

# Water Science and Technology

Volume 57, Number 5

## Contents

- 639 Production of thermostable protease enzyme in wastewater sludge using thermophilic bacterial strains isolated from sludge  
**J. P. Chenel, R. D. Tyagi and R. Y. Surampalli**
- 647 Effects of various process parameters on struvite precipitation kinetics and subsequent determination of rate constants  
**M. S. Rahaman, N. Ellis and D. S. Mavinic**
- 655 Microbial fuel cell cathodes: from bottleneck to prime opportunity?  
**K. Rabaey and J. Keller**
- 661 Monitoring and control of the biogas process based on propionate concentration using online VFA measurement  
**Kanokwan Boe, Jean-Philippe Steyer and Irini Angelidaki**
- 667 Process reliability and significance of reclaimed water quality parameters  
**R. Mujeriego and K. Peters**
- 675 Investigation of the diversity of homoacetogenic bacteria in mesophilic and thermophilic anaerobic sludges using the formyltetrahydrofolate synthetase gene  
**P. Ryan, C. Forbes and E. Collieran**
- 681 Measurement of H<sub>2</sub> consumption and its role in continuous fermentative hydrogen production  
**J. T. Kraemer and D. M. Bagley**
- 687 Anaerobic digestion of catering wastes: effect of micronutrients and retention time  
**M. A. Climenhaga and C. J. Banks**
- 693 Inhibitory effects of nitrate reduction on methanogenesis in the presence of different electron donors  
**A. E. Tugtas and S. G. Pavlostathis**
- 699 Flow structures in MBR-tanks  
**J. Saalbach and M. Hunze**
- 707 Potentials of using nanofiltration to recover phosphorus from sewage sludge  
**C. Niewersch, C. N. Koh, T. Wintgens, T. Melin, C. Schaum and P. Cornel**

- 715 Helminth eggs removal by microscreening for water reclamation and reuse  
**S. Quinzanos, C. Dahl, R. Strube and R. Mujeriego**
- 721 Characterization of sludges for predicting anaerobic digester performance  
**R. Jones, W. Parker, Z. Khan, S. Murthy and M. Rupke**
- 727 Effects of treated wastewater irrigation on the dissolved and soil organic carbon in Israeli soils  
**E. Jueschke, B. Marschner, J. Tarchitzky and Y. Chen**
- 735 Ammonia, a selective agent for methane production by syntrophic acetate oxidation at mesophilic temperature  
**A. Schnürer and Å. Nordberg**
- 741 Cross sectoral and scale-up impacts of greywater recycling technologies on catchment hydrological flows  
**N. Bertrand, B. Jefferson and P. Jeffrey**
- 747 Integration of equalisation tanks within control strategies for anaerobic reactors. Validation based on ADM1 simulations.  
**J. Alferes, J. L. García-Heras, E. Roca, C. García and I. Irizar**
- 753 A critical evaluation of combined engineered and aquifer treatment systems in water recycling  
**P. Dillon, D. Page, J. Vanderzalm, P. Pavelic, S. Toze, E. Bekele, J. Sidhu, H. Prommer, S. Higginson, R. Regel, S. Rinck-Pfeiffer, M. Purdie, C. Pitman and T. Wintgens**
- 763 Heat island mitigation using water retentive pavement sprinkled with reclaimed wastewater  
**H. Yamagata, M. Nasu, M. Yoshizawa, A. Miyamoto and M. Minamiyama**
- 773 Exerting ultrasound to control the membrane fouling in filtration of anaerobic activated sludge—mechanism and membrane damage  
**Xianghua Wen, Pengzhe Sui and Xia Huang**
- 781 Water reuse for urban landscape irrigation: aspersion and health related regulations  
**F. Brissaud, E. Blin, S. Hemous and L. Garrelly**
- 789 Spatial and temporal changes in sulphate-reducing groundwater bacterial community structure in response to Managed Aquifer Recharge  
**D. A. Reed, S. Toze and B. Chang**
- 797 Sludge deterioration in a full scale UASB reactor after a pH drop working under low loading conditions  
**L. Borzacconi, I. López, M. Passeggi, C. Etchebehere and R. Barcia**
