

## BIOMATERIALS II

- Corrosion in Biological Environments
- Structural, Functional, and Biological Thin Films
- Surface Engineering

### CORROSION IN BIOLOGICAL ENVIRONMENTS

**21: Biomaterials II: Corrosion Issues in Biological Environments:**  
Vilupanur A. Ravi

**22: Biological Interactions at Metal Surfaces:**  
Douglas C. Hansen

**28: Performance-driven Design of Biocompatible Mg Alloys:**  
Nicholas T. Kirkland,  
Mark P. Staiger, David Nisbet,  
Chris H.J. Davies,  
and Nick Birbilis

**35: Corrosion Resistance of the Ti-6Al-4V Titanium Alloy with Nitride Coatings in 0.9% NaCl:** I.M. Pohrellyuk,  
O.V. Tkachuk, and  
R.V. Proskurnyak

**42: The Environmental Stability of Boron-containing Titanium Alloys for Biomedical Applications:**  
Vilupanur A. Ravi,  
Shaun Rogers, Mehnaz Malek,  
Daniel Surmenian, Isaac Priddy,  
Bradley Harrison,  
Andrew Schissler,  
Suresh C. Divi,  
Sesh Tamirisakandala,  
and Daniel Miracle

### STRUCTURAL, FUNCTIONAL, AND BIOLOGICAL THIN FILMS

**48: Recent Advances in Modulated Pulsed Power Magnetron Sputtering for Surface Engineering:**  
Jianliang Lin,  
William D. Sproul,  
John J. Moore,  
Zhili Wu, Sabrina Lee,  
Roman Chistyakov,  
and Bassam Abraham

**59: Deposition of Antimicrobial Coatings on Microstereolithography-fabricated Microneedles:**  
Shaun D. Gittard,  
Philip R. Miller, Chunming Jin,  
Timothy N. Martin,  
Ryan D. Boehm,  
Bret J. Chisholm,  
Shane J. Stafslieen,  
Justin W. Daniels, Nicholas Cilz,  
Nancy A. Monteiro-Riviere,  
Adnan Nasir,  
and Roger J. Narayan

### SURFACE ENGINEERING

**69: Surface Engineering for Energy Sustainability and Bio-applications:**  
Sandip P. Harimkar,  
Arvind Agarwal, Sudipta Seal,  
and Narendra Dahotre

**70: Application of Carbon Nanostructures—Energy to Electronics:** Indranil Lahiri,  
Santanu Das, Chiwon Kang,  
and Wonbong Choi

**77: Surface Characterization of Novel Alumina-based Composites for Energy Efficient Sliding Systems:**  
R. Paluri and S. Ingole

**84: Endothelial Cell Adhesion and Growth within a Bioassay Chamber using Microstamped ECM Proteins:**  
David A. Rubenstein  
and Mary D. Frame

**94: Laser Surface Modification of Metallic Biomaterials:**  
Amit Bandyopadhyay,  
Vamsi Krishna Balla,  
Mangal Roy, and Susmita Bose

### FEATURES

**8: TMS Partners in Progress: The Case for Recycling of Rare Earth Metals—A CR<sup>3</sup> Communication:**  
T. Anand, B. Mishra,  
D. Apelian and B. Blanpain

**12: TMS Finances: Looking Back at a Year of Progress:**  
Stanley M. Howard

**13: A Project for the Ages: Art, History, and Materials Science Converge to Preserve the 1297 Magna Carta:** Lynne Robinson

**19: Inspiration from Nature—Biomimetic Materials Workshop at the San Diego Zoo:** Po-Yu Chen  
and John A. Nychka
