CONTENTS

Vortex spinning technology	141
<i>Nazan Erdumlu, Bulent Ozipek, and William Oxenham</i>	
1. Introduction	141
1.1. Definition	141
2. History of air-jet spinning	141
3. Vortex spinning system	144
3.1. Principle of yarn formation mechanism	144
3.2. Structure of vortex-spun yarn	147
3.3. Effects of processing parameters on the structure and properties of vortex-spun yarns	156
4. Properties of vortex-spun yarns in comparison with jet-spun, conventional ring-spun, compact ring-spun and open-end rotor-spun yarns	165
4.1 Yarn hairiness, bulk and rigidity	165
4.2 Yarn evenness and imperfections	166
4.3 Tensile properties	167
5. Properties of fabrics made from vortex-spun yarns in comparison with conventional ring-spun, compact ring-spun and open-end rotor-spun yarns	168
5.1 Fabric strength	168
5.2 Abrasion resistance	168
5.3 Pilling propensity	169
5.4 Dimensional properties	169
5.5 Fabric thickness, compressional properties and fabric handle	170
5.6 Dyeing properties	171
6. Economics of vortex spinning system	171
7. Conclusions	172

Developments in functional finishing of cotton fibres – wrinkle-resistant, flame-retardant and antimicrobial treatments

175

Yin-Ling Lam, Chi-Wai Kan, and Chun-Wah Marcus Yuen

1. Introduction	176
1.1. Importance of chemical finishing of cotton	176
1.2. The challenge of chemical finishing	177
2. Wrinkle-resistant treatment	177
2.1. Principle and effect of wrinkle-resistant treatment	178
2.2. Mechanisms of wrinkle-resistant finishing agents	180
2.3. Application and evaluation of wrinkle-resistant finishing	196
3. Flame-retardant treatment	197
3.1. Background of combustion	197
3.2. Principle of flame-retardant finishing	203
3.3. Classification of flame-retardant agents	204
3.4. Application and evaluation of flame-retardant finishes	214
4. Antimicrobial treatment	215
4.1. Classification of bacteria and germs	215
4.2. Chemistry of antimicrobial finishing	218
4.3. Types of antimicrobial treatment	219
4.4. Application and evaluation of antimicrobial finishing	228
5. Development of functional finishing in textile industry	230
5.1. Future trends in chemical finishing	230
5.2. Catalytic reaction by metal oxides	232
5.3. Plasma surface modification	236
6. Conclusion	239
