CONTENTS

Papers

- 463 A mathematical model of fiber orientation in slivers**
B. Neckář, D. Das and S.M. Ishtiaque
- 477 Investigation into a knitted loop structure as buckled-twisted elastic rod using finite element method**
M. Javadi Toghchi, S. Ajeli and M. Silani
- 483 Wearable cooling system to manage heat in protective clothing**
G.B. Delkumburewatte and T. Dias
- 490 The potential use of alkaline protease from *Streptomyces albidoflavus* as an eco-friendly wool modifier**
N.A. Ibrahim, H.A. El-Shafei, M.S. Abdel-Aziz, M.F. Ghaly, B.M. Eid and A.A. Hamed
- 499 Optimal data use in staple yarn manufacturing**
B.J. Hamilton, W. Oxenham, G.L. Hodge and K.A. Thoney
- 508 Development and characterization of polylactic acid bandage coated with biopolymers and drugs for wound healing**
O.L. Shanmugasundaram and R.V. Mahendra Gowda
- 517 Determination of yarn and fiber diameters after swelling using a capillary rise method**
S. Benltoufa, F. Fayala and S. Ben Nasrallah
- 523 A relationship between dry-relaxed warp-knitted fabric structure and curling distance**
S. Ajeli and Sh. Minapoor
- 532 Trade barriers and market integration in textile sector: evidence from post-reform Russia**
M.C.K. Lau and A. Akhmedjonov
- 541 Shoe-last design exploration and customization**
Y. Zhang, A. Luximon, A.K. Pattanayak and M. Zhang
- 549 Effect of accelerated point distribution on sliver irregularity. Part I: characterization of accelerated point distribution**
Q. Lin, W. Oxenham and C. Yu
- 558 Effect of accelerated point distribution on sliver irregularity. Part II: optimization of draft settings in two-zone roller drafting system**
Q. Lin, W. Oxenham and C. Yu
- 565 Mercerization of *Agave americana* L. fibers**
A. El Oudiani, Y. Chaabouni, S. Msahli and F. Sakli
- 575 Effect of yarn extension on migration parameters of fibres in yarns**
A. Kumar, S.M. Ishtiaque and A. Das
