6	Sanitary Facility Design The AMI 11 Principles of Sanitary Facility Design Principle 1: Distinct Hygienic Zones Established in	 103 105
	the Facility	105
	Principle 2: Personnel and Material Flows Controlled to Reduce Hazards	105
	Principle 3: Water Accumulation Controlled in the Facility	107
	Principle 4: Room Temperature and Humidity	
	Controlled	107
	Principle 5: Room Airflow and Room Air Quality	
	Controlled	108
	Principle 6: Site Elements Facilitate Sanitary	7,0
	Conditions	109
	Principle 7: Building Envelope Facilitates Sanitary	- 202
	Conditions	110
	Principle 8: Interior Spatial Design Promotes	205
	Sanitation	111
	Principle 9: Building Components and Construction	
	Facilitate Sanitary Conditions	111
	Principle 10: Utility Systems Designed to Prevent	
	Contamination	
	Principle 11: Sanitation Integrated into Facility	11/
	Design	114

	Other Facility Considerations for Facility Sanitary	
	Design	115
	The Ten Principles of Sanitary Design	116
	Principle 1: Contact and Noncontact Surfaces	
	Cleanable to a Microbiological Level	117
	Principle 2: Use of Compatible Materials	117
	Principle 3: Accessible for Inspection, Maintenance,	
	Cleaning, and Sanitation	118
	Principle 4: Self-Draining — No Product or Liquid	
	Collection	118
	Principle 5: Hollow Areas Hermetically Sealed	
	(No Penetration of Hollow Areas)	118
	Principle 6: No Niches — Pits, Cracks, Recesses,	
	Poor Welds, and Corrosion	119
	Principle 7: Sanitary Operational Performance	
	(No Contribution to Insanitary Conditions during	
	Operations)	119
	Principle 8: Hygienic Design of Maintenance	
	Enclosures (Junction Boxes, etc.)	120
	Principle 9: Hygienically Compatible with Other	
	Plant Systems (Electrical, Air, and Water)	120
	Principle 10: Validation of Cleaning and Sanitary	
	Protocols (Encourage Equipment Designers to	
	Demonstrate Effective Cleaning of the	
	Equipment)	121
	Other Considerations for Sanitary Equipment Design	121
	Repairs	121
