

ELECTRIC POWER COMPONENTS and SYSTEMS

Volume 36, Number 8
2008

Contents

- Differential Evolution Algorithm for Solving Unit Commitment with Ramp Constraints
S. Patra, S. K. Goswami, and B. Goswami 771
- Application of Hybrid Multiagent-based Particle Swarm Optimization to Optimal Reactive Power Dispatch
A. Shunmugalatha and S. Mary Raja Slochanal 788
- Parameter Estimation of Induction Machines from Nameplate Data Using Particle Swarm Optimization and Genetic Algorithm Techniques
Mohamed A. Awadallah 801
- A Modified Reference Approach for Harmonic Elimination in Pulse-width Modulation Inverter Suitable for Distributed Generations
R. N. Ray, D. Chatterjee, and S. K. Goswami 815
- Differential Evolution-based Dynamic Economic Dispatch of Generating Units with Valve-point Effects
R. Balamurugan and S. Subramanian 828
- Comparison of Practical Unit Commitment Problem Solutions
I. Jacob Raglend and Narayana Prasad Padhy 844
- Design of a New Market Structure and Robust Controller for the Frequency Regulation Service in the Deregulated Power System
A. Peer Fathima and M. Abdullah Khan 864
