

TECHNISCHE
UNIVERSITÄT
DARMSTADT

7th International Symposium on Automotive Lighting

September 25–26, 2007

7th International Symposium on Automotive Lighting

Steering Board

Chairman

Prof. Dr.-Ing. habil. T. Q. Khanh; TU Darmstadt, Germany

Members

J.-P. Charret; Valeo, France

H. Fratty; Fratty Consulting, France

M. Gorzkowski; Transport Canada

Dr.-Ing. W. Huhn; Audi AG, Germany

K. Hyodo; Koito Manufacturing, Japan

R. Krautscheid; BAST, Germany

Dr. T. Dorißen; Hella KG Hueck & Co., Germany

B. Lewandowski; OSRAM GmbH, Germany

Dr. K. Neuffer; Automotive Lighting GmbH, Germany

Prof. Dr. K. Rumar; VTI, Sweden

Dr. M. Sivak; University of Michigan, USA

Dr. R. Neumann; Visteon GmbH, Germany

Index

Conference Programme

Presentation Session A

A1 Accident Research

- A1.1 Investigation on the influence of car lighting on nighttime accidents in Germany** 1
D. Hendrik Schäbe, Dr. Frank Schierge
- A1.2 Static and Dynamic Headlighting: Implications of Nighttime Pedestrian Crash Geometry** 6
John M Sullivan, Michael J Flannagan, The University of Michigan, USA
- A1.3 Portfolio of Solution of Pedestrian Friendly HDLP During the Crash** 15
Pavel Kunzl, Vladimír Dobruš

A2 Regulations & Standards

- A2.1 Performance-Based Aspects of Motor Vehicle Lighting Regulations** 24
Michael J. Flannagan and Michael Sivak
- A2.2 Approval Requirements for a Front-Lighting System with Variable Cut-Off Line in Europe** 31
Jan Holger Sprute, Tran Quoc Khanh, Technische Universität Darmstadt
- A2.3 An Overview of Recent and Future Changes to the ECE Automotive Lighting Regulations** 38
Wilfried van Laarhoven – KEMA Quality B.V. – The Netherlands
- A2.4 Development of criteria for the rating of vehicle lighting with respect to an NCAP for active safety** 47
Karsten Klingner, Dieter Kooß, Karl Manz, Uli Lemmer

Index

A3 LED

- A3.1 LED technology in headlamps - extend lighting functions and new styling possibilities** 55
Michael Kleinkes, Karsten Eichhorn, Norbert Schiermeister,
Hella KGaA Hueck & Co., Lippstadt, Germany
- A3.2 LED Bifunction Module as Compact Xenon Replacement** 64
Thomas Luce, Valeo Lighting Systems, France
- A3.3 LED Headlamps - Challenges and Opportunities for Future Applications** 73
Rainer Neumann, Visteon Deutschland GmbH, Germany
- A3.4 AFS-Frontlighting on the Basis of LED Light Sources** 80
Ernst-Olaf Rosenhahn, Automotive Lighting Reutlingen GmbH
- A3.5 Development of LED Headlamp** 88
Shinya Watanabe, Toyota Motor Corporation; Shigeyuki
Watanabe, Koito Manufacturing, Japan
- A3.6 Effects of LED Roadmaps on Headlamp Main Functions** 97
Ralf Ackermann, Automotive Lighting Reutlingen, Germany
- A3.7 Cut-off generation for LED - headlamps** 105
Stephanie Specht, Schefenacker Vision Systems Germany
GmbH, Germany
- A3.8 Fluid and Thermal Analysis for LED Lamp** 114
Kazushige Kikuchi, Yoshihiko Hamashima, and Kenji
Matsuoka, Ichikoh Industries, Japan
- A3.9 LED is now, what's next?** 123
Stephan Berlitz, AUDI AG, Germany
- A3.10 First Field Tests of Cars with Completely Built-in LED Headlamps under Realistic Driving Conditions** 131
Christoph Schiller, Tran Quoc Khanh, Technische Universität
Darmstadt
- A3.11 XLED** 139
Pierre Albou, Valeo Lighting Systems

Index

- A3.12 Scalable Optical Concepts for Headlamp Main Functions with LED Arrays** 148
Ulrike Schlöder, Automotive Lighting Reutlingen GmbH
- A3.13 LEDs for Headlamps** 156
Moritz Engl, Julius Muschaweck, Osram Opto Semiconductors GmbH
- A3.14 LED - electronic light in an electronic car** 163
Christian Heider, Audi AG, Ingolstadt
- A3.15 A field experiment on the perception of automotive rear lights using pulsed LEDs with different frequencies** 170
Stefan Brückner, Tran Quoc Khanh, Technische Universität Darmstadt, Germany
- A3.16 Modular LED Sources Enabling Adoption of LED Headlighting** 177
J. Schug, Philips Automotive Lighting, Germany
- A4 Measurement**
- A4.1 LED Performance – Measure or Estimate?** 178
Carsten Diem, LMT Lichtmesstechnik GmbH Berlin, Berlin Germany
- A4.2 Additivity of mesopic photometry** 187
Zoltán VAS, Peter BODROGI
- A4.3 Do light sources with a high part of shorter wavelength promote safety?** 195
Stephan Völker
- A5 Light Sources**
- A5.1 Mercury free Xenon HID lamps – from Feasibility to Reliability** 203
Dietmar Ehrlichmann, Dirk Grundmann, Christian Wittig
- A5.2 Xenon HID as future basis for enhanced visibility** 211
Norbert Lesch, Holger Weinert and Helmut Tiesler-Wittig
PHILIPS Lighting, Business Group Automotive

Index

A5.3	The Impact of Adopting Automotive Lighting Technologies on Emerging Markets	219
	Luciano Lukacs	
A5.4	Contribution of energy-efficient lighting to fuel economy	224
	Piermario Repetto, Denis Bollea, Stefano Bernard, Centro Ricerche Fiat; Sabino Sinesi, Gabriele Cattelan, Gianluca Rotaris, Centro Ricerche Plast-optica	
A6	DRL	
A6.1	LEDs for Daytime Running Lamps	226
	Markus Hofmann, Jürgen Röhrer	
A6.2	Trends for Daytime Running Lamps	233
	Doris Boebel, Automotive Lighting Reutlingen GmbH	
A6.3	Estimation of the Effects of a Legislation on Daytime Running Lights for Cars on Road Accidents in Germany	240
	Susanne Schoenebeck, U. Ellmers, Dr. J. Gail, R. Krautscheid, R. Tews	
A6.4	Development of a new methodology for measuring the Behavioural Conspicuity of motor vehicles	249
	John W. Zellner, Nicholas M. Rogers, Jacques Compagne, Jan Paul Peters	
A7	Road Lighting	
A7.1	Application of Dynamic Road Markin	258
	Bob Hamel, Dutch Ministry of Transport	
A7.2	Advanced LED Light Sources for Road Illumination Applications	265
	Jason Posselt, Jeffrey Raggio, Philips Lumileds Lighting Company, USA	
A7.3	Evaluation on a New Type of MHD's Application in Road Lighting Based on Human Factors and its Comparison with HPS	273
	Qi Yao, Yandan Lin, Jiaqi Ju, Hong Shao, Dahua Chen	

Index

A8 Optics

- A8.1 Chromatic Dispersion Compensation via Diffractive Optical Elements (DOEs) for standard and LED based PES head lamps** 281
Matthias Brinkmann, Edgar Pawlowski, Udo Rohlfing, Steffen Stauss
- A8.2 Recent Developments in Automotive Light Shield Designs** 288
Michael Strazzanti
- A8.3 Exciting colour effects and surface design by vacuum deposition** 296
T. Fritz, Dr. M. Scherer, Kai Kruse, Dr. T. Schmauder, Gerd Ickes, Dr. S. Küper

A9 Driver Assistance

- A9.1 Predictive Navigation-based Virtual Sensor for Enhanced Lighting** 304
B. Bradai, A. Herbin, J. Ph. Lauffenburger, M. Basset
- A9.2 Investigation of Adaptive Front-lighting Systems in Human-Machine Interface as Driver Assistance** 313
Shun'ichi Doi, Takahiro Wada, Masahiko Morishita, Yasutoshi Horii, Yuji Chigusa
- A9.3 NightVision: comfort feature or gimmick?** 320
Anil Taner, AUDI AG

A10 NIR

- A10.1 Infrared Radiators in Headlamps: Status Report and Perspectives** 328
Michael Hamm, Automotive Lighting Reutlingen GmbH
- A10.2 Plug&play semiconductor light sources for visible and IR illumination applications** 336
Th. Reiners, A. Biebl, P. Frey, R. Vollmer
- A10.3 Detector system for headlamps with NIR illumination beam** 345
D. Kooß, Karlsruhe University, Germany

Index

A11 AFS

- A11.1 Dynamic Cut-Off-Line geometry as the next step in forward lighting beyond AFS** 346
Franz-Josef Kalze; Christian Schmidt, Hella KGaA Hueck & Co., Lippstadt, Germany
- A11.2 DBL: A Feature that Adds Safety to Night Time Traffic** 355
Martin Grimm, Sebastien Casenave
- A11.3 Real-World Use of High-Beam Headlamps** 364
Mary Lynn Mefford, Michael J. Flannagan, Scott E. Bogard, Michael Sivak, The University of Michigan, U.S.A.
- A11.4 Possible Modern Concepts to Determine Lighting Areas or Distances between Lighting Functions** 369
Karl Manz, Karsten Klinger, Dieter Kooß, Institute of Lighting Technology, University of Karlsruhe

A12 Interior

- A12.1 Learning from architectural lighting for automotive interior lighting** 371
Thomas Schielke
- A12.2 Stage Lighting for Automotive Interiors** 376
Herbert Wambsganß, Hella Innenleuchten-Systeme GmbH

Presentation Session B

B1 Simulation

- B1.1 Advanced Performance created by Computer Aided Lighting Systems** 379
Detlef Decker, Thomas Weber, Hella KGaA, Germany
- B1.2 Validation and verification of advanced front-lighting systems with an interactive headlight simulator** 387
F. Panerai, V Rouelle, H Moellebi, A. Kemeny, K. Fadel

Index

- B1.3 Thermal Analysis of Head Lamps and Rear Lamps** 388
Josef Dollhofer, Stéphane Mercier, Christian Karwat
- B1.4 Daylight simulation for the evaluation of rear lamps** 396
A. Kaltenbach, BMW Group, Germany
- B2 Physiology**
- B2.1 A mesopic experiment series at automotive visual conditions** 402
Nils Haferkemper, Anja Frohnapfel, Galina Paramei, Tran Quoc Khanh
- B2.2 Study on Glare of LED Lamp and Individual Variations of Brightness Perception** 410
Takako Kimura-Minoda, Shinichi Kojima, Yudai Fujita, Miyoshi Ayama
- B2.3 Analysis of eye movement characteristics at different laminated retro-reflective traffic signs** 418
Michael Gatscha, Günther Schreder, Sandra Reichenauer
- B2.4 Luminance as a criterion for the evaluation of discomfort and disability glare of headlamps** 427
Sabine Raphael, Carsten Seyring, Alexander Wernicke, Stephan Völker
- B2.5 Effect of Low-beam Pattern on Peripheral Visibility under Nighttime Driving Condition in China** 434
Wencheng Chen, Yandan Lin, Dahua Chen, Shinichi Kojima
- B2.6 Visual aging: Older observers are disadvantaged at night driving** 443
Galina V. Paramei, Tran Quoc Khanh, Technische Universität Darmstadt, Germany

Index

Poster Presentations

P1 AFS / Driver Assistance

- P1.1 Improving Detection Distances by an Adaptive Cut-Off Line System** 451
Michael Böhm, Franziska Kley, Simone Kalthoff, L-LAB, Germany
- P1.2 High Dynamic Headlamp System based on a Segmented Shutter** 458
Sebastian Mojzisch, Steffen Strauß, L-LAB, Germany
- P1.3 Next Generation Xenon Lighting with New Features Like Motorway Light and Mercury Free Compliance** 465
Olivier Barhomeuf, Valeo Lighting Systems
- P1.4 Light has to go where it is needed: Future Light Based Driver Assistance Systems** 473
Thomas Kønning, Christian Amsel, Ingo Hoffmann
- P1.5 How to make an AFS system predictive? - ADASIS interface implementation** 482
Christoph Schmidt, Exterior Lighting, VISTEON Deutschland GmbH
- P1.6 Smart Sensor of Illumination and Light Transmission** 485
Vlastimil Sedlacek, Vladimir Petrovsky, Visteon-Autopal, Czech Republic

P2 HMI

- P2.1 Performance Analysis of the Virtual Image from automotive HeadUp-Displays (HUD)** 491
Matthias Brinkmann, Ralf Mayer
- P2.2 Illumination of display backlights in instrument cluster** 499
Eckhard Finger, Siemens VDO Automotive AG

Index

P3 LED / OLED

- P3.1 LEDs and OLEDs for Automotive Interior Applications** 503
Klaus Nachtigall, Hella Innenleuchten-Systeme GmbH
- P3.2 A “Symbiotic Optics” Low-Beam LED headlamp design** 510
Emil Stefanov, Schefenacker Vision Systems Germany GmbH
- P3.3 Exterior and Interior Light Sources based on Chip on Board Technology** 519
C. Hochfilzer, Tridonic Atco Optoelectronics GmbH, Germany
- P3.4 Electrical Architecture of LED headlamps** 520
Markus Klein, Visteon
- P3.5 Developing an efficient thermal management in LED-Headlamps by virtue testing and simulation** 524
Frank Barthel, Schefenacker Vision Systems Germany GmbH
- P3.6 Investigation of an active liquid cooling system for an LED headlamp** 532
Dagmar Würtenberger, Frank Barthel, Jörg Kuhn, Frank Tebbe, Robert Apfelbeck, Nicolas Cordero, Yan Lai
- P3.7 Automotive LED Driver Module – Requirements and Concept Design** 541
Qiang Cao, Technical Fellow, Visteon Deutschland GmbH
- P3.8 OLEDs for Automotive Lighting** 550
Malte Hagemann, Matthias Brinkmann, Klaus Bonrad, Frank Voges, Torsten Ruths, Maik Bluhm, Dirk Michaelis, Christoph Wächter, Sergey Kudaev, Stefan Sinzinger
- P3.9 OLED Technology in Automotive Applications** 558
Albrecht Kraus, Nils Benter (Philips Lighting), Herbert Börner (Philips Research)
- P4 Light Sources**
- P4.1 HID-Front Lighting Performance with D3 / D4 bulbs** 567
Heike Fröhlich, Benjamin Stauss, Mark Vehse

Index

- P4.2 Ultra-bright single-emitter near infrared diode lasers** 573
Toby Strite, Victor Rossin, Matthew Peters, Franck Leibreich,
Erik Zucker
- P5 Marketing**
- P5.1 Evaluation of light of LED headlamps by end customers** 577
Anja Isenbort, Stefanie Kleinschmidt, Johanna Stahl, Jürgen
Locher
- P5.2 Reducing system cost in LED-based Stop/Tail RCL
applications with resistor drive LED systems** 582
Ryan Wellman, Philips Lumileds Lighting Company
- P5.3 Consumer Expectations for Advanced Lighting
Technologies** 583
Izumi Sakai, Valeo Lighting Systems
- P6 Measurement**
- P6.1 Spectroradiometric Measurements Of Pulsed High Power
Leds** 592
Thomas Nägele, Instrument Systems GmbH
- P6.2 Testing headlamps' beam patterns using computerized
device with photometric image** 598
Tomasz Targosinski
- P6.3 System for Night Video Acquisition and Synchronisation** 606
C. Elvira, F. Dorca, SEAT Technical Centre; J.-M. Álvarez,
Universitat Autònoma de Bellaterra
- P6.4 Properties and Applications of Stable LED Light Sources in
Automotive Measurements** 614
Robert Burdick, Udo Krüger, Franz Schmidt, János Schanda
- P6.5 The temperature-dependent changes of the photometrical
and colorimetrical parameters of today high power LEDs** 622
Andreas Groh, Stefan Brückner, Tran Quoc Khanh

Index

- P6.6 Methods and techniques for the absolute and accurate determination of the luminous efficiency of today high power LEDs** 630
Carsten Singer, Stefan Brückner and Tran Quoc Khanh,
Technische Universität Darmstadt, Germany
- P7 Optical Design**
- P7.1 Glare and Stray-light Challenges: Destroying Light in the Headlamp** 637
Burghard von Blanckenhagen, Automotive Lighting Reutlingen GmbH
- P7.2 Light Guide Technology in Head Lamps and Rear Lamps – Challenge for Material and Simulation Tools** 644
Matthias Gebauer, Michael Hamm; Automotive Lighting Reutlingen GmbH
- P7.3 Improved Methods in Building Prototypes of Head and Rear Lights for Automotive** 653
Klaus Schröder, Josef Hofmann Modell- und Leuchtentechnik, Ingolstadt, Germany
- P7.4 How Ellipsoid Headlamps can profit from Thin Optical Coatings** 661
Henning Hogrefe, Automotive Lighting Reutlingen, Germany
- P7.5 Uniform Multipurpose System of Automatic Control of Lighting and Signalling for Motorcycles** 669
Leonid Novakovskiy, Yulia Korolyova, Vyacheslav Konyukhov (Faros-Alef, Russia), Jean-Pierre Mirac (Sclaer, Germany)
- P7.6 Optical Design of LED-Lamps for Automotive Applications** 677
André Domhardt, Udo Rohlfing, Karsten Klinger, Karl Manz, Dieter Kooß, Uli Lemmer
- P7.7 The phantom light effects in modern car rear light combinations** 685
Norbert Hahn, Karsten Klinger, Karl Manz, Uli Lemmer, University of Karlsruhe, Germany
- P7.8 Computer Designed Signal Light giving Visible Messages** 693
Christian Buchberger, Steffen Wiersdorff, and Marc Schirmer, Automotive Lighting Reutlingen GmbH

Index

P8 Physiology

- P8.1 Disability glare of Halogen, Xenon and LED headlamp systems** 700
Jürgen Locher, Anja Isenbort, Sabrina Schmidt, Franziska Kley
- P8.2 Measurement and calculation of detection distances of headlamp light distributions** 707
Dirk Kliebisch, Stephan Völker
- P8.3 Recovery Time From Glare And Contributing Factors Determined Using A Screening Instrument In Vehicle Drivers** 715
C Sánchez Ramos, F Daza, MI Moral Martínez, MS Casas-Builla Olalla, MJ Perez-Carrasco
- P8.4 The analytical and experimental study of the effects of pulsedwidth-modulated light sources on visual perception** 724
Alexander Wernicke, Steffen Strauß
- P8.5 Improved Pedestrian Visibility Potential With Modified Headlamp Left-side Light Distribution** 733
Walter J. Kosmatka, Consultant LMT- Berlin

P9 Applied Photometry

- P9.1 Photometric Experience and Methods for AFS Homologation ECE R123** 742
Ralf Steinhart, Markus Kratzer, Automotive Lighting Reutlingen GmbH
- P9.2 Correlation of laser based mobile retroreflectometer pavement marking measurements to portable instruments complying with ASTM Standard Test Method E1710-05** 748
Richard L. Austin, Gamma Scientific
- P9.3 Comparison of measured and standard r-tables, and impact on road lighting** 749
Cyril Chain, Eric Dumont, Gilles Legoueix, Fabrice Lopez, Jean-Luc Paumier, Paul Verny

Index

Written Contributions

C1 AFS / Driver Assistance

- C1.1 Benchmarking of Headlamp Levelling Systems based on a Mobile Camera Measurement Unit with Objective Assessment Algorithms** 757
Markus Pollert, Dietmar Baum, Dieter Strychik, Hella KGaA Hueck & Co.
- C1.2 Analysis of foreground lighting of a motor vehicle by means of fog, low beam and main light projectors in difficult atmospheric conditions** 765
Piotr Tomczuk, Warsaw University of Technology, Transport Department
- C1.3 SmartBeam – a High-Beam Assist** 774
Carsten Schaudel, Gentex GmbH; Dave Falb, Gentex Corporation
- C1.4 Combined Application of Analogue and Digital Modules in Automotive Instrumentation** 783
Alf Burau, Siemens VDO Automotive AG

C2 Headlamp

- C2.1 Systematic of the active headlamp design** 790
Rainer Kauschke, Hella KGaA, Germany
- C2.2 Improvements in Headlights with Optical Fibre Image Converter** 794
Leonid Novakovskiy, Yulia Korolyova, (Faros-Alef, Russia), Jean-Pierre Miras (Sclaer, Germany)

C3 LED

- C3.1 From “Manufacturing” to “full service providing” in the challenging automotive supply chain of LED applications** 802
Guido Perrelet MSc ETH, CTO

Index

C4 Measurement

- C4.1 Spatially Resolved Measurement of Interior and Ambient Light in the Automotive Environment** 810
Udo Krüger, Franz Schmidt, TechnoTeam Bildverarbeitung GmbH, Germany
- C4.2 REFLET Scatterometer for 3D scattered light measurements to improve design and simulations in the automotive industry** 818
Audrey Le Lay, Light Tec
- C4.3 Analysis Method and own Estimate Criterion of Lighting Parameters in Car Lighting Systems** 820
Janusz Waldemar Mazur, Marcin Chrzanowicz
- C4.4 Fast headlamp measurement using luminance measurement technique** 829
Chr. Schwanengel, TechnoTeam BV GmbH, Germany

C5 Optics

- C5.1 Design of an optical concept for using a DMD in an active headlamp** 837
Alexander Günther
- C5.2 Collimator Optics and Light Pipes made of Makrolon** 842
Gesa Dern, Martin Döbler, Rainer Protte, Doug Stratton, and Olaf Zöllner, Bayer MaterialScience, Leverkusen, Germany;
Ruben Mohedano, Oliver Dross, Pablo Benitez, Light Prescription Innovators (LPI), Madrid, Spain

C6 Physiology

- C6.1 Measurement of driver workload – Continuous blood pressure registration as an evaluation method** 843
Cord Bauch, Regina Sprenger, Lena Geiger, Vivien Günther, Dieter Barschdorff, L-LAB, University of Paderborn, Germany
- C6.2 A Field Approach for Assessing Discomfort Glare from Automobile Headlamps** 850
Michael Böhm, Jürgen Locher, L-LAB, Germany

Index

- C6.3 Experimental Study on Filtered Light Effects on the Retina and its Application for Car Windows** 857
C Sánchez Ramos, JA Vega, FJ Ochoa-Erena, MI Moral Martínez, A Álvarez Valbuena, A Langa Moraga
- C6.4 On-road testing of retro-reflective advertisement on the rear surface of heavy and long vehicles and their trailers – Progress Report** 865
Helmut Frank
- C6.5 Influence of advertisements on the driver's behavior in the road traffic scene** 868
Carmen Kettwich, Karsten Klinger, Uli Lemmer
- C7 Rear Lights**
- C7.1 Prevention of Rear/Front End Vehicle Collisions** 873
A comparison of optical with sensor-based and cooperative deceleration signalling principles in manual and automatic cruise control systems
Johann Georg FRIEDRICH
- C7.2 Function follows Styling:** 881
LED Rear Lamps for Strong Curvatures
Götz Merkle, Veit Schwegler, Schefenacker Vision Systems Germany GmbH
- C7.3 Concept of light-signal provision for safety of braking, deceleration and inadvertent stops of a vehicle** 890
Frolov Valery Nikolaevich, Military Institute of Engineer Troops
- C8 Signalling**
- C8.1 Side-marker integrated into tail lamps: Design solutions and limitations** 891
Rainer Bottesch, Veit Schwegler, Schefenacker Vision Systems Germany GmbH
- C8.2 Using “unused light” for enlarged signal images** 898
Norbert Moeller, Automotive Lighting Reutlingen GmbH

Index

C9	Simulation	
C9.1	Next-Generation Simulation Software for optimising LED-based Headlamps and Rearlamps	905
	Jaques-Andre Audrey, Günther Hasna, Optis	
C9.2	Simulation of light distribution and lit appearance – analysis via density estimation	906
	Sebastian Haering, Volkswagen AG, Germany	
C9.3	Simulation and Measurement of Photometry in Headlamps and Tail Lamps: an analysis of selected aspects	915
	Henning Kiel, Volkswagen AG
