Contents of Volume 186

Analysis of Oxidized Functionalities in Cellulose

André Potthast · Thomas Rosenau · Paul Kosma (Eds.)

Department of Chemistry, Christian-Doppler-Laboratory of Polymer Chemistry,
Institute of Natural Resources and Applied Life Sciences,
Institute of the Austrian Polymer Science Network of Excellence (IPHO),
University of Vienna, 1180 Vienna, Austria
E-mail: potthast@univie.ac.at

Analysis of Oxidized Functionalities in Cellulose

A. Potthast · T. Rosenau · P. Kosma 1

Nanocelluloses as Innovative Polymers in Research and Application

D. Klemm · D. Schumann · F. Kramer · N. Heßler · M. Hornung · H.-P. Schmauder · S. Marsch 49

Material Functionalization of Cellulose and Related Polysaccharides via Diverse Microcompositions

Y. Nishio 97

Trapping of Reactive Intermediates to Study Reaction Mechanisms in Cellulose Chemistry

T. Rosenau · A. Potthast · P. Kosma 153

Functional Polymers Based on Dextran

T. Heinze · T. Liebert · B. Heublein · S. Hornig 199

Author Index Volumes 201–205 293**Subject Index** 297

Applications of the CCOA and FOAM Methods during Delignification Processes	39
Blanching Treatments	81
Cellulose in Lignocelluloses	53
Chemical Reactions of Cellulose and Aging of Alkali Celluloses	85
Characterization of Cellulose	39
Chemical Reactions of Cellulose in Paper	43
