CONTENTS

Papers

- 1003 The mechanics of buckling fiber in relation to fabric-evoked prickliness: a theory model of single fiber prickling human skin**
J. Hu, Y. Li, X. Ding and J. Hu
- 1019 Liquid sorption behaviour of nonwovens**
R.S. Rengasamy, V.K. Kothari, V.S. Bele and R. Khanna
- 1031 Modelling of fibre-diameter-dependent light scattering to determine diameter corrections for colour measurement of wool**
H. Wang, T. Mahar, X. Liu, P. Swan and X. Wang
- 1044 Discrete-event simulation model of roll-drafting process**
A. Cherkassky
- 1059 Ultrasonic scouring of wool and its effects on fibre breakage during carding**
Q. Li, C.J. Hurren, C. Ding, L. Wang, T. Lin and X. Wang
- 1065 Analysis of warp knitted fabric structure. Part I: a 3D straight line model for warp knitted fabrics**
H. Dabiryan and A.A.A. Jeddi
- 1075 Effect of relative rubbing speed on the tribo-electrification of continuous filament yarn by stainless steel pins**
L. Liu, W. Oxenham, A.M. Seyam and T. Theyson
- 1086 Ageing effect of plasma-treated wool**
M. Naebe, R. Denning, M. Huson, P.G. Cookson and X. Wang
- 1094 Objective yarn bulk measurement through image analysis**
S. Behtaj, S. Sadri and H. Tavanai
