

Welding Handbook

Seventh Edition, Volume 1

Fundamentals of Welding

*The Five Volumes of the
Welding Handbook, Seventh Edition*

1 Fundamentals of Welding

2 Welding Processes —

*Arc and Gas Welding and Cutting,
Brazing, and Soldering*

3 Welding Processes —

*Resistance and Solid State Welding
and Other Joining Processes*

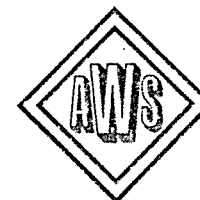

4 Engineering Applications — Materials

5 Engineering Applications — Design

Welding Handbook² 8 MAR. 1990

Seventh Edition, Volume 1

Fundamentals of Welding

Charlotte Weisman, Editor

Contents

<i>Welding Handbook Committee</i>	x
<i>Foreword</i>	xi
<i>Preface</i>	xiv

Chapter 1, Survey of Processes for Joining

and Cutting Materials	1
Introduction	2
Arc Welding	3
Shielded Metal Arc Welding	3
Submerged Arc Welding	6
Gas Metal Arc and Flux Cored Arc Welding	7
Gas Tungsten Arc Welding	10
Plasma Arc Welding	11
Electroslag and Electrode Gas Welding	12
Resistance Welding	14
Flash Welding	16
Oxyfuel Gas Welding	17
Solid State Welding	18
Diffusion Welding	18
Friction Welding	19
Electron Beam Welding	20
Laser Beam Welding	21
Brazing	23
Soldering	25
Adhesive Bonding	26
Welding Plastics	27
Thermal Cutting Processes	28
Oxygen Cutting	28
Plasma Arc Cutting	29
Air Carbon Arc Cutting	29
Laser Beam Cutting	30
Supplementary Reading List	31

Chapter 2, Physics of Welding	33
Introduction	34
Energy Sources for Welding	38
Electrical Sources of Welding Energy	38

Library of Congress Number: 75-28707
International Standard Book Number: 0-87171-126-5

A publication of a handbook by the American Welding Society does not carry with it the right to make, use, or sell patented items. Each prospective user should make an independent investigation.

Printed in the United States of America

Chemical Sources of Welding Energy	41	Effect of Plate Thickness and Weld Geometry.....	95
Optical Sources of Welding Energy.....	44	Effect of Thermal Characteristics.....	96
Mechanical Sources of Welding Energy	48	Control of the Width of the Heat-Affected Zone	97
Solid State Sources of Welding Energy.....	50	Supplementary Reading List.....	98
Arc Characteristics.....	52	Chapter 4, Welding Metallurgy.....	99
Definitions.....	52	Introduction	100
The Plasma	52	General Metallurgy	100
Temperature	53	Structure of Metals.....	100
Radiation.....	55	Phase Transformations	103
Electrical Features	55	Effects of Deformation and Heat Treatment	107
Influence of Magnetic Fields on Arcs.....	56	Review of Commercial Alloys	117
Metal Transfer	59	The Metallurgy of Welding.....	122
Effect of Polarity on Metal Transfer in Argon	60	What Is a Weld?.....	122
Effect of Other Gases on Metal Transfer	63	Weld Metal.....	123
Short Circuiting Transfer	64	The Heat-Affected Zone.....	131
Pulsed Current Consumable Electrode Transfer	65	Base Metal.....	137
Submerged Arc Transfer.....	65	Summary	142
Covered-Electrode Transfer	66	Weldability Testing	143
Melting Rates.....	66	Theoretical Tests	143
General Controlling Parameters.....	66	Simulated Tests.....	143
Melting Rates in GMAW	68	Actual Welding Tests.....	145
Melting Rates in SAW.....	69	Brazing and Soldering Metallurgy.....	149
Melting Rates with SMAW	69	Supplementary Reading List.....	151
Physical Properties of Metals and Shielding Gases.....	71	Chapter 5, Testing for Evaluation of Welded Joints	153
Thermal Conductivity	73	Introduction	154
Coefficient of Expansion.....	73	Tensile Properties—Strength and Ductility.....	155
Ionization Potentials	74	Tension Tests	155
Thermionic Work Function	74	Hardness Tests	163
Metal Oxides.....	74	Constant Load Rupture Tests.....	166
Specific Heat.....	75	Bend Tests.....	166
Supplementary Reading List.....	77	Fracture Toughness	170
Chapter 3, Heat Flow in Welding.....	79	Concepts Relating to Fracture Toughness.....	171
Introduction	80	Linear Elastic Fracture Mechanics	174
Peak Temperatures.....	80	Engineering Procedures for Elastic- Plastic Toughness.....	179
Peak Temperature Equation	80	Special Problems of Welded Joints	183
Calculating Width of Heat-Affected Zone	81	Fatigue Properties of Welded Structural Joints	186
Cooling Rates	84	Description of Phenomenon.....	186
Thick and Thin Plate Cooling Rate Equations	84	Measurement of Fatigue Properties.....	189
Preheat Temperature and Critical Cooling Rate	85	Test Specimens.....	190
Solidification Rates	88	Fatigue Strength of Welded Joints.....	191
Effect of Dendrite Spacing	88	Summary of Fatigue Data	198
Effect of Energy Input.....	89	Improvement Techniques	200
Typical Weld Thermal Cycles.....	90		
Effects of Energy Input and Preheat Temperature	90		

Corrosion Fatigue	200
Thermal Fatigue	200
Corrosion Factors Affecting the Testing and Performance of Welded Joints	201
Types of Corrosion	201
Corrosion Testing of Welded Joints	204
Evaluation of Corroded Weldments	206
Elevated Temperature Behavior	207
Creep-Rupture Phenomena	207
Test Method	207
Method of Reporting and Extrapolating	208
Significance of Weld Discontinuities	209
Types of Weld Discontinuities	209
Effect of Discontinuities on the Performance of Welded Joints	212
Code Standards	215
Reference List	217
Supplementary Reading List	219
Chapter 6, Residual Stresses and Distortion	221
Introduction	222
Causes of Residual Stresses	224
Macroscopic and Microscopic Residual Stresses	224
Formation of Residual Stresses	225
Thermal Stresses during Welding and Resulting Residual Stresses	229
Residual Stresses and Reaction Stresses in Weldments	230
Effects of Residual Stresses	231
Fracture under Tensile Stresses	231
Buckling under Compressive Loading	234
Fatigue Fracture	236
Effects of Environment	237
Measurement of Residual Stresses in Weldments	238
Classification of Techniques for Measuring Residual Stresses	238
Measurement of Residual Stresses by Stress-Relaxation Techniques	239
Measurement of Residual Stresses by X-ray Diffraction Techniques	243
Typical Residual Stresses in Weldments	244
Distribution of Residual Stresses in Typical Welds	244
Various Factors Affecting Residual Stresses in Welds	244

Weld Distortion	248
Fundamental Types of Distortion	248
Transverse Shrinkage of Butt Welds	250
Transverse Shrinkage of Fillet Welds	255
Longitudinal Shrinkage of Butt Welds	255
Longitudinal Shrinkage of Fillet Welds	256
Angular Change of Butt Welds	256
Distortion Caused by Angular Changes of Fillet Welds	258
Bending Distortions Induced by Longitudinal Shrinkage	260
Buckling Distortion	261
Solution of Practical Problems	261
Design and Procedures for Reducing Residual Stresses and Distortion	265
Reduction of Residual Stresses	265
Control of Distortion	265
Correction of Distortion	267
Thermal and Mechanical Treatments of Weldments	268
Reasons for Thermal and Mechanical Treatments of Weldments	268
Common Thermal Treatments for Weldments	269
Peening	273
Proofstressing	274
Vibratory Stress Relief	274
Reference List	276
Supplementary Reading List	278
Appendix A, Terms and Definitions	279
Appendix B, Metric Practice Guide	337
Index	361
