

Water Science and Technology

Volume 57, Number 3

Contents

- iii Editorial
- 305 Nanomaterials as possible contaminants: the fullerene example
M. R. Wiesner, E. M. Hotze, J. A. Brant and B. Espinasse
- 311 Initial examination of microwave pretreatment on primary, secondary and mixed sludges before and after anaerobic digestion
C. Eskicioglu, K. J. Kennedy and R. L. Droste
- 319 Optimal sludge retention time for a bench scale MBR treating municipal sewage
A. Pollice, G. Laera, D. Saturno, C. Giordano and R. Sandulli
- 323 Development and optimisation of VFA driven DEAMOX process for treatment of strong nitrogenous anaerobic effluents
S. V. Kalyuzhnyi, M. A. Gladchenko, Ho Kang, A. Mulder and A. Versprille
- 329 The role of sludge conditioning and dewatering in the fate of nonylphenol in sludge-amended soils
V. N. Kouloumbos, A. Schäffer and P. F.-X. Corvini
- 337 Adding realism to simulated sensors and actuators
C. Rosen, L. Rieger, U. Jeppsson and P. A. Vanrolleghem
- 345 Long-term land application of biosolids—a case study
R. Y. Surampalli, K. C. K. Lai, S. K. Banerji, J. Smith, R. D. Tyagi and B. N. Lohani
- 353 Evaluation of membrane bioreactor performance via residence time distribution: effects of membrane configuration and mixing
Y. Wang, K. W. Ong, M. W. D. Brannock and G. L. Leslie
- 361 Adapting UASB technology for sewage treatment in Palestine and Jordan
Nidal Mahmoud, Grietje Zeeman and Jules B. van Lier
- 367 Plasticizers and related toxic degradation products in wastewater sludges
I. Beauchesne, S. Barnabé, D. G. Cooper and J. A. Nicell
- 375 Continuous measurement of dissolved sulfide in sewer systems
L. Sutherland-Stacey, S. Corrie, A. Neethling, I. Johnson, O. Gutierrez, R. Dexter, Z. Yuan, J. Keller and G. Hamilton

- 383 Anammox brings WWTP closer to energy autarky due to increased biogas production and reduced aeration energy for N-removal
H. Siegrist, D. Salzgeber, J. Eugster and A. Joss
- 389 Impact of polymer-sludge interaction on rheogram peaks and optimum dose determination
Audrey Murray and Banu Örmeci
- 395 Impact of sludge thickening on energy recovery from anaerobic digestion
B. Puchajda and J. Oleszkiewicz
- 403 Design criteria for semi-central sanitation with low pressure network and membrane bioreactor—the ENREM project
Regina Gnirss, Carsten Luedicke, Martin Vocks and Boris Lesjean
- 411 Chemical states of trace elements in sewage sludge incineration ash by using x-ray absorption fine structure
M. Takaoka, T. Yamamoto, S. Fujiwara, K. Oshita, N. Takeda, T. Tanaka and T. Uruga
- 419 Evaluating limiting steps of anaerobic degradation of food waste based on methane production tests
Luis Ortega, Céline Husser, Suzelle Barrington and Serge R. Guiot
- 423 *Bacillus licheniformis* proteases as high value added products from fermentation of wastewater sludge: pre-treatment of sludge to increase the performance of the process
M. Drouin, C. K. Lai, R. D. Tyagi and R. Y. Surampalli
- 431 Intelligent monitoring system for long-term control of Sequencing Batch Reactors
S. Marsili-Libelli, A. Spagni and R. Susini
- 439 Anaerobic microbial LCFA degradation in bioreactors
D. Z. Sousa, M. A. Pereira, J. I. Alves, H. Smidt, A. J. M Stams and M. M. Alves
- 445 Optimization of Fe^{2+} /solids content ratio for a novel sludge heavy metal bioleaching process
J. W. C. Wong and X. Y. Gu
- 451 Development of a process for the recovery of phosphorus resource from digested sludge by crystallization technology
K. Shimamura, H. Ishikawa, A. Mizuoka and I. Hirasawa
- 457 Strategies for chemical cleaning in large scale membrane bioreactors
C. Brepols, K. Drensla, A. Janot, M. Trimborn and N. Engelhardt
