

MEASUREMENT TECHNIQUES

A translation of *Izmeritel'naya Tekhnika and Metrologiya*

Volume 51, Number 1

January, 2008

CONTENTS

FUNDAMENTAL PROBLEMS IN METROLOGY

- Resonant Gravitational Antennas: Zero-Point Fluctuations of an Evacuated Optomechanical Converter Containing an Absorbing Mirror – A. V. Gusev 1

GENERAL PROBLEMS OF METROLOGY AND MEASUREMENT TECHNIQUE

- Effects of Chaotic Dynamic-System Behavior on Measurement Uncertainty – Yu. P. Machekhin 6
- Contour Evaluation of Truncated Distributions in Measurement – S. F. Levin and S. S. Levin 11
- Design Methods and Basic Characteristics for Molecular Electronic Transducers – A. I. Zhelonkin 16

LINEAR AND ANGULAR MEASUREMENTS

- Laser Dynamic Goniometer Measurement Algorithms – P. A. Pavlov 22
- Determining the Operating Conditions of Floating Marine Platforms Based on the Predicted Motion Control under Conditions of Wind and Wave Disturbances – Ch. M. Gadzhiev 28

OPTOPHYSICAL MEASUREMENTS

- Influence of Laser Parameters on the Geometric Characteristics of a Beam Transformed by an Optical System – A. L. Borychev 34
- Fiber Optic Fluorometer with Dipping Module – Yu. N. Kul'chin, S. S. Voznesenskii, E. L. Gamayunov, A. S. Gurin, A. A. Korotenko, A. Yu. Mayor, and O. A. Bukin 40

TIME AND FREQUENCY MEASUREMENTS

- Definition of the Initial State of a Stabilization System for Frequency and Time Signals for a Reference GLONASS/GPS Synchronized Receiver – A. V. Nikitin 44

MECHANICAL MEASUREMENTS

- Reference Instruments Based on Industrial Pressure Sensors – A. V. Kryukov and V. M. Okladnikov 47
- Use of Hybrid Vibrations for Measuring the Amount of Liquid in Tanks with Mobile Displacers – V. Ya. Fateev, B. V. Lunkin, and A. P. Datsko 51
- Control of Torsional Strains of Beams by Means of Inductance Transducers – N. N. Gubanov and Yu. B. Koverkin 58

RADIO MEASUREMENTS

- The Fields and Currents of a Thin Biconical Antenna. The Parameters of a Radiating Antenna – V. A. Tishchenko, V. I. Tokatly, and V. I. Luk'yanov 67

CONTENTS

(continued)

A Frequency Converter with Controllable Characteristics – A. V. Nikonov and G. V. Nikonova	74
The Subsonic Band in Computer Systems Based on a Sound Card – O. Ya. Shmelev	82
ACOUSTIC MEASUREMENTS	
The Use of Laser Interference Methods for Acoustic Field Diagnostics – V. T. Nguen, I. L. Raskovskaya, and B. S. Rinkevichyus	86
PHYSICOCHEMICAL MEASUREMENTS	
A Discrete-Geometrical Method of Measuring the Specific Surface of Powders of Superhard Materials – G. A. Petasyuk	94
Identification of the Transmitting Channel of the Measuring System of a Laboratory Analyzer Based on a Touch Sensor – A. A. Kuznetsova, L. D. Zagrebin, and V. G. Sergeev	102
THE METROLOGICAL SERVICE	
Metrological Provision for Image Analyzers – V. G. Pantelev, V. A. Slaev, and A. G. Chunovkina	107

Measurement Techniques is abstracted or indexed in Chemical Abstracts, Current Contents/Engineering, Computing and Technology, INSPEC Information Services, The ISI Alerting Services, Science Citation Index, Science Citation Index Expanded, SCOPUS.
