CONTENTS

Papers

- 739 **Silver-containing sol-gel coatings on textiles: antimicrobial effect as a function of curing treatment**
B. Mahltig, D. Fiedler and P. Simon
- 746 **Effects of total surface area and fabric density on the acoustical behavior of traditional thermal-bonded highloft nonwoven fabrics**
M. Tascan, E.A. Vaughn, K.A. Stevens and P.J. Brown
- 752 **Modelling of thermal conductivity of knitted fabrics made of cotton-bamboo yarns using artificial neural network**
A. Majumdar
- 763 **Accurate prediction of the ring-spinning equation in zero air drag based on homotopy perturbation method**
R. Yin and H. Gu
- 767 **A study of an anti-counterfeiting fiber with spectral fingerprint characteristics**
J. Zhang and M. Ge
- 774 **Novel sericin-fixing agent containing rare-earth ion for weighting silk fiber**
J. Wei, J. Qiu and R. Lu
- 781 **Finite element analysis of bias extension test using an orthotropic hyperelastic continuum model for woven fabric**
S. Dridi, A. Dogui and P. Boisse
- 790 **A novel printing method to enhance the fixation of reactive dyes on wool-polyamide fabrics**
M.M. Marie, A.A. Salem and E.M.R. El Zairy
- 801 **Effect of microwave curing on antimicrobial activity of chitosan biguanidine hydrochloride treated wool fabrics**
X. Zhao, J. Min and J.-x. He
- 808 **Analysis and tensile characterization of flocked fabric after rubbing**
K. Bilisik, Y. Turhan and O. Demiryurek
