Water Science and Technology

Volume 57, Number 7

Contents

965 Mathematical model for microbial fuel cells with anodic biofilms and anaerobic digestion
C. Picioreanu, K. P. Katuri, I. M. Head, M. C. M. van Loosdrecht and K. Scott

973 Aeration of large-scale municipal wastewater treatment plants: state of the art
Diego Rosso, Lory E. Larson and Michael K. Stenstrom

979 Review on the state of science on membrane bioreactors for municipal wastewater treatment
A. F. van Nieuwenhuijzen, H. Evenblij, C. A. Uijterlinde and F. L. Schulting

987 Impact of temperature on biodegradation of bulk and trace organics during soil passage in an indirect reuse system
S. Gruenheid, U. Huebner and M. Jekel

995 Enhanced solubilisation of the residual fraction of municipal solid waste
D. G. Cirne, V. B. Agbor and L. Björnsson

1001 Reactive tracers reveal hydraulic and control instabilities in full-scale activated sludge plant
D. Braun and W. Gujer

1009 Differentiation of wastewater effluent organic matter (EfOM) from natural organic matter (NOM) using multiple analytical techniques
Seong-Nam Nam and Gary Amy

1017 Continuous electricity production from leachate in a novel upflow air-cathode membrane-free microbial fuel cell
J. N. Zhang, Q. L. Zhao, S. J. You, J. Q. Jiang and N. Q. Ren

1023 Investigative monitoring in the context of detecting anthropogenic impact on an epipotamal river
S. Winkler, M. Zessner, E. Saracevic, K. Ruzicka, N. Fleischmann and U. Wegricht

1031 Effect of protein on biohydrogen production from starch of food waste
H. B. Ding, X. Y. Liu, O. Stabnikova and J.-Y. Wang

1037 Wastewater modification processes assessment in a stabilization reservoir
G. Mannina, G. Mancini, M. Torregrossa and G. Viviani

1047 Biological wastewater treatment for removal of polymeric resins in UASB reactor: influence of oxygen
U. Durán, O. Monroy, J. Gómez and F. Ramírez

IWA Publishing

1053 Standard signal processing using enriched sensor information for WWTP monitoring and control
I. Irizar, J. Alferes, L. Larrea and E. Ayesa

1061 Exposure and risk assessment of *Salmonella* in recycled residuals
Charles P. Gerba, Nohelia Castro-del Campo, John P. Brooks and Ian L. Pepper

1067 Effect of nitrate on the reduction of Reactive Red 2 by mesophilic anaerobic sludge
A. B. Dos Santos, C. H. C. Braúna, S. Mota and F. J. Cervantes

1073 Partial stream digestion of residual municipal solid waste
L. De Baere

1079 mon*EAU*: a platform for water quality monitoring networks
L. Rieger and P. A. Vanrolleghem

1087 Post-aeration of anaerobically digested sewage sludge for advanced COD and nitrogen removal: results and cost-benefit analysis at large-scale
V. Parravicini, K. Svardal and H. Kroiss

1095 The control of denitrification time in full scale by the automatic detection of the low nitrate bend in the redox curve
David Cecil

1103 Assessment of the reliability of an on-site MBR system for greywater treatment and the associated aesthetic and health risks
E. Friedler, Z. Shwartzman and A. Ostfeld

1111 Monitoring copper release in drinking water distribution systems
L. d'Antonio, M. Fabbricino and A. Panico

1117 Electricity production from beer brewery wastewater using single chamber microbial fuel cell
X. Wang, Y. J. Feng and H. Lee

1123 Modelling *E. coli* transport in soil columns: simulation of wastewater reuse in agriculture
Edward Smith and Aimen Badawy

1131 Technical and economical evaluation of water recycling in the carwash industry with membrane processes
K. Boussu, G. Van Baelen, W. Colen, D. Eelen, S. Vanassche, C. Vandecasteele and B. Van der Bruggen
