LIST OF CONTRIBUTORS	v
FOREWORD	vi
SCOPE OF THE HANDBOOK	vii
ACKNOWLEDGMENTS	ix
ABBREVIATIONS	xi
ANALYTICAL METHODS	xv

SECTION I Oilseeds and Nuts, Cakes and Meals and Animal Feeding Stuffs

The Drawing and Handling of Samples	3
Methods of sampling and analysis—oils, fats and oilseeds, January 1962—Transport Sub-Committee of International Association of Seed Crushers—List of contents	5
International Association of Seed Crushers—Recommended standard procedure for sampling of oilseeds—May 1962	6
General	6
Definitions	7
Apparatus	7
Limitation of the size of lot	7
Method of drawing samples	10
Packaging and labelling of samples	12
Despatch of samples	13
Sampling report	13
Preparation of the Samples for Analysis	14
Foreign Matter	15
References	15
Water and other Volatile Matter	17
The Benzine Content of Extraction Meal	17
Oil or Fat Content	20
Method 1—Direct extraction	20
Method 2—Exclusively for palm kernels: according to SOCGPA	23
Method 3—Extraction by shaking, after boiling with acid (N)	24
Method 4—Refractometric method for determination of the oil content of cakes and expeller meals (N)	27
Free Fatty Acid	30
Nitrogen and Protein by Kjeldahl	30
Macro method	30

Semi-micro method	32
Determination of the Urease Activity in Soyabean Meal (N)	34
Soluble Protein in Extracted Meal (N)	36
Crude Fibre (N)	37
 SECTION II	
Oils, Fats, Fatty Acids, and Fatty Alcohols	
GROUP 1	
DRAWING AND HANDLING OF OIL AND FAT SAMPLES	
International Association of Seed Crushers—Recommended standard procedure for sampling of vegetable oils and fats—30th April 1962	44
Object and uses	44
Definitions	45
Apparatus and auxiliary equipment	45
General directives for sampling	49
Classification	49
Labels for samples	56
Despatch of samples	57
 GROUP 2	
PURITY AND OTHER QUALITY CHARACTERISTICS	
Explanatory Note	58
Water and Other Volatile Matter	58
Water by Karl Fischer Method	59
Water by the Distillation Method	59
Determination of Water-insoluble Solvent	62
Impurities	62
Ash	64
Mucilage (N)	65
“Foots” in Linseed Oil (N)	65
Colour	67
Lovibond tintometer method	68
Dichromate scale method	70
Iodine scale method	73
Odour	74
Colour of Soap	75
Method 1—Cup test	75
Method 2—Aqueous solution	76
Method 3—Glycerol or ethylene glycol solution (N)	77
Determination of Fuel Oil in Whale Oil and Fish Oils by Thin-layer Chromatography	78
 GROUP 3	
PHYSICAL CHARACTERISTICS	
Weight by Volume for Tank-weight Calculations	80
Consistency (Solidity)	88
Slip Point	88
Dilatation	91
Titre of Fatty Acids	96

Refractive Index	99
Viscosity	101
Oswald U-tube viscometer	102
Höppler viscometer	103
Flash Point	106

GROUP 4
CHEMICAL CHARACTERISTICS

Preparation of the Water-insoluble Fatty Acids	107
Iodine Value	109
Wijs' method	110
Hofmann and Green method	112
Acid Value (Free Fatty Acid Content), Saponification Value, and Ester Value	113
Acid value (AV), free fatty acid content, acidity	113
Saponification value (SV)	117
Ester value (EV)	120
Hydroxyl Value (Acetyl Value)	120
Unsaponifiable Matter	123
Standard method—Using diethyl ether	123
Quick method —Using petroleum ether	126
Oxidized Fatty Acids	126
Peroxide Value	129
Chlorophyll (N)	130
Paper Chromatographic Analysis of the Fatty acid Composition of Oils and Fats	131
Paper chromatographic detection of small amounts of coconut oil or palm kernel oil in fat mixtures	135
Phosphatides-Lecithin	137
Phosphorus in oils and fats	137
Phosphorus in lecithin—Method 1	140
Phosphorus in lecithin—Method 2	143
The evaluation of soya lecithin	144
Further tests for quality assessment of lecithin	146
Qualitative test for adulteration with inorganic phosphorus	147
Polybromide Reaction	147
Thiocyanogen Value	149
Liquid and Solid Fatty Acids	149
Linoleic and Linolenic Acid Content	150
Detection of Vegetable Oils in Animal Fats	156
Trace Elements	159
Colorimetric estimation of copper and iron	160
Volatile Fatty Acids—Reichert-Meissl, Polenske, and Kirschner Value	164
Reichert-Meissl value	164
Polenske value	168
Kirschner value	168
Antioxidants in Oils and Fats	170
Method 1—Detection of gallates in fats	171
Method 2—Detection of butylated hydroxyanisole—BHA (N)	172
Method 3—Determination of butylated hydroxyanisole—BHA (N)	172

Method 4—Determination of butylated hydroxyanisole—BHA and butylated hydroxytoluene—BHT (N)	173
Method 5—Semi-quantitative estimation of gallates, butylated hydroxyanisole—BHA and butylated hydroxytoluene—BHT (N)	177
Mackey Test	179
Hydrocarbons in Fatty Alcohols	182
Specific Tests for Identification and Purity of Oils and Fats	184

SECTION III Glycerol

Free Glycerol in Oils and Fats	193
Combined Glycerol in Oils and Fats	193
Crude and Refined Glycerol	196
Glycerol	196
Water by Karl Fischer reagent	201
Ash in crude glycerol	206
MONG—Matter (organic) non-glycerol	207
Sugars and other polyhydric alcohols	207
Detection of sugars	208
Monoglyceride	208
Method 1—Krusty	209
Method 2—Brokaw	213
Mono-, Di- and Triglycerides	215

SECTION IV Analyses in Connection with the Extraction, Refining, Bleaching, Hardening, and Other Processing of Oils and Fats

Extraction Benzine—Boiling Point Analysis	221
Extraction Benzine—Benzene Content	225
Method 1—Benzene content by ultra-violet spectrophotometry	225
Method 2—Benzene content by column chromatography	229
Determination of Soap in Neutralized Oils and in Acid Oils	231
Neutral Oil in Oils and Fats and in Acid Oils	233
Evaluation of Bleaching Earth	235
Testing of Spent Bleaching Earth for Moisture and Oil	238
Hydrogenation of Oils and Fats	240
Activity of catalysts and of oils and fats	240
Sulphur in catalysts	248
Nickel in catalysts	251
Hydrogen consumption in hardening	257
Degree of Splitting	257
Mineral Acid in Split Fats	258

SECTION V Fat Products

Sampling and Preparation of Sample	263
--	-----

CONTENTS

xxiii

Water	263
Method 1	264
Method 2	264
Method 3	265
Fat and Non-fat	265
Free Fatty Acid	266
Sodium Chloride	268
Milk Solids	268
pH Value	268
Method 1—Normal	268
Method 2—Relatively large amounts of emulsifiers present	269
Method 3—No centrifuge available	269
Method 4—No centrifuge available	269
Vitamin A	269
Carotene	276
Detection of Colouring Matter	278
Carotene	278
Annatto	279
Aniline dyes	279
Peroxide Value	280
Benzoic and/or Sorbic Acid	280
Penetration Value	281

SECTION VI

Specialist Methods and Techniques

The Control and Assessment of Variability in Routine Analysis—A. G. BAKER	289
Time-saving Practices and Equipment in Factory Laboratories—T. NIJZINK	295
The Analysis of Fatty Acids by Gas-Liquid Chromatography—W. LAZARUS	305
Thin-layer Chromatography of Fats—F. B. PADLEY	315
Automation in the Analysis of Animal Feedstuffs with Special Reference to Amino Acid Analysis—D. C. THOMAS	319
Quality Assessment of Raw Materials for their Suitability for Refining, Bleaching, and Deodorizing—C. VAN REDE	328
Survey of Accelerated Tests for Determining the Stability of Oils and Fats—S. W. THOMPSON	340
The Direct Determination of Trace Metals in Glyceride Oils by Spectrophotometric Methods—T. H. NEWLOVE	346
A Review of Methods for the Determination of Trace Metals in Oils and Fats and the Development of a Direct Polarographic Method—B. SURFLEET	352
Detection of Animal Fats in Vegetable Oils and Fats—J. H. RECOURT	357
Estimation of the Contents of Butter Fat, Coconut Oil, and Palm Kernel Oil in Fat Mixtures, Deduced from the Reichert-Meissel, Polenske, and Kirschner Values—R. ROBERTS and A. D. SCOTT	362
Methods for Classifying and Identifying Fatty Materials and the Fatty Matter Contained in Products—J. P. DORISSEN and R. ROBERTS	366

Mass Spectrometry; its Value in the Identification of Fatty Acids—T. H. SHUTTLEWORTH	376
Infra-red Quantitative Analysis of <i>trans</i> Content in Fatty Acids and Derivatives—A. MEMELINK	388
The Application of Nuclear Magnetic Resonance Spectroscopy to Fat Analysis—J. CLIFFORD	392
SECTION VII	
The Analytical Characteristics and Fatty Acid Composition of the More Common Oils and Fats	401
AUTHOR INDEX	409
SUBJECT INDEX	413

SECTION I

Oilseeds and Nuts, Cakes and Meals and Animal Feeding Stuffs

CONTENTS

The Drawing and Handling of Samples	3
Methods of sampling and analysis—oils, fats and oilseeds, January 1962— Transport Sub-Committee of International Association of Seed Crushers—List of contents	5
International Association of Seed Crushers—Recommended standard procedure for sampling of oilseeds—May 1962	6

Semi-micro method	32
Determination of the Urease Activity in Soyabean Meal (N)	34
Soluble Protein in Extracted Meal (N)	36
Crude Fibre (N)	37

SECTION II

Oils, Fats, Fatty Acids, and Fatty Alcohols

EXPLANATORY NOTE: Except where otherwise expressly mentioned, the methods can be applied to crude oils and fats, refined or processed oils and fats, fatty matter separated from a fat-containing product, fatty acids and fatty alcohols. In reporting, it is important to state the basis of the figures, for example "on the crude oil", or "calculated to the water- and impurity-free oil". For convenience, the methods are arranged in four groups as shown in the list of contents.

CONTENTS

GROUP 1

DRAWING AND HANDLING OF OIL AND FAT SAMPLES

International Association of Seed Crushers—Recommended standard procedure for sampling of vegetable oils and fats—30th April 1962

Object and uses	44
Definitions	44
Apparatus and auxiliary equipment	45
General directives for sampling	45
Classification	49
Labels for samples	49
Despatch of samples	56

GROUP 2

PURITY AND OTHER QUALITY CHARACTERISTICS

Explanatory Note	58
Water and Other Volatile Matter	58
Water by Karl Fischer Method	59
Water by the Distillation Method	59
Determination of Water-insoluble Solvent	59
Impurities	62
Ash	62
Mucilage (N)	64
"Foots" in Linseed Oil (N)	65
Colour	65
Lovibond tintometer method	67
C	68

Dichromate scale method	70
Iodine scale method	73
Odour	74
Colour of Soap	75
Method 1—Cup test	75
Method 2—Aqueous solution	76
Method 3—Glycerol or ethylene glycol solution (N)	77
Determination of Fuel Oil in Whale Oil and Fish Oils by Thin-layer Chromatography	78
GROUP 3	
PHYSICAL CHARACTERISTICS	
Weight by Volume for Tank-weight Calculations	80
Consistency (solidity)	88
Slip Point	88
Dilatation	91
Titre of Fatty Acids	96
Refractive Index	99
Viscosity	101
Oswald U-tube viscometer	102
Höppler viscometer	103
Flash Point	106
GROUP 4	
CHEMICAL CHARACTERISTICS	
Preparation of the Water-insoluble Fatty Acids	107
Iodine Value	109
Wijs method	110
Hofmann and Green method	112
Acid Value (free fatty acid content), Saponification Value, and Ester Value	113
Acid value (AV), free fatty acid content, acidity	113
Saponification value (SV)	117
Ester value (EV)	120
Hydroxyl Value (Acetyl Value)	120
Unsaponifiable Matter	123
Standard method—Using diethyl ether	123
Quick method —Using petroleum ether	126
Oxidized Fatty Acids	126
Peroxide Value	126
Chlorophyll (N)	129
Paper Chromatographic Analysis of the Fatty Acid Composition of Oils and Fats	130
Paper chromatographic detection of small amounts of coconut oil or palm kernel oil in fat mixtures	131
Phosphatides-Lecithin	135
Phosphorus in oils and fats	137
Phosphorus in lecithin—Method 1	137
Phosphorus in lecithin—Method 2	140
The evaluation of soya lecithin	143
Further tests for quality assessment of lecithin	144
Qualitative test for adulteration with inorganic phosphorus	146
Polybromide Reaction	147
Thiocyanogen Value	149
Liquid and Solid Fatty Acids	149
Linoleic and Linolenic Acid Content	150
Detection of Vegetable Oils in Animal Fats	156

Trace Elements	159
Colorimetric estimation of copper and iron	160
Volatile Fatty Acids—Reichert-Meissl, Polenske, and Kirschner Value	164
Reichert-Meissl value	164
Polenske value	168
Kirschner value	168
Antioxidants in Oils and Fats	170
Method 1—Detection of gallates in fats	171
Method 2—Detection of butylated hydroxyanisole—BHA (N)	172
Method 3—Determination of butylated hydroxyanisole—BHA (N)	172
Method 4—Determination of butylated hydroxyanisole—BHA and butylated hydroxytoluene—BHT (N)	173
Method 5—Semi-quantitative estimation of gallates, butylated hydroxyanisole—BHA and butylated hydroxytoluene—BHT (N)	177
Mackey Test	179
Hydrocarbons in Fatty Alcohols	182
Specific Tests for Identification and Purity of Oils and Fats	184

CONTENTS

Free Glycerol in Oils and Fats	193
Combined Glycerol in Oils and Fats	193
Crude and Refined Glycerol	196
Glycerol	196
Water by Karl Fischer reagent	201
Ash in crude glycerol	206
MONG—Matter (organic) non-glycerol	207
Sugars and other polyhydric alcohols	207
Detection of sugars	208
Monoglyceride	208
Method 1—Krutty	209
Method 2—Brokaw	213
Mono-, Di- and Triglycerides	215

SECTION IV

Analyses in Connection with the Extraction, Refining, Bleaching, Hardening, and Other Processing of Oils and Fats

EXPLANATORY NOTE: Many of the methods required in connection with the processing of oils and fats, such as ffa, colour, and other physical characteristics, have been given in the previous sections and therefore only those additional methods generally confined to, or closely related to extraction and processing are included in this Section IV; the titles of these are given under "Contents". Quite naturally, some of the methods in this Section fit in well with the "Specialist Method" given on p. 329 et seq.

CONTENTS

Extraction Benzine—Boiling Point Analysis	221
Extraction Benzine—Benzene Content	225
Method 1—Benzene content by ultra-violet spectrophotometry	225
Method 2—Benzene content by column chromatography	229
Determination of Soap in Neutralized Oils and in Acid Oils	231
Neutral Oil in Oils and Fats and in Acid Oils	233
Evaluation of Bleaching Earth	235
Testing of Spent Bleaching Earth for Moisture and Oil	238
Hydrogenation of Oils and Fats	240
Activity of catalysts and of oils and fats	240
Sulphur in catalysts	248
Nickel in catalysts	251
Hydrogen consumption in hardening	257
Degree of Splitting	257
Mineral Acid in Split Fats	258

CONTENTS

Sampling and Preparation of Sample	263
Water	263
Method 1	264
Method 2	264
Method 3	265
Fat and Non-Fat	265
Free Fatty Acid	266
Sodium Chloride	268
Milk Solids	268
pH Value	268
Method 1—Normal	268
Method 2—Relatively large amounts of emulsifiers present	269
Method 3—No centrifuge available	269
Method 4—No centrifuge available	269
Vitamin A	269
Carotene	276
Detection of Colouring Matter	278
Carotene	278
Annatto	279
Aniline dyes	279
Peroxide Value	280
