# Hair Follicle

Differentiation Under the Electron Microscope

*An Atlas*

 Springer

# Contents

Foreword V  
 Preface VII

## 1

Introduction 1  
 Why Study Hair? 1  
 Growth and Development 4  
 General Structure 9  
 Electron Microscopy 12  
 Life and Death 14  
 Materials and Methods 20  
 References 21

## 2

Medulla 25  
 Variety 25  
 Early Stages 26  
 Trichohyalin 28  
 Unique Exocytosis 28  
 Granules and Vesicles 34  
 Groove 36  
 Programmed Cell Death 40  
 References 43

### 3

## Hair Cortex and Hair Cuticle 45

- Initial Signs of Keratinization 45
- Accumulation of Keratin Fibers 48
- Keratin Filament Bundles 50
- Morphological Change of the Nucleus 54
- Mitochondria 56
- Keratinization of the Hair Cuticle 58
- Granules 60
- References 62

### 4

## Inner Root Sheath 63

- Near the Skin Surface 63
- Precursors of the Inner Root Sheath 65
- Formation of Trichohyalin Granules and Tonofilaments 67
- Special Adherence of Henle's Layer Cells 67
- Decomposition of Trichohyalin Granules and Cornification 70
- Cellular Junctions 74
- Huxley Versus Henle Versus Cuticle 74
- Degeneration of the Nucleus 76
- Specifics of the Cuticle of the Inner Root Sheath 78
- Relationship Between the Cuticle of the Inner Root Sheath and the Hair Cuticle 82
- Final Steps in Cornification 82
- Alternative Ways of Hair Emergence 86
- References 88

### 5

## Outer Root Sheath and Companion Layer 89

- Conundrums 89
- Outer Root Sheath in the Hair Bulb 91
- Identification of the Companion Layer 91
- Boundary and Overlapping of the Outer Root Sheath and Companion Layer 93

|  |     |
|--|-----|
| Tonofilaments in the Companion Layer             | 96  |
| General Characteristics of the Outer Root Sheath | 97  |
| Comparison with Fetal Epidermis                  | 102 |
| Final Fate                                       | 104 |
| References                                       | 106 |

## 6

### Hair Bulb and Papilla 107

|  |     |
|--|-----|
| Overview   | 107 |
| Before Intrusion                                     | 110 |
| First Intrusion Step in the Formation of the Papilla | 114 |
| Characteristics of the Dermal Papilla Cells          | 118 |
| Hair Matrix  | 122 |
| Recruitment and Evacuation of Stem Cells             | 125 |
| References   | 128 |

## Appendix I

### Cells and Tissues That Surround the Hair Follicle 129

|                            |     |
|----------------------------|-----|
| Fibroblasts and Mast Cells | 129 |
| Dermal Muscle              | 132 |
| Dermal Capillaries         | 137 |
| Adipocytes                 | 137 |
| Neurons and Related Cells  | 141 |
| References                 | 144 |

## Appendix II

### Keratins 145

|            |     |
|------------|-----|
| Keratins   | 145 |
| References | 147 |

|               |     |
|---------------|-----|
| Subject Index | 149 |
|---------------|-----|
