

A Comprehensive Review of
**Lubricant Chemistry,
Technology,
Selection,
and Design**

Syed Q. A. Rizvi

Contents

Preface	ix
Chapter 1: Lubrication Fundamentals	1
Lubricant Market	1
Friction and Lubrication	3
Friction	3
Lubrication	4
Viscosity and Wear	8
Viscosity	8
Wear	18
Types of Lubricants	19
Lubricant Selection and Specifications	19
Lubricant Selection Criteria	19
Lubricant Classifications	20
Lubricant Composition	21
Detergents	21
Dispersants	21
Oxidation Inhibitors	21
Rust and Corrosion Inhibitors	21
Friction Modifiers	21
Anti-wear Agents and Extreme-pressure Additives	21
Foam Inhibitors	22
Viscosity Modifiers	22
Pour Point Depressants	22
Chapter 2: Mineral Base Oils	23
Petroleum Composition	23
Oil Field and Refinery Chemicals	24
Petroleum Refining	28
Refinery Processes	28
Refinery Process Chemicals	31
Lubricant Base Stocks	32
Comparison between Naphthenic and Paraffinic Base Oils	33
Mineral Base Oil Manufacture	34
Hydrocarbon Analysis	41
Base Oil Properties	42
Oxidation Properties	42
Effects of Sulfur and Nitrogen Compounds	42
Other Properties	42
Gas to Liquid Technology	45
Chapter 3: Synthetic and Biological (Natural) Base Stocks	47
Synthetic Base Stocks	47
Synthetic Hydrocarbon (SHC) Polymers	47
Carboxylate Esters	54
Poly(Alkylene Glycol)s	62
Other Synthetic Base Stocks	67
Petroleum Base Stocks Versus Synthetic Base Fluids	76
Biological (Natural) Base Stocks	92
Melting Point/Pour Point	94
Oxidative Stability	95
Manufacture and Processing	96
Composition of Natural Oils and Structural Modifications	97
Chapter 4: Lubricant Additives	100
Desirable Lubricant Properties	103
Criteria For Suitable Base Stocks	103
Performance Additives	104
Stabilizers/Deposit Control Agents	105
Oxidation Inhibitors	110
Dispersants	121
Detergents	137

Film-forming Agents	14
Emulsifiers and Demulsifiers	18
Polymeric Additives	18
Other Additives	20
Multifunctional Nature of Additives	20
Environmental Impact of Additives	20
The Introduction of a New Additive	20
The Approval Process	21
Chapter 5: Combustion Engine Lubricants	21
Types Of Engines And Mode Of Their Operation	21
Lubricant Specifications And Classifications	21
Trends Impacting the New Performance Standards	217
U.S. Standards	218
European Standards	222
Japanese Standards	229
Indian Standards	229
Engine Oil Classification Based on End-use	229
Lubricant-related Causes of Engine Malfunction	246
Rating of Engine Parts	247
Formulating Engine Oils	249
Fuel Economy	256
Emissions Control	256
Extended Service Intervals (Extended Oil Drains)	260
Formulation Examples	268
Commercial Railroad Diesel Engine Oil Concentrates	270
Chapter 6: Emissions in an Internal Combustion Engine	273
Exhaust Emissions Of Concern	274
Unburned Hydrocarbons (HC)	276
Carbon Monoxide (CO)	277
Nitrogen Oxides (NOx)	277
Ground Level Ozone	278
Sulfur Dioxide	278
Aldehydes	278
Particulate Matter (PM)	278
Odor	278
General Engine Performance Considerations	279
Emissions Standards	281
U.S. Emissions Standards	281
Emissions Standards—European Union	293
Gasoline Engine Emissions Control	296
Gasoline Properties versus Emissions	296
Formulated Gasoline	299
Reformulated Gasolines (RFGs)	299
Effect of Engine Design and Operating Variables on Emissions	300
Diesel Engine Emissions Control	305
Diesel Combustion	307
Diesel Fuel Properties	308
PuriNOx™ Technology	311
Diesel Engine Design and Operating Variables	311
Emissions Control via After-treatment	313
Emissions Control via Engine Design Changes	314
Fuel Additives	322
Deposit Formation	322
Deposit Control Additives/Cleanliness Agents	325
Fluidizers	327
Anti-icing Agents	327
Octane Improvers	327
Lubricity Agents	328
Cetane Improvers (Diesel Ignition Improvers)	329
Combustion Modifiers/Smoke Suppressants	330
Low-temperature Operability Additives	330
Flow Improvers/Wax Modifiers	330

Foam Inhibitors	331
Corrosion Inhibitors	331
Demulsifiers	331
Biocides	331
Antistatic Agents	332
Drag Reducers	332
Dyes and Markers	332
Oxidation Inhibitors/Stabilizers	333
Metal Deactivators	333
Chapter 7: Hydraulic and Transmission Fluids	334
Hydraulic Fluids	334
Tractor Hydraulic Fluids	335
Industrial Hydraulic Fluids	335
Types of Hydraulic Fluids	349
Formulating a Hydraulic Fluid	361
Formulation Examples	363
Condition-Monitoring of Hydraulic Fluids	364
Transmission Fluids	364
Automatic Transmission Fluids	365
Power Transmission Fluids	369
Transmission Fluid Composition and Testing	371
Continuously Variable Transmissions (CVTs)	373
Lubricants for the Continuously Variable Transmissions (CVTs)	376
Formulation Examples	378
Miscellaneous Hydraulic Fluids	378
Chapter 8: Gear Lubricants	382
Gear Types	382
Gear Metallurgy	383
Gear Failure	385
Gear Failure Modes	385
Gear Diagnostics	385
Causes of Gear Failure	386
Gear Lubrication	391
Lubrication Methods	391
Selection of a Gear Lubricant	393
Gear Oil Formulation	402
Base Fluids	402
Additives	405
Lubricant Selection	405
Gear Lubricant Tests	407
Physical Tests	407
Analytical Tests	407
Performance Tests	407
Formulation Examples	408
Chapter 9: Miscellaneous Industrial Lubricants	410
Types Of Industrial Oils	410
Turbine Lubricants	411
Compressor and Refrigeration Oils	424
Miscellaneous Industrial Applications	432
Industrial Uses of Synthetic Fluids	440
Formulation Examples	442
Chapter 10: Lubricating Greases	443
Lubricating Grease Versus Liquid Lubricant	444
History Of Lubricating Grease Development	445
Lubricating Grease Classification	446
Lubricating Grease Market	447
Grease Composition	448
Soap-thickened Lubricating Greases	450
Nonsoap Greases	459
Grease Chemistry	463
Base Fluids	463

Additives	46
Grease Manufacture	46
Batch Production	47
Continuous Production	47
Finishing	47
Incorporation of Additives	47
Desirable Grease Properties	47
Consistency	47
Consistency Stability	47
Penetration	47
Rheological Properties	47
Thermal Stability (Heat Resistance)	47
Storage Stability	47
Oxidation Stability	47
Sensitivity to Water	47
Corrosion Protection	47
Load-carrying Capacity	47
Grease Classifications	48
Characteristics Of Modern Greases	48
Inter-Grease Compatibility	48
Applications Involving Lubricating Greases	48
Grease Selection	48
Bearing Lubrication	48
Gear Lubrication	48
Automotive Aftermarket	48
Primary Metals—Steel Mills	48
Food Processing	48
Textiles	48
Grease Storage	48
Handling And Disposal Of Used/Waste-Greases	48
Environmentally Compatible Greases	48
Grease Testing Requirements	48
Flow Properties	48
Heat Resistance	48
Oxidation Stability	48
Extreme Pressure and Wear	49
Corrosion	49
Seal Compatibility	49
Stability	49
Water Tolerance Tests	49
Bench Performance Tests	49
Grease Compatibility	49
NLGI Certification Mark	49
Grease Analysis	49
Specialty Greases	49
Synthetic Lubricating Greases and Their Coding	49
Multiple Use Greases	49
Multi-purpose Grease	49
Track Roller Lubricants	49
Mineral Oils Mixed with Solids	49
Heavy Asphaltic-type Oils Blended with Lighter Oils	49
Extreme-Pressure Greases	49
Roll Neck Greases	49
Application And Industry Trends	49
Formulation Examples	49
Chapter 11: Metalworking and Machining Fluids	49
Lubrication	49
Viscosity	50
Metalworking Fluid Classification	50
Classification Based on Base Fluid	50
Classification Based on End-use	50
Fluid Composition	51
Base Fluid	51

Additives	519
Metal Working Fluid Formulations and Testing	529
Formulation Examples	529
Fluid-based Formulations	529
Application-based Formulations	529
Chapter 12: Lubricant Testing	531
Introduction Of A New Additive or a Product	531
The Approval Process	531
Physical and Analytical Tests	532
Mechanical or Tribological Tests	554
In-service Lubricant Analysis	558
Full-scale Testing	573
Elements of a Quality Test	575
Chapter 13: Lubricants and the Environment	579
Lubricant Deterioration In Service	579
Used Oil—Environmental Considerations	583
Lubricant Conservation	585
Used Oil Recycling	587
Oil Reconditioning	588
Lubricants And The Environment	591
Environmental Compatibility	591
Need for Standardized Testing	593
Biodegradability	595
Toxicity	598
Environmentally Acceptable Lubricants	599
Disposal Issues	599
Permissions	601
Appendix	603
Subject Index	629
References	635
