Part I Saturated fats in foods: functional and nutritional aspects

1	Saturated fats in foods and strategies for their replacement:	3
an introduction	3	
<i>G. Talbot, The Fat Consultant, UK</i>		
1.1	Background to the need to reduce saturated fats	3
1.2	Chemistry and structure of fatty acids and triglycerides	5
1.3	Saturated fat and fatty acid consumption in the EU, US and UK	10
1.4	Opposing views on effects of saturates on cardiovascular disease	15
1.5	Replacements for saturates	18
1.6	Areas not covered by specific chapters in this book	22
1.7	Future trends	25
1.8	Sources of further information and advice	26
1.9	References	26
2	The functional attributes that fats bring to food	29
<i>E. H. A. de Hoog, R. M. A. J. Ruijschop, S. P. Pyett and P. M. T. de Kok, NIZO Food Research B.V., The Netherlands</i>		
2.1	Introduction	29
2.2	Perception of fat	30
2.3	Role of fat in the texture of foods	33

2.4	Engineering fat to tailor appetite	38
2.5	Consequences for strategies to reduce fat.....	41
2.6	Future trends	42
2.7	Sources of further information and advice	43
