Quenching and Cooling, Residual Stress and Distortion Control

JAI Guest Editors:

Lauralice de C.F. Canale
Michiharu Narazaki

Contents

Overview	ix
----------	----

Heat Transfer

Experimental Technique for Heat Transfer Measurements on Fast Moving Sprayed Surfaces M. Pohanka, H. Bellerova, and M. Raudensky	3
Accurate Determination of Surface Heat Fluxes During Quenching Characterized by Boiling Water Heat Transfer M. A. Wells and K. J. Daun	16
Heat Transfer During Quenching and Assessment of Quench Severity—A Review K. Narayan Prabhu and P. Fernandes	40
Formulation of a Guideline for the Determination of Heat Transfer Coefficient during Gas Quenching T. Luebben, M. Lohrmann, S. Segerberg, and P. Sommer	63
Determination of Surface Heat Transfer Coefficients of Cr12MoV Steel Cylinder during High-Speed Gas Quenching at Atmospheric Pressure C. Heming, L. Jianyun, L. Ziliang, H. Lijun, and H. Jie	84
Enhancement and Local Regulation of Metal Quenching Using Atomized Sprays U. Alam, J. Krol, E. Specht, and J. Schmidt	91
The Effect of Agitation and Quenchant Temperature on the Heat Transfer Coefficients for 6061 Aluminum Alloy Quenched in Distilled Water M. Maniruzzaman, M. Fontecchio, and R. D. Sisson, Jr.	104

Modeling and Simulation

A Review on Modeling and Simulation of Quenching C. Şimşir and C. H. Gür	117
Modeling of Quenching and Tempering Induced Phase Transformations in Steels P. T. Rajeev, L. Jin, T. N. Farris, and S. Chandrasekar	157
Improving Control of a Quenching Process by Coupling Analysis Methods A. Banka, J. Franklin, Z. Li, B. L. Ferguson, A. Freborg, and M. Aronov	186
Generalized Equation for Cooling Time Evaluation and Its Verification by CFD Analysis P. Krukovskiy, N. Kobasko, and D. Yurchenko	205
Computer Simulation of Quenched Steel Working Stress B. Smoljan, S. Smokvina Hanza, and D. Iljkić	228
A Novel Approach to Model Moving Heat Sources F. D. Fischer, C. Kremaszky, J. Očenášek, and E. Werner	245
Analysis of Stress Concentration around Inclusions due to Thermally Induced Strain to the Steel Matrix M. R. Allazadeh, C. I. Garcia, A. J. DeArdo, and M. R. Lovell	253
Considering the Body-Centered Cubic Lattice Parameter of α -Fe Alloys versus Concentrations of Solved Elements V. P. Filippova	269

Application of thermodynamics and kinetics in the designing of new type TRIP steels concerning Al and P effects L. Li, S. G. Huang, L. Wang, Y. L. He, J. Vleugels, and O. Van der Biest,	284
Model of Solid State Transformations of Ductile Cast Iron GJS-600 V. Runser and V. Schulze,	295

Distortion and Residual Stresses

Using Polyalkylene Glycol Quenchants to Effectively Control Distortion and Residual Stresses in Heat Treated Aluminum Alloys T. Croucher,	309
Minimizing Machining Distortion in Aluminum Alloys through Successful Application of Uphill Quenching—A Process Overview T. Croucher,	332
Explanation of the Origin of Distortion and Residual Stress in Carburized Ring Using Computer Simulation K. Arimoto, S. Yamanaka, and K. Funatani,	352
The Analysis and Control of Distortion in Carbonitrided and Nitrocarburized Thin-Shelled Plain Carbon Steel Automotive Powertrain Components V. Campagna, D. O. Northwood, R. Bowers, X. Sun, and P. Bauerle,	364
The Effect of Core and Carburized Surface Microstructural Stability on Residual Stress Evolution during Tempering J. Vatavuk, M. Zicari di Monte, and A. A. Couto,	387
Explanation on the Origin of Distortion in Induction Hardened Ring Specimens by Computer Simulation T. Horino, F. Ikuta, K. Arimoto, C. Jin, and S. Tamura,	398
Optimum Strategies to Reduce Residual Stresses and Distortion during the Metal Quenching Process A. K. Nallathambi, Y. Kaymak, E. Specht, and A. Bertram,	411
Numerical Simulation of Residual Stresses in Quenched Steel Bodies Using Subroutines to Represent TTT and CCT Diagrams E. M. Bortoleto, C. F. Lagatta, M. G. Di Vernieri Cuppari, I. F. Machado, and R. Martins de Souza,	436
Prediction of Distortion of Automotive Pinion Gears during Quenching Using CFD and FEA D. S. MacKenzie, A. Kumar, H. Metwally, S. Paingankar, Z. Li, and B. L. Ferguson,	450

Property Predictions

Prediction of Quench-Hardness within the Whole Volume of Axially Symmetric Workpieces of Any Shape B. Liščić, S. Singer, and B. Smoljan,	467
Correlation between Thermal and Mechanical Properties of the 10NiCr11 T. Ghrib, M. Bouhafs, and N. Yacoubi,	489
An Efficient Numerical Algorithm for the Prediction of Thermal and Microstructure Fields during Quenching of Steel Rods S. K. Ali, M. S. Hamed, and M. F. Lightstone,	500

Quenchants and Quenching

Starch-Based Quenchants as an Eco-Friendly Alternative to Quenching Oil S. S. Sahay,	525
---	-----

Comparison of Structure and Quenching Performance of Vegetable Oils E. C. de Souza, M. R. Fernandes, S. C. M. Augustinho, L. de Campos Franceschini Canale, and G. E. Totten,	531
Severity of Quenching and Kinetics of Wetting of Nanofluids and Vegetable Oils V. Jagannath and K. N. Prabhu,	571
An Investigation on Quenching Performance of Hot Alkaline Bath S. Raygan, J. Rassizadehghani, and M. Askari,	584
A Feasibility Study of the Use of Bismuth Bath to Replace Lead Bath as the Quenching Media for Steel Heat-Treating J. Ru and Z. Wang,	596
Spray Quenching in Induction Hardening Applications V. Rudnev,	609
Technology and Applications of Alternately Timed Quenching Technology N. Chen, X. Zuo, S. Zhou, and J. Xu,	622
One More Discussion "What is Intensive Quenching Process?" N. I. Kobasko, M. A. Aronov, J. A. Powell, and G. E. Totten,	629
Energy Efficient and Eco-friendly Intensively Quenched Limited Hardenability Low Alloy Steels N. I. Kobasko,	644
An Overview of Technology and Equipment for Hardening of Large Steel Parts L. N. Deyneko, N. I. Kobasko, V. V. Dobryvechir, and E. I. Litvinenko,	662
Accelerated Cooling of Steel Plates: The Time Has Come A. A. Gorni and J. H. D. da Silveira,	682
Overview of Pearlitic Rail Steel: Accelerated Cooling, Quenching, Microstructure, and Mechanical Properties S. S. Sahay, G. Mohapatra, and G. E. Totten,	692
Water and Polymer Quenching of Aluminum Alloys: A Review of the Effect of Surface Condition, Water Temperature, and Polymer Quenchant Concentration on the Yield Strength of 7075-T6 Aluminum Plate G. S. Sarmiento, C. Bronzini, A. C. Canale, L. C. F. Canale, and G. E. Totten,	728

Gas Quenching

Gas-Jet Quenching P. Stratton,	757
Quenching Homogeneity and Intensity Improvement in Batch Mode High Pressure Gas Quenching R.-R. Schmidt and U. Fritsching,	776
Gas-Cooling of Multiple Short Inline Disks in Flow Along Their Axis N. Lior and D. Papadopoulos,	795
Numerical Simulation of the Mechanical Properties of Cr12 Steel during Gas Quenching Z. Li, H. Cheng, J. Li, and L. Hou,	820

Hardenability

Enhanced Hardenability through Application of Magnetic Fields I. F. Machado,	833
A New Method to Study the Effect of Cooling Rate on the Decomposition of Austenite in Advanced High Strength Sheet Steels K. Cho, C. I. Garcia, M. Hua, J. Lee, Y. S. Ahn, and A. J. DeArdo,	843

Cooling Curve Analysis Methodologies

Quenchant Characterization by Cooling Curve Analysis L. C. F. Canale, X. Luo, X. Yao, and G. E. Totten,	861
Cooling Characteristic Test of Quenching Media G.-y. Zeng,	900
A Complete System for Testing and Evaluation of Quenchants and Quenching Systems H. Kristoffersen, E. Troell, I. Felde, and J. Bodin,	914
Effects of Cooling Rate Fluctuation on Cooling and Transformation Behavior of Steel upon Direct Quenching X. Luo and J. Li,	935
Correlation between Cooling Curves Obtained with a Silver Probe and Quenching Properties of 5140 Steel Bars R. S. Wang, Y. Wang, and L. P. Su,	953
Measurement of the Cooling Power of Polyethylene Glycol Aqueous Solutions Used as Quenching Media R. Ikkene, Z. Koudil, and M. Mouzali,	977
Evolution of Quench Factor Analysis: A Review P. M. Kavalco and L. C. F. Canale,	991
Analysis of the Segerberg Hardening Power Equation C. Chun-huai and Z. Jing-en,	1021
The Influence of Surface Temperature on Rewetting Behavior During Immersion Quenching of Hollow and Solid Cylinders F. Frerichs and Th. Luebben,	1032

Dilatometric Analysis

Dilatometric Analysis to Study Aging of Aluminum Alloys R. Gerosa, B. Rivolta, and U. Derudi,	1055
Optimization of the Heat Treatment of a 17-4 PH Stainless Steel by Dilatometric Technique R. Gerosa, B. Rivolta, and A. Sala,	1066
Author Index	1077
Subject Index	1081
