

ADVANCED STEAM LOCOMOTIVE DEVELOPMENT

Three Technical Papers
L.D. PORTA

CONTENTS:

INTRODUCTION

LIVIO DANTE PORTA - A BRIEF BIOGRAPHY

3

STEAM LOCOMOTIVE DEVELOPMENT IN ARGENTINA

1. Introduction	7
2. Improvements to Existing Locomotives	8
3. Positive Experience and Lessons	22
4. Proposed Locomotive Designs	23
Conclusions	30
Acknowledgements	30
Appendix	31
Discussion	32

FUNDAMENTALS OF THE PORTA COMPOUND SYSTEM FOR STEAM LOCOMOTIVES

Summary	51
1. Introduction	51
2. A Review of Cylinder Phenomena	52
3. The Author's Single Expansion Scheme	61
4. The Coefficient α	66
5. Compounding	68
6. The Valve Gear of Compounds	79
7. Resuperheating	79
8. Three Cylinder Compounding	80
9. Two and Four Cylinder Compounding	82
10. What Should Not Be	83
11. Boiler Size	84
12. Recapitulation	84
13. Concluding Remarks and Recommendations	86
Appendices	87
References	89
List of Figures	90

SOME STEAM LEAKAGE TESTS

1. Introduction	91
2. General	92
3. Measuring Procedure	93
4. Test Results	93
5. Additional Remarks and Recommendations	93
Appendix A - Detail Test Results	94
Summary	97
References	97
