Woodhead publishing series in textiles

Smart textile coatings and laminates

Edited by William C. Smith Industrial Textile Associates

Contents

	Contributor contact details	ix
	Woodhead Publishing Series in Textiles	xi
Part I	Fundamentals of textile coatings and laminates	1
1	Overview of textile coating and lamination W. C. Smith, Industrial Textile Associates, USA	3
1.1	Introduction	3
1.2	Industry basics	5
1.3	Applications	7
1.4	Conclusions	9
2	Coating and laminating processes and techniques	
	for textiles	10
	E. SHIM, North Carolina State University, USA	
2.1	Introduction: basic principles of coating and laminating	
	processes in an analysis is and the first second of the	10
2.2	Preparation for coating and lamination	15
2.3	Coating methods	19
2.4	Lamination methods	33
2.5	Conclusions	37
2.6	References	38
3	Base fabrics and their interaction in coated fabrics	42
	S. FARBOODMANESH and J. CHEN, University of	
	Massachusetts Lowell, USA, Z. TAO, Abiomed Inc., USA,	
	J. MEAD, University of Massachusetts Lowell, USA,	
	H. ZHANG, Delphi Corporation, USA	
3.1	Introduction	42
3.2	Methods of characterization of base fabric and coated	
	fabric properties	45
		V

vi Contents

3.3	Materials and experimental setup for parametric studies	56
3.4	Effect of weave pattern	61
3.5	Effect of fill yarn size	67
3.6	Effect of coating thickness and penetration on shear	
	behavior	74
3.7	Modeling of coated fabric behavior	82
3.8	Summary and sources of further information and advice	90
3.9	References	91
4	Testing heat and mass transfer through membranes	
	and coatings for textiles M. Weder, R. Rossi and D. Crespy, EMPA, Switzerland	95
4.1	Introduction: basic equations of heat and mass transfer	95
4.2	Testing heat transfer	100
4.3	Testing mass transfer	101
4.4	Coupled heat and mass transfer testing	112
4.5	Future trends	117
4.6	Conclusions	117
4.7	Standards	118
4.8	References	120
Part II	Smart and intelligent coatings and laminates	
	for textiles	123
5	Microencapsulation technology for coating and	
	lamination of textiles	125
	R. MEIROWITZ, RND Technical Solutions Inc., USA	
5.1	Introduction	125
5.2	History of microencapsulation	126
5.3	General benefits of microencapsulation	126
5.4	Types of microcapsule	127
5.5	Techniques of microencapsulation	128
5.6	Release behavior	132
5.7	Main uses of microcapsules in coatings and laminates	136
5.8	Applications of microcapsules in textiles	143
5.9	Sources of further information and advice	149
5.10	References	150
6	Conductive coatings for textiles	155
	L. WANG, RMIT University, Australia, and X. WANG and	

T. LIN, Deakin University, Australia

vii

6.1	Introduction	155
6.2	Methods for imparting conductivity on textiles	157
6.3	Main types of conductive coating	158
6.4	Principles and procedures of conducting polymer coating	161
6.5	Substrates for conductive coating	166
6.6	Testing of conductive coatings	167
6.7	Properties of conducting polymer coated textiles	171
6.8	Applications of conductive textiles	179
6.9	Conclusions estimate of radenal isocoord	183
6.10	References and a subscription of the subscript	184
7	Intelligent breatbable coatings and laminates	
	for textile applications	189
	M JASSAL and A K ACRAWAL Indian Institute of	100
	Technology, India	
71	Introduction: breathable textiles	189
72	Methods of making breathable textiles	190
73	Hydrophilic breathable coatings	191
7.4	Smart temperature responsive breathable coatings for	171
7.7	textile structures	204
75	References	210
1.5	References	21)
8	Shape memory polymers in coatings and laminates	
	for textiles	222
	J. HU and H. ZHUO, The Hong Kong Polytechnic	
	University, China and a second second second the second se	
8.1	Introduction to shape memory polymers	222
8.2	Temperature-sensitive shape memory polymer coatings	
	and laminates	227
8.3	Applications of shape memory polymer coatings and	
	laminates	229
8.4	Future trends	232
8.5	References	233
010	Fastering house all and the phile Route house a 3	200
9	Phase change materials and their application in	
	coatings and laminates for textiles	236
	B. PAUSE, Textile Testing and Innovation LLC, USA	
9.1	Introduction	236
9.2	Phase change materials	237
93	Textile coatings and laminates with phase change material	201
7.5	treatment	238
	ti outinolit	230

viii Contents

9.4	Thermal effects	240
9.5	Determination of the thermal effects	242
9.6	Applications of textile coatings and laminates with phase	
	change materials	244
9.7	Sources of further information and advice	248
9.8	References	249
10	Nanotechnology-based advanced coatings and	
	functional finishes for textiles	251
	Y. K. KIM, University of Massachusetts Dartmouth, USA	
10.1	Introduction	251
10.2	Principles of nanotechnologies for nanocoating, surface	
	finishing and laminates	252
10.3	Nanotechnology applications in textile structures and	
	functional coatings and finishes	260
10.4	Sources of further information and advice	262
10.5	References	262
11	Smart flame retardant textile coatings and laminates	264
ACTC:	A. R. HORROCKS, University of Bolton, UK	
11.1	Introduction: general requirements and properties of fire	
	retardant coatings	264
11.2	Main types of fire retardant/resistant coatings and	
	laminates	265
11.3	Increasing flame retardant coating smartness	274
11.4	Truly smart flame retardant coatings and laminates and	
	future trends	289
11.5	References	290
