

# Water Science and Technology

Volume 57, Number 4

## Contents

- 465 Measurement and quantification of sessile and planktonic microbial populations during the anaerobic digestion of cellulose  
**P. D. Jensen, M. T. Hardin and W. P. Clarke**
- 471 Application of molecular technologies to monitor the microbial content of biosolids and composted biosolids  
**A. Novinscak, C. Surette, C. Allain and M. Filion**
- 479 Is sonication effective to improve biogas production and solids reduction in excess sludge digestion?  
**C. M. Braguglia, G. Mininni and A. Gianico**
- 485 What drives communities' decisions and behaviours in the reuse of wastewater  
**B. E. Nancarrow, Z. Leviston, M. Po, N. B. Porter and D. I. Tucker**
- 493 Modeling mixed culture fermentations; the role of different electron carriers  
**R. Kleerebezem, J. Rodríguez, M. F. Temudo and M. C. M. van Loosdrecht**
- 499 Low temperature anaerobic biotreatment of priority pollutants  
**R. M. McKeown, G. Collins, F. A. Chinalia, T. Mahony and V. O'Flaherty**
- 505 Exploring the potential of membrane bioreactors to enhance metals removal from wastewater: pilot experiences  
**F. Fatone, A. L. Eusebi, P. Pavan and P. Battistoni**
- 513 Impact of sewage sludge applications on the biogeochemistry of soils  
**D. Devaney, A. R. Godley, M. E. Hodson, K. Purdy and S. Yamulki**
- 519 Using on-farm sedimentation ponds to improve microbial quality of irrigation water in urban vegetable farming in Ghana  
**B. Keraita, P. Drechsel and F. Konradsen**
- 527 Anaerobic wastewater treatment and membrane filtration: a one night stand or a sustainable relationship?  
**D. Jeison and J. B. van Lier**
- 533 Polymer production by bacterial strains isolated from activated sludge treating municipal wastewater  
**S. Yan, S. Bala Subramanian, R. D. Tyagi and R. Y. Surampalli**
- 541 Effect of didecyl dimethyl ammonium chloride on nitrate reduction in a mixed methanogenic culture  
**U. Tezel, J. A. Pierson and S. G. Pavlostathis**
- 547 Improving the biodegradability of grain distillery wastewater for use as UASB substrate by combinations of ozonation/enzymatic pre-treatments  
**G. O. Sigge, L.-M. Gie and T. J. Britz**

- 553 Two-stage anaerobic digestion enables heavy metal removal  
**Robert Selling, Torbjörn Håkansson and Lovisa Björnsson**
- 559 Membrane bioreactor aeration: investigation of the velocity flow pattern  
**D. Tacke, J. Pinnekamp, H. Prieske and M. Kraume**
- 567 The water reclamation and reuse project of El Prat de Llobregat, Barcelona, Spain  
**R. Mujeriego, J. Compte, T. Cazorra and M. Gullón**
- 575 Combining biocatalyzed electrolysis with anaerobic digestion  
**P. Clauwaert, R. Tolêdo, D. van der Ha, R. Crab, W. Verstraete, H. Hu, K. M. Udert and K. Rabaey**
- 581 Partial Least Squares local calibration of a UV-visible spectrometer used for *in situ* measurements of COD and TSS concentrations in urban drainage systems  
**A. Torres and J.-L. Bertrand-Krajewski**
- 589 Odor control during post-digestion processing of biosolids through bioaugmentation of anaerobic digestion  
**N. Tepe, D. Yurtsever, R. J. Mehta, C. Bruno, V. L. Punzi and M. Duran**
- 595 Microbial characteristics of biogas  
**Marina Moletta, Nathalie Wery, Jean-Philippe Delgenes and Jean-Jacques Godon**
- 601 Characteristics of membrane fouling in submerged membrane bioreactor under sub-critical flux operation  
**Y. C. Su, C. P. Huang, Jill R. Pan and H. C. Lee**
- 607 Role of dissolved humic substances surrogates on phthalate esters migration from sewage sludge  
**Z. Zheng, P. J. He, H. Zhang and L. M. Shao**
- 613 Evaluation of innovative operation concept for flat sheet MBR filtration system  
**L. Weinrich and A. Grélot**
- 621 Effect of peracetic acid, ultraviolet radiation, nanofiltration-chlorine in the disinfection of a non conventional source of water (Tula Valley)  
**J. Trujillo, J. A. Barrios and B. Jimenez**
- 629 Fouling and its reversibility in relation to flow properties and module design in aerated hollow fibre modules for membrane bioreactors  
**S. Pollet, C. Guigui and C. Cabassud**
- 637 Erratum
