

Plant Design and Economics for Chemical Engineers

Fifth Edition

Max S. Peters

Klaus D. Timmerhaus

Ronald E. West

CONTENTS

Preface	xv
Prologue	xix

CHAPTER 1

Introduction 1

Chemical Engineering Plant Design	1
General Overall Design Considerations	2
<i>Process Design Development</i>	2
<i>Flowsheet Development</i>	5
<i>Computer-Aided Design</i>	6
<i>Cost Estimation</i>	6
<i>Profitability Analysis of Investments</i>	7
<i>Optimum Design</i>	8
Practical Considerations in Design	11
<i>The Design Approach</i>	12
Engineering Ethics in Design	13

CHAPTER 2

General Design Considerations 15

Health and Safety Hazards	15
<i>Sources of Exposure</i>	16
<i>Exposure Evaluation</i>	18
<i>Control of Exposure Hazards</i>	20
<i>Fire and Explosion Hazards</i>	22
<i>Personnel Safety</i>	27
<i>Safety Regulations</i>	27
Loss Prevention	29
<i>HAZOP Study</i>	29
<i>Fault-tree Analysis</i>	35
<i>Failure Mode and Effect Analysis</i>	36
<i>Safety Indexes</i>	36
<i>Safety Audits</i>	36
Environmental Protection	40
<i>Environmental Regulations</i>	41

<i>Development of a Pollution Control System</i>	42
<i>Air Pollution Abatement</i>	42
<i>Water Pollution Abatement</i>	47
<i>Solid Waste Disposal</i>	50
<i>Thermal Pollution Control</i>	51
<i>Noise Control</i>	52

Plant Location	52
<i>Factors Involved</i>	53
<i>Selection of the Plant Site</i>	56

Plant Layout	56
<i>Preparation of the Layout</i>	57

Plant Operation and Control	57
<i>Instrumentation</i>	57
<i>Maintenance</i>	58
<i>Utilities</i>	59
<i>Structural Design</i>	60
<i>Storage</i>	60
<i>Materials Handling</i>	61

Patent Considerations	62
-----------------------	----

Problems	62
----------	----

CHAPTER 3

Process Design Development 67

Development of Design Database	67
--------------------------------	----

<i>Literature Survey</i>	68
<i>Patent Search</i>	69

Process Creation	69
------------------	----

<i>Batch Versus Continuous Operation</i>	70
<i>Raw Materials and Product Specifications</i>	70
<i>Process Synthesis Steps</i>	71

Process Design	72
----------------	----

<i>Types of Process Designs</i>	74
---------------------------------	----

Process Flow Diagrams	77
-----------------------	----

Piping and Instrumentation Diagrams	79
-------------------------------------	----

Vessel and Piping Layout Isometrics	80	Process Flowsheet	149
Equipment Design and Specifications	81	<i>Reactors</i>	149
<i>Scale-up of Equipment in Design</i>	81	<i>Mass and Energy Balances</i>	149
<i>Safety Factors</i>	81	<i>Separation Trains</i>	149
<i>Equipment Specifications</i>	84	<i>Heat Exchange</i>	150
<i>Materials of Construction</i>	86	Algorithmic Flowsheet Generation	158
The Preliminary Design—A Specific Example	87	<i>Fundamentals of Algorithmic Process-Network</i>	
<i>Problem Statement</i>	87	<i>Synthesis</i>	159
<i>Literature Survey</i>	87	<i>Application of Algorithmic Process-Network</i>	
<i>Process Creation</i>	88	<i>Synthesis</i>	165
<i>Development of Conventional Base-Case Design</i>	90	Comparison of Hierarchical and	
<i>Economic Assessment of Base-Case Design</i>	110	Algorithmic Results	189
<i>Assessment of Proposed Base-Case Design</i>		Genetic Algorithms	189
<i>Modification</i>	113	Future Approaches to Flowsheet Synthesis	
Summary	120	and Development	190
Problems	121	Software Use in Flowsheet Synthesis	190
CHAPTER 4		Analysis and Evaluation of Flowsheets	190
Flowsheet Synthesis and		<i>Criteria for Evaluating Designs</i>	190
Development	125	Summary	192
Flowsheet Synthesis and Development	126	Nomenclature	192
<i>General Procedure</i>	126	<i>Greek Symbol</i>	193
Process Information	130	Problems	193
<i>Background Information</i>	130	CHAPTER 5	
<i>Molecular Path Synthesis</i>	131	Software Use in Process	
<i>Selecting a Process Pathway</i>	132	Design	196
<i>Production Mode</i>	132	Software Structure	198
<i>Recording Decisions</i>	133	<i>Chemical Property Estimation</i>	198
Input/Output Structure	135	<i>Process Equipment Models</i>	201
Functions Diagram	137	<i>Process Equipment Cost Estimation</i>	202
<i>Preprocessing</i>	138	<i>Process Economic Evaluation</i>	203
<i>Reactions</i>	139	<i>Heat Integration</i>	203
<i>Recycle</i>	139	<i>Process Control</i>	203
<i>By-products, Intermediates, and Wastes</i>	139	<i>Process Optimization</i>	204
<i>Separations</i>	140	Software Capabilities	204
Operations Diagram	143	<i>General-Type Software</i>	205
<i>Preprocessing</i>	143	Software for Process Design	208
<i>Reactors</i>	143	<i>Molecular Reaction Databases and Simulators</i>	208
<i>Separations Methods</i>	144	<i>Chemical Cost Databases</i>	209
<i>Heating and Cooling</i>	145	<i>Flowsheeting Software</i>	209
<i>Minimization of Processing</i>	145	<i>Unit Operations Simulators</i>	211

- Piping System Design 214
 - Plant Layout 214
 - Economic Evaluation 215
 - Software Selection 216
 - Software Use 216
 - Physical Property Estimation Guidelines 217
 - Process Simulation Guidelines 217
 - Avoiding Pitfalls in Software Use 220
 - Graphic Interface and Ease of Use 221
 - Thermodynamic Property Packages 222
 - Simulation Realism 222
 - Evaluation of Software Results 224
- CHAPTER 6**
- Analysis of Cost Estimation 226**
- Cash Flow for Industrial Operations 226
 - Cash Flow 226
 - Cumulative Cash Position 228
 - Factors Affecting Investment and Production Costs 230
 - Sources of Equipment 230
 - Price Fluctuations 230
 - Company Policies 230
 - Operating Time and Rate of Production 231
 - Government Policies 232
 - Capital Investment 232
 - Fixed-Capital Investment 233
 - Working Capital 233
 - Estimation of Capital Investment 233
 - Types of Capital Cost Estimates 235
 - Cost Indexes 236
 - Cost Components in Capital Investment 239
 - Purchased Equipment 241
 - Estimating Equipment Costs by Scaling 242
 - Purchased-Equipment Delivery 244
 - Purchased-Equipment Installation 244
 - Instrumentation and Controls 245
 - Piping 245
 - Electrical Systems 246
 - Buildings 246
 - Yard Improvements 246
 - Service Facilities 246
 - Health, Safety, and Environmental Functions 247
 - Land 248
 - Engineering and Supervision 248
 - Legal Expenses 248
 - Construction Expenses 248
 - Contractor's Fee 249
 - Contingencies 249
- Methods for Estimating Capital Investment 249
- Estimation of Revenue 258
- Estimation of Total Product Cost 259
 - Manufacturing Costs 262
 - Variable Production Costs 262
 - Plant Overhead Costs 270
 - General Expenses 270
- Gross Profit, Net Profit, and Cash Flow 271
- Contingencies 272
- Summary 272
- Nomenclature 274
 - Greek Symbol 275
- Problems 275
- CHAPTER 7**
- Interest, Time Value of Money, Taxes, and Fixed Charges 279**
- Interest 279
 - Simple Interest 280
 - Compound Interest 280
 - Nominal and Effective Interest Rates 281
 - Continuous Interest 283
 - Cost of Capital 285
 - Income Tax Effects 286
 - Loan Payments 287
 - Time Value of Money 290
 - Cash Flow Patterns 292
 - Discrete Cash Flows 292
 - Continuous Cash Flows 294
 - Compounding and Discounting Factors 297

Income Taxes	303	Replacements	348
<i>Federal Income Taxes</i>	304	<i>Methods of Profitability Evaluation for Replacements</i>	349
<i>Taxable Income</i>	304	<i>Typical Example of Replacement Policy</i>	349
<i>Capital Gains Tax</i>	305	<i>Book Values and Unamortized Values</i>	350
<i>Losses</i>	306	<i>Investment on Which the Replacement Comparison Is Based</i>	350
<i>Other Federal Taxes</i>	306	Practical Factors in Alternative-Investment and Replacement Analysis	352
<i>State Taxes</i>	306	Nomenclature	352
<i>Nonincome Taxes</i>	306	<i>Greek Symbol</i>	353
Fixed Charges	307	Problems	353
<i>Depreciation</i>	307	CHAPTER 9	
<i>Depreciation and Income Tax</i>	308	Optimum Design and Design Strategy	358
<i>Depreciable Investments</i>	309	Defining the Optimization Problem	359
<i>Current Value</i>	309	Selecting an Objective Function	361
<i>Salvage Value</i>	309	<i>Structural Optimization</i>	361
<i>Recovery Period</i>	309	<i>Parametric Optimization</i>	362
<i>Methods for Calculating Depreciation</i>	310	<i>Variable Screening and Selection</i>	363
<i>Insurance</i>	313	Suboptimization	363
<i>Self-insurance</i>	314	<i>Practical and Intangible Considerations</i>	364
Nomenclature	315	Programming Optimization Problems	364
<i>Greek Symbol</i>	316	<i>Linear Programming</i>	367
Problems	316	<i>Generalization of Strategy for Linear Programming</i>	370
CHAPTER 8		<i>Simultaneous Equations</i>	372
Profitability, Alternative Investments, and Replacements	319	<i>Nonlinear Programming</i>	373
Profitability Standards	320	<i>Dynamic Programming</i>	377
<i>Cost of Capital</i>	320	Optimization Solution Methodologies	379
<i>Minimum Acceptable Rate of Return</i>	321	<i>Procedure with One Variable</i>	380
Methods for Calculating Profitability	322	<i>Procedure with Two or More Variables</i>	381
<i>Methods That Do Not Consider the Time Value of Money</i>	322	<i>Breakeven Chart for Optimum Analysis of Production</i>	384
<i>Methods That Consider the Time Value of Money</i>	327	<i>Experimental Design and Analysis of Process Simulations</i>	384
<i>Selecting a Profitability Method</i>	330	<i>Algorithm Solutions to Optimization Problems</i>	386
<i>Effect of Inflation on Profitability Analysis</i>	335	Optimization Applications	390
<i>Start-up Costs</i>	340	<i>Optimization Application: Optimum Production Rates in Plant Operation</i>	390
<i>Spreadsheet for Economic Evaluation Calculations</i>	340	<i>Optimization Application: Cyclic Operations</i>	394
Alternative Investments	340		
<i>Alternatives When an Investment Must Be Made</i>	342		
<i>Analysis with Small Investment Increments</i>	346		

Optimization Application: Economic Pipe

Diameter 401

Optimization Application: Cooling Water

Flow Rate 406

Optimization Application: Distillation

Reflux Ratio 409

Optimization Application: Pinch Technology

Analysis 414

Nomenclature 433

Greek Symbols 435

Problems 435

CHAPTER 10

Materials and Fabrication Selection 440

Factors Contributing to Corrosion 440

Combating Corrosion 443

Properties of Materials 444

Ferrous Metals and Alloys 444

Nonferrous Metals and Alloys 450

Inorganic Nonmetals 451

Organic Nonmetals 452

Low- and High-Temperature Materials 455

Gasket Materials 457

Tabulated Data for Selecting Materials of Construction 457

Selection of Materials 457

Economics Involved in Selection 464

Fabrication of Equipment 465

Methods of Fabrication 466

Problems 467

CHAPTER 11

Written and Oral Design Reports 469

Written Reports 470

Organization of a Written Report 470

Preparing the Report 473

Presenting the Results 474

Comments on Common Errors 480

Checklist for the Final Report 481

Oral Reports 481

Organization and Presentation of an Oral Design Report 482

Problems 484

CHAPTER 12

Materials-Handling Equipment—Design and Costs 485

Basic Concepts of Fluid Transport 485

Newtonian Fluids 486

Non-Newtonian and Bingham Fluids 488

Vacuum Flow 489

Frictional Losses Encountered in

Pipelines 491

Power Requirements for Transport of Liquids and Gases 492

Piping in Fluid Transport Processes 497

Selection of Piping Materials 497

Design of Piping Systems 499

Costs for Piping and Piping System Auxiliaries 502

Pumping of Fluids 508

Selection of Pumps 508

Design Procedures for Pumps 515

Costs for Pumps and Motors 516

Compression and Expansion of Fluids 520

Selection of Compressors 520

Selection of Fans and Blowers 523

Selection of Vacuum System Equipment 524

Selection of Turbines, Expanders, and Other Drivers 525

Design Procedures for Compressors 527

Design Procedures for Turbines and Expanders 529

Costs for Compressors, Fans, Blowers, and Expanders 531

Agitation and Mixing of Fluids 536

Selection of Agitators and Mixers 536

Design Procedures for Agitators and Mixers 539

Costs for Agitators and Mixers 544

Flow Measurement of Fluids 549

- Storage and Containment of Fluids 552
 - Design Procedures for Pressure Vessels* 553
 - Costs for Tanks, Pressure Vessels, and Storage Equipment* 553

- Transport of Solids 560
 - Selection of Solids Transport Equipment* 561
 - General Design Procedures for Solids Transport Equipment* 565
 - Costs for Solids Transport Equipment* 572

- Handling of Solids 572
 - Selection of Solids-Handling Equipment* 577
 - General Design Procedures for Solids-Handling Equipment* 580
 - Costs for Solids-Handling Equipment* 582

- Nomenclature 587
 - Greek Symbols* 589

- Problems 589

CHAPTER 13

Reactor Equipment—Design and Costs 592

- Reactor Principles 594
 - Reactor Types* 596
 - Space Velocity and Space Time* 597
 - Batch Reactors* 597
 - Tubular Plug-Flow Reactors* 598
 - Back-Mix Reactors* 599
 - Nonideality of Reactors* 599
 - Accounting for Reactor Nonideality* 600
 - Residence Time Distribution* 600
 - Nonideal Reactor Emulation Using Ideal Reactor Combinations* 601
 - Recycle Reactors* 602
- Development of Chemical Reaction Rate Expressions 605
 - Types of Reactions* 606
- Reaction and Reactor Performance 613
 - Parallel Reactions* 613
 - Series Reactions* 614
 - Systems of Identical Multiple Reactors* 614

- Reactor and Catalyst Equipment 616
 - Selection of Catalyst* 616
 - Types of Reactors* 617
 - Selection of Reactors* 621
 - Design of Reactor Systems* 622
 - Reactor Design Procedure* 626
 - Software* 626
 - Costs for Reactor Equipment* 627

- Summary 634

- Nomenclature 635
 - Greek Symbols* 636

- Problems 637

CHAPTER 14

Heat-Transfer Equipment—Design and Costs 642

- Basic Theory of Heat Transfer in Exchangers 643
 - Steady-State Heat-Transfer Considerations* 644
 - Alternative Approaches to Heat Exchanger Performance* 652
- Determination of Heat-Transfer Coefficients 656
 - Film Coefficients for Fluids Flowing Inside of Pipes and Tubes (No Phase Change)* 657
 - Film Coefficients for Fluids Flowing Outside of Pipes and Tubes (No Phase Change)* 659
 - Film Coefficients and Overall Coefficients for Various Heat-Transfer Situations* 661
- Determination of Pressure Drop in Heat Exchangers 664
 - Tube-Side Pressure Drop* 664
 - Shell-Side Pressure Drop* 665
- Selection of Heat Exchanger Type 669
 - Key Heat Exchanger Types Available* 670
 - Preliminary Selection of Heat Exchanger Types* 676
 - Costs of Heat Exchangers* 676
- Design of Key Heat Exchanger Types 694
 - Double-Pipe and Multiple Double-Pipe Exchangers* 696
 - Shell-and-Tube Exchangers* 702

- Plate Exchangers* 724
Compact Exchangers 729
Air-Cooled Exchangers 733
Condensers 734
Evaporators 737
 Optimum Design of Heat Exchangers 738
 General Case 739
 General Methods for Design of Heat Exchangers 744
 Nomenclature 745
 Greek Symbols 748
 Problems 749
- CHAPTER 15**
- Separation Equipment—Design and Costs** 754
- Selection of Suitable Separation Processes 755
 Guidelines for the Separation Process Selection 757
 Equipment Design and Costs for Separating Homogeneous Mixtures 769
 Separation by Distillation 769
 Distillation Design Procedures for Columns with Sieve Trays 769
 Distillation Design Procedures for Columns with Random Packing 783
 Distillation Design Procedures for Columns with Structured Packing 787
 Rating of Distillation Equipment 788
 Rigorous Design Methods for Multicomponent Distillation 788
 Design Procedures for Other Distillation Processes 789
 Equipment Costs for Tray and Packed Columns 792
 Separation by Absorption and Stripping 797
 Design Procedures for Trayed Columns Separating Dilute Solutes 799
 Design Procedures for Packed Columns Separating Dilute Solutes 802
 Design Procedures for Packed Columns Separating Concentrated Solutes 803
 Separation by Extraction 804
 Equipment Selection for Liquid/Liquid Extraction 804
 Design Procedures for Liquid/Liquid Extraction 806
 Equipment Costs for Liquid/Liquid Extraction 814
 Separation Using Membranes 814
 Selection of Membrane Types 814
 General Design Concepts for Membrane Separation 815
 General Design Procedures for Membrane Separation 820
 Range of Costs for Several Membrane Systems 824
 Separation by Adsorption 824
 Selection of Sorbent for Separation by Adsorption 825
 Basic Adsorption Cycles 827
 Selection of Appropriate Adsorption Cycle 829
 General Design Concepts for Separation by Adsorption 830
 Costs for Adsorption Equipment 837
 Equipment Design and Costs for Separating Heterogeneous Mixtures 837
 Separation by Drying 839
 Equipment Selection for Drying Solids 839
 General Design Procedures for Drying 842
 Costs for Typical Dryers 845
 Separation by Filtration 851
 Selection of Filtration Equipment 851
 General Design Procedures for Separation by Filtration 854
 Costs for Filtration and Other Solids Separation Equipment 863
 Nomenclature 869
 Greek Symbols 872
 Problems 873

APPENDIX A:
**The International System (SI) of
 Units 877**

APPENDIX B:
**Auxiliary, Utility, and
 Instrumentation Cost Data 890**

APPENDIX C:
Design Problems 899

APPENDIX D:
**Tables of Physical Properties and
 Constants 947**

APPENDIX E:
**Heuristics for Process Equipment
 Design 966**

APPENDIX F:
Software Useful for Design 974

Author Index 976
