## CONTENTS

### *Papers*

- 583** **Compression behaviour of jute-polypropylene blended needle-punched nonwoven under wet conditions**  
*S. Debnath and M. Madhusoothanan*
- 595** **The effect of air-jet nozzle structural parameters on new cotton rotor-jet spun yarn properties**  
*A.R. Hoseinpour, S. Shaikhzadeh Najar and M. Bakhshi Jooybari*
- 604** **The effect speed and replenishment flexibility has on overall costs of sourcing apparel products**  
*L. Hartman, J.A. Joines, K.A. Thoney and R.E. King*
- 622** **A study on siro-, solo-, compact-, and conventional ring-spun yarns. Part I: structural and migratory properties of the yarns**  
*P. Soltani and M.S. Johari*
- 629** **Studying bath exhaustion as a method to apply microcapsules on fabrics**  
*M.A. Bonet, L. Capablanca, P. Monllor, P. Díaz and I. Montava*
- 636** **Effect of input tension of inlay yarn on the characteristics of knitted circular stretch fabrics and pressure generation**  
*R. Chattopadhyay, D. Gupta and M. Bera*
- 643** **Statement of Retraction**
- 644** **Modeling embroidered contacts for electronics in textiles**  
*T. Linz, E.P. Simon and H. Walter*
- 654** **Total porosity, theoretical analysis, and prediction of the air permeability of woven fabrics**  
*R.T. Ogulata and S. Mezarcioz*
- 662** **Effects of ultrasonic treatment on wool fibre and fabric properties**  
*Q. Li, T. Lin and X. Wang*
- 669** **Electromagnetic shielding efficiency of nonwoven insulation panels designed with recycled textiles and copper wires**  
*F. Çeken, Ü.H. Erdoğan, O. Kayacan and Ş.S. Uğurlu*
- 676** **Influence of carding and drawing processes on orientation of fibers in slivers**  
*D. Das, S.M. Ishiaque and P. Dixit*
- 687** **Necessary modification of the Euler-Eytelwein formula for knitting machines**  
*M.O. Weber and A. Ehrmann*
