitative Errors . . . . .	279
4.3.2	Quantitative Errors and Error Distribution . . . . .	280
4.3.3	Normal Distribution in Three and More Dimensions . . . . .	284
4.3.4	Statistical Testing of Color Differences . . . . .	287
	References . . . . .	292
<b>5</b>	<b>Theories of Radiative Transfer . . . . .</b>	<b>295</b>
5.1	Fundamentals . . . . .	295
5.1.1	Basic Concepts and Definitions . . . . .	296
5.1.2	Absorption and Scattering . . . . .	299
5.1.3	Single and Multiple Scattering . . . . .	302
5.1.4	Radiative Transfer Equation . . . . .	306
5.1.5	Radiative Transfer in Plane Parallel Layers . . . . .	308
5.1.6	Phase Function for Anisotropic Scattering . . . . .	313
5.2	Directional Two-Flux Approximation . . . . .	316
5.2.1	Reflection and Transmission . . . . .	317
5.2.2	Optical Special Cases . . . . .	319
5.2.3	Optical Triangle . . . . .	321
5.2.4	Determination of Optical Coefficients . . . . .	324
5.3	Theory of Kubelka and Munk . . . . .	326
5.3.1	Empirical Approach . . . . .	327
5.3.2	Exceptional Optical Cases . . . . .	329
5.3.3	Determination of Optical Constants . . . . .	331
5.3.4	Boundary Layer Correction . . . . .	332
5.3.5	Limits of Kubelka–Munk Theory . . . . .	337
5.4	Three-Flux Approximation . . . . .	340
5.4.1	Conception of Three-Flux Theory . . . . .	341
5.4.2	Reflection and Transmission . . . . .	343
5.4.3	Optically Different Materials . . . . .	345
5.4.4	Correction of Surface Effects . . . . .	348
5.4.5	Special Cases of External Reflection and Transmission . . . . .	352
5.5	Approximation of Radiative Transfer by Multi-Flux Theory . . . . .	356
5.5.1	Exact Solutions for Internal Reflection and Transmission . . . . .	357

5.5.2	Surface Boundary Corrections . . . . .	363
5.5.3	Total Reflection and Optical Extreme Cases . . . . .	368
5.5.4	Boundary Conditions, Matrices of Reflection and Transmission . . . . .	370
5.5.5	Directional and Diffuse Reflection and Transmission . . . . .	372
5.5.6	Inclusion of Total Reflection . . . . .	373
5.5.7	Corrected Optical Triangle . . . . .	377
	References . . . . .	379
<b>6</b>	<b>Recipe Prediction . . . . .</b>	<b>381</b>
6.1	Classical Method . . . . .	382
6.1.1	Calibration Series with Absorbing Colorants . . . . .	384
6.1.2	Calibration and Reference Colorations for Effect Pigments . . . . .	390
6.1.3	Determination of Absorption and Scattering Coefficients . . . . .	393
6.1.4	Optical Path and Albedo . . . . .	397
6.1.5	Coefficients of the Phase Function . . . . .	399
6.1.6	Accuracy of Predicted Recipes . . . . .	400
6.2	Strategies for Recipe Prediction . . . . .	403
6.2.1	Numerical Methods . . . . .	404
6.2.2	Spectrometric Strategy . . . . .	409
6.2.3	Colorimetric Method . . . . .	414
6.2.4	Balanced Color Differences . . . . .	417
6.3	Realization of Recipes . . . . .	420
6.3.1	Selection of Suitable Recipes . . . . .	421
6.3.2	Sensitivity and Correctability of Color Recipes . . . . .	424
6.3.3	Numerical Procedures for Recipe Correction . . . . .	427
6.3.4	Databases . . . . .	431
6.3.5	Modified Expert Systems . . . . .	435
6.3.6	Neural Networks . . . . .	441
	References . . . . .	445
<b>Appendix . . . . .</b>		<b>447</b>
A.1	Non-colored Applications of Effect Pigments . . . . .	447
A.1.1	Metallic Pigments . . . . .	447
A.1.2	Pearlescent Pigments . . . . .	448
A.2	Chromatic Adaption Transform CAT02 . . . . .	448
A.2.1	Forward Mode . . . . .	448
A.2.2	Reverse Mode . . . . .	450
A.3	Two-Flux Approximations . . . . .	451
A.3.1	Directional Fluxes . . . . .	451
A.3.2	Diffuse Fluxes . . . . .	453
	<b>References in Alphabetic Order . . . . .</b>	<b>455</b>
