## CONTENTS

### *Papers*

- 795 Nano-TiO<sub>2</sub>/maleic acid/triethanol amine/sodium hypophosphite colloid on cotton to produce cross-linking and self-cleaning properties**  
*M. Montazer, F. Lessan and M.B. Moghadam*
- 806 Intelligent clothing for automated recognition of human physical activities in free-living environment**  
*Y. Wu, R. Chen, J. Wang, X. Sun and M.F.H. She*
- 817 Fractal calculation of air permeability of nonwoven fabrics**  
*W. Song and W. Yu*
- 827 Study on water vapor diffusing coefficient of fibrous materials by fractal method**  
*W.F. Song, M.W. Tian and W.D. Yu*
- 836 Influence of yarn extension on longitudinal structural characteristics of fibres**  
*A. Kumar, S.M. Ishtiaque and A. Das*
- 844 The origin of the antibacterial property of bamboo**  
*T. Afrin, T. Tsuzuki, R.K. Kanwar and X. Wang*
- 850 Real-time yarn evenness investigation via evaluating spinning triangle area changes**  
*A. Badehnoush and A. Alamdar Yazdi*
- 862 Limiting speed of false-twist texturing: a possible explanation of the post-surfing mode**  
*J.W.S. Hearle*
- 866 Textile design engineering within the product shape**  
*L.P. Chapman and T. Little*
- 875 Investigation of pore parameters of woven fabrics by theoretical and image analysis methods**  
*R.B. Turan and A. Okur*
- 885 Imbuing titanium dioxide into cotton fabric using tetrabutyl titanate by hydrothermal method**  
*H. Zhang and L. Yang*
- 893 Novel study of carbon nanotubes as UV absorbers for the modification of cotton fabric**  
*M. Mahmoudifard and M. Safi*
- 900 Assessing the validity of a niche strategy model in predicting the potential and success of niche markets and products**  
*R. Allen, E. Parrish, N.L. Cassill and W. Oxenham*
- 912 The long-term performance of cementitious composites reinforced with coir fibre**  
*Z. Li, L. Wang and X. Wang*
