	<i>Contributor contact details</i>	<i>xi</i>
	<i>Woodhead Publishing Series in Textiles</i>	<i>xv</i>
Part I	Smart materials and technologies	1
1	Smart textiles for protection: an overview L. VAN LANGENHOVE, Ghent University, Belgium	3
1.1	Introduction	3
1.2	Smart textile functions for protection	7
1.3	European projects on smart protective textiles	15
1.4	Protective textiles and comfort	21
1.5	Other functions of smart textile systems	25
1.6	Systex – a European coordination action for enhancing the breakthrough of intelligent textile systems	27
1.7	References	30
2	Types of smart materials for protection N. FINN, CSIRO Materials, Science and Engineering, Australia	34
2.1	Introduction: smart materials for protection	34
2.2	High-performance fibres for protective textiles	35
2.3	Piezoelectric fibres, phase-change materials, and shape memory fibres	45
2.4	Woven and knitted structures for protective textiles	49
2.5	Nonwovens	56
2.6	Barrier films and nanofibre membranes	60
2.7	Carbon nanotubes	72
2.8	Conclusion and future trends	84
2.9	References	85

vi	Contents	
3	Smart surface treatments for textiles for protection E. SHIM, North Carolina State University, USA	87
3.1	Introduction: the role of surfaces in smart fabrics for protection	87
3.2	Surface grafting	92
3.3	Coating techniques	99
3.4	Other surface treatment methods	111
3.5	Conclusion and future trends	117
3.6	Sources of further information and advice	117
3.7	References	120
4	The use of nanomaterials in smart protective clothing S. SUNDARRAJAN, National University of Singapore, Singapore and S. RAMAKRISHNA, National University of Singapore and Institute of Materials Research and Engineering, Singapore	127
4.1	Introduction	127
4.2	Conventional materials used in protective clothing	128
4.3	Use of nanoparticles in protective clothing	129
4.4	Use of electrospun nanofibers and nanoparticles in protective clothing	131
4.5	Applications of nanoparticles in protective textiles	136
4.6	Smart textiles using nanoparticles	139
4.7	Chameleon fibers	142
4.8	Conclusion and future trends	143
4.9	Sources of further information and advice	144
4.10	References	144
5	Smart barrier membranes for protective clothing P. I. DOLEZ, École de Technologie Supérieure, Canada	148
5.1	Introduction	148
5.2	Principles and types of responsive barriers	154
5.3	Principles and types of self-decontaminating barriers	162
5.4	Advantages and challenges of responsive and self- decontaminating barriers	174
5.5	Applications of responsive and self-decontaminating barriers	176
5.6	Conclusion and future trends	178
5.7	Sources of further information and advice	180
5.8	Acknowledgments	181
5.9	References	181

6	Sensors, actuators and computing systems for smart textiles for protection	190
	G. R. LANGEREIS, S. BOUWSTRA and W. CHEN, Eindhoven University of Technology, The Netherlands	
6.1	Introduction	190
6.2	When textiles meet electronics	191
6.3	Sensors in textiles	193
6.4	Actuators in textiles	200
6.5	Power	202
6.6	Networks	204
6.7	Future trends	206
6.8	Design case study: neonatal monitoring	207
6.9	Sources of further information and advice	209
6.10	References	210
7	Biomimetic approaches to the design of smart textiles for protection	214
	V. KAPSALI, Northumbria University, UK (formerly at Middlesex University, UK)	
7.1	Introduction: smart material design in nature	214
7.2	Biomimicry of smart protective textiles	217
7.3	Conclusion and future trends	224
7.4	Acknowledgements	225
7.5	References	225
Part II	Applications of smart textiles for protection	227
8	Smart technology for personal protective equipment and clothing	229
	H. CAO, University of Delaware, USA	
8.1	Introduction	229
8.2	Types of personal protective equipment and clothing	230
8.3	Applications of smart clothing in personal protective equipment	236
8.4	Conclusion and future trends	240
8.5	Sources of further information and advice	241
8.6	References	241
9	Smart protective textiles for older people	244
	J. McCANN, University of Wales, Newport, UK	
9.1	Introduction	244

viii	Contents	
9.2	The demands of the changing body	245
9.3	The clothing layering system	250
9.4	Smart protective textiles for older people	253
9.5	Usability of the technology interface	268
9.6	Conclusion	272
9.7	Sources of further information and advice	273
9.8	References	273
10	Smart high-performance textiles for protection in construction and geotechnical applications D. ZANGANI, D'APPOLONIA S.p.A., Italy	276
10.1	Introduction	276
10.2	Technical textiles for the construction and geotechnical sectors	277
10.3	Incorporating sensors into smart textiles through the use of optical fibres	282
10.4	Applications of smart textiles in construction	287
10.5	Future trends: the Industrial Smart Materials Applications (ISMA) initiative	301
10.6	Sources of further information and advice	303
10.7	References	304
11	Smart textiles for the protection of armoured vehicles S. NAUMAN, Institute of Space Technology, Pakistan, I. CRISTIAN, Technical University Gheorghe Asachi of Iasi, Romania and F. BOUSSU and V. KONCAR, University of Lille, France	306
11.1	Introduction	306
11.2	Understanding impact behaviour	308
11.3	Bullet-proof textile composites for armoured vehicles	313
11.4	Using sensor networks in composites to measure impact behaviour and material performance <i>in situ</i>	320
11.5	Conclusion	333
11.6	Future trends	334
11.7	References	334
12	Protective clothing for firefighters and rescue workers C. HERTLEER, S. ODHIAMBO and L. VAN LANGENHOVE, Ghent University, Belgium	338
12.1	Introduction	338
12.2	The Protection e-Textiles (PROeTEX) project	339

12.3	Other firefighter-related European projects	354
12.4	Simulation of the firefighter market	358
12.5	The Viking fire protection suit with built-in thermal sensor technology	359
12.6	The Tecknisolar firefighter garment	361
12.7	Conclusion	362
12.8	References	363
13	Advances in chemical and biological protective clothing	364
	Q. TRUONG and E. WILUSZ, US Army, USA	
13.1	Introduction	364
13.2	Current chemical and biological (CB) protective clothing	366
13.3	Materials for chemical and biological (CB) protective clothing	370
13.4	Technologies for next generation chemical and biological (CB) clothing	373
13.5	References	376
