## Original articles

- 1307** A study of the relationship between clothing pressure and garment bust strain, and Young's modulus of fabric, based on a finite element model  
*L Hong, C Dongsheng, W Qufu and P Ruru*
- 1320** Moisture management and thermal absorptivity properties of double-face knitted fabrics  
*G Supuren, N Oglakcioglu, N Ozdil and A Marmarali*
- 1331** Manufacturing techniques and electrical properties of conductive fabrics with recycled polypropylene nonwoven selvage  
*CW Lou, C-M Lin, W-H Hsing, A-P Chen and J-H Lin*
- 1344** Monitoring chenille yarn defects using image processing with control charts  
*T Maroš, B Vladimír and TM Caner*
- 1354** Development of weaving technology for manufacturing three-dimensional spacer fabrics with high-performance yarns for thermoplastic composite applications: An analysis of two-dimensional mechanical properties  
*A Mountasir, G Hoffmann and C Cherif*
- 1367** Respiratory protection for physiologically straining environments  
*JA Schutz and JS Church*
- 1381** An improved model of rigid bodies for plain-weave fabrics based on the dynamics of multibody systems  
*M Xiao, Z Geng and K Liao*
- 1395** Electronic textile resistor design and fabric resistivity characterization  
*P Petersen, R Helmer, M Pate and J Eichhoff*
- 1405** Dynamic drape property evaluation of natural fiber woven fabrics using a novel automatic drape-measuring system  
*P-N Wang and K-B Cheng*
