Materials 1	24
Microfluidics and biomechanics can win gold explains Peter Styring	
Materials 2	28
Feedstock supplies are key to photovoltaic advances argues Sean Milmo	
Process and reactor technologies 1	30
David Houlton, Bernd Kastner and Mark Lovallo discuss advances in agitators	
Process and reactor technologies 2	34
Anthony Taylor reveals the latest in bioreactors	
Process and reactor technologies 3	37
Commercial scale-up of microwave reactor technology is a reality, says Mike Harrison	
Decommissioning & recommissioning 1	40
Jeff Crook outlines some innovative decommissioning methods at the North Sea's Ekofisk field	
Decommissioning & recommissioning 2	42
Kevin Routledge details the project management behind the recommissioning of the Bruce A nuclear reactor in Ontario	
Distillation	44
Henry Kister, Walter Stupin and Steven Stupin on dealing with liquid distributor failures	
Asset management 1	48
Sandy Dunn summarises how to achieve best practice in maintenance	
Asset management 2	52
Christopher Abiodun describes successful management of the Greater Plutonio oil field	
Renewable resources	55
Galip Akay, Murat Dogru and Omer Calkan discuss the merits of intensified integrated gasification of biomass as a source of heat and power	
Instrumentation	58
Electronic noses have become part of the process, explains Wendy Laursen	
Waste minimisation	60
Chris Spillane highlights why Christmas is an environmental nightmare	

regulars

Catalyst	2	Interview	17
Sean Ottewell reminisces about his tce beginnings and chemical engineering		Andrew Liveris discusses sustainability and rebranding of chemengers with Adam Duckett	
Analysis	3	Legalwatch	18
Australian minerals boom; Pfizer's gloomy future; Nuclear fusion future		Tim McGoldrick advises contractors on strategies to deal with increasing material costs	
Americas	8	Guest author	20
Corus goes Brazilian?; BHP oil field purchase; BP in Texas City settlement		Will Schoenmakers and colleagues explain why cutting costs doesn't mean cutting innovation
