

Overview of Contents

COAL TECHNOLOGY	1-1
GAS TECHNOLOGY	2-1
PETROLEUM TECHNOLOGY	3-1
CHEMICAL FUELS TECHNOLOGY	4-1
NUCLEAR ENERGY TECHNOLOGY	5-1
SOLAR ENERGY TECHNOLOGY	6-1
GEOTHERMAL ENERGY TECHNOLOGY	7-1
HYDROPOWER TECHNOLOGY	8-1
POWER TECHNOLOGY TRENDS	9-1

For the detailed contents of any subsection, consult the title page of that subsection. The alphabetical index is at the end of the book.

Contents

Contributors	ix
Preface	xvi
Acknowledgments	xx
Energy	xxii

COAL TECHNOLOGY

Properties, Reserves, and Testing

Coal—Properties and Statistics	1-15
Coal Reserves—Estimates	1-34
Coal Exploration	1-37
Coal Testing	1-48
Bomb Calorimetry for Testing Solid and Liquid Fuels	1-63

Safety and Environment

Roof Control for Underground Mining	1-71
Coal Mining—Safety and Health	1-84
Contour Mining	1-94
Seeding and Planting to Achieve Land-Management Objectives	1-102

Coal Preparation and Handling

Coal Preparation Plants	1-117
Coal Handling and Storage Systems	1-137
Railroad Transportation of Coal	1-153
Barge Movement of Coal	1-170
Coal Transportation by Slurry Pipelines	1-178

Coal Conversion Processes

The Lurgi Process for Coal Gasification	1-188
The Hygas Coal Gasification Process	1-201
Bi-Gas Process for Production of High-Btu Pipeline Gas from Coal	1-212

The CO ₂ Acceptor Coal Gasification Process	1-219
Production of High-Btu Gas by the <i>Hydrane</i> Process	1-223
The <i>Synthane</i> Coal Gasification Process	1-232
In-Situ Coal Gasification	1-242
Carbonizing/Hydrogenation Method for Producing Metallurgical Coke	1-249
Char-Oil Energy Development (Project <i>COED</i>)	1-253
<i>Cogas</i> Process for Conversion of Coal to Gas and Oil Products	1-261
<i>Synthoil</i> Process for Converting Coal to Nonpolluting Fuel Oil	1-269
The <i>Toscoal</i> Process for Pyrolysis of Coal	1-272
The <i>Consol</i> Synthetic Fuel Process (<i>CSF</i> Process)	1-276
Coal Purification by Solvent Refining	1-282
Coal Gasification at SASOL (Republic of South Africa)	1-285
GAS TECHNOLOGY*	
<i>Reserves and Demands</i>	
Natural Gas Production and Reserves in the United States	2-9
Potential Supply of Natural Gas in the United States	2-20
Natural Gas Reserves in Canada	2-34
World Natural Gas Production and Reserves	2-38
Future Gas Consumption of the United States	2-47
<i>Gas Handling and Calorimetry</i>	
Gas Pipelines and Underground Storage	2-60
Marine Pipelines	2-77
Seagoing LNG Carriers	(See Handbook Section on <i>Petroleum Technology</i>)
Calorimetric Measurement of Gaseous Fuels	2-90
Gas-Mixing Control Systems	2-96
<i>Natural and SNG Processes</i>	
Liquefied Natural Gas (LNG)	2-100
Cryogenic Upgrading of Low-Btu Gases	2-116
Methanol Production and Fuel Methanol vs. LNG	2-120
Chemical Feedstocks from Natural Gas	2-129
Absorption of Acidic Gases from Natural Gas and SNG	2-133
The Catalytic Rich Gas (CRG) Process for Gasification of Light Hydrocarbons	2-137
Methane-Rich Gas Process for Substitute Natural Gas	2-149
The Fluidized Bed Hydrogenation Process for Substitute Natural Gas Production	2-160
Hydrocracking-Hydrogasification Process for Producing Pipeline Gas from Crude Oil	2-164
Noncatalytic, Partial-Oxidation Gasification Process	2-171
PETROLEUM TECHNOLOGY	
Petroleum	3-12
Petroleum Fuels Characteristics	3-22
<i>Reserves, Demands, Production</i>	
Petroleum Production and Reserves in the United States	3-45
Petroleum Reserves in Canada	3-73
World Petroleum Production and Reserves	3-78
Petroleum Requirements	3-96
Drilling and Production	3-103
<i>Nonconventional Petroleum Fuel Sources</i>	
Oil Shale Retorting	3-147

*NOTE: Several SNG processes are described in Handbook Section on *Gas Technology*. SNG from waste materials is described in Handbook Section on *Chemical Fuels Technology*.

Fuel from Tar Sands	
Wood-to-Oil Process	
Synthoil Process	(See Handbook Section on <i>Gas Technology</i>)
<i>Transportation of Petroleum</i>	
Evolution of Pipelines in the United States	3-174
Pipeline Technology	(See Handbook Section on <i>Gas Technology</i>)
Railroad Transportation of Liquid and Gaseous Fuels	3-176
Seagoing Vessels for Transporting Liquid and Gaseous Fuels	3-196
Superports	3-207
<i>Petroleum Processing</i>	
Petroleum Refining and Processing	3-225
Hydrosulfurization of Petroleum Crude Oil Fractions and Petroleum Products	3-251
Petrochemical Complex	3-265
The Total Energy Concept in Refinery and Process Plant Planning	3-272

CHEMICAL FUELS TECHNOLOGY

Biochemical Sources of Fuels	4-5
Solid Waste Systems for Energy Generation	4-12
Hydrogen	4-26
Methyl Alcohol—A Potential Fuel for Transportation	4-44
Batteries	4-50
Electric Automobile	4-55
Fuel Cells	4-59
Propellants	4-74

NUCLEAR ENERGY TECHNOLOGY

Nuclear Fission Reactors	
Nuclear Power Plant—Concept to Startup	
<i>Thermal Reactors</i>	
Boiling Water Reactor	5-57
Pressurized Water Reactor	5-75
High-Temperature Gas-Cooled Reactors	5-87
<i>Fast Breeder Reactors</i>	
The Liquid Metal Fast Breeder Reactor	5-102
Gas-Cooled Fast Breeder Reactor	5-124
<i>Fusion Power</i>	
Fusion Power	5-137
Direct Energy Conversion in Fusion Reactors	5-150
Tritium Breeding Requirements in Fusion Reactor Blankets	5-155
Superconducting Magnets as Applied to Fusion Reactors	5-158
<i>Nuclear Fuels</i>	
Uranium Resources and Processing	5-173
Lithium for Thermonuclear Fusion Reactors	5-182

SOLAR ENERGY TECHNOLOGY

Heat Engines for Solar Power	6-6
Solar Tower Energy Collector	6-26
Solar Absorption Coating and Heat-Pipe System	6-34
High-Temperature Solar Energy	6-46
Solar Cells and Arrays	6-56
Solar Climate Control	6-81
Satellite Energy Systems for Earth Power	6-98
Ocean Thermal Energy Conversion	6-118

Photosynthesis	6-137
Electrical Energy from the Wind	6-142
GEOTHERMAL ENERGY TECHNOLOGY	
Geothermal Energy	7-4
Geothermal Energy in New Zealand	7-14
The Geysers Geothermal Field in California	7-34
Geothermal Energy for Space and Process Heating	7-43
HYDROPOWER TECHNOLOGY	
Hydropower	8-3
Tidal Energy	8-25
POWER TECHNOLOGY TRENDS	
<i>Conversion Systems—Steam</i>	
Steam Generation	9-17
Thermodynamics of Steam Cycles	9-23
Principles of Combustion in Steam Generation	9-34
Oil and Gas Burners	9-50
Coal-Burning Systems	9-59
Boilers and Associated Equipment	9-93
Controls for Fossil Fuel/Steam Energy Conversion	9-122
Steam Turbine Design Trends	9-163
<i>Conversion Systems—Steam-Combination, Gas, Diesel, and Other</i>	
Gasification as Basis for Combined-Cycle Operations	9-165
Coal Gasification for Electric Power Generation	9-171
Gas and Expansion Turbines	9-176
Superconducting Turbine Generators	9-202
Magnetohydrodynamic Generators and Thermionic Converters	9-209
Rail Power Systems	9-224
Thermoelectric Cooling	9-242
<i>Electric Power</i>	
Electric Power Production and Requirements	9-247
Trends in Electric Power Transmission	9-267
Trends in Technical Use of Computer Systems in the Power Industry	9-277
Electric Power and Energy Measurement	9-296
Dynamometers and Torque Measurements	9-305
<i>Effluent Systems</i>	
Wet Scrubbing Processes—SO _x and NO _x Removal Chemistry	9-312
Sulfur Dioxide Recovery (Wellman-Lord Process)	9-324
Claus Sulfur Recovery Units and Claus Off-Gas Treating	9-328
NO _x Control by Furnace and Burner Design	9-335
Methylcyclopentadienyl Manganese Tricarbonyl Combustion Improver	9-349
Utilizing Waste Heat from Air Compressors	9-351
Bio-Oxidation Process Reduces Water Use	9-354
<i>Emission Monitoring Systems</i>	
Source Monitoring of NO _x and SO ₂	9-362
Monitoring of Carbon Monoxide Emissions	9-376
Monitoring of Hydrocarbon Emissions	9-380
Particulate Emission Measurement Methods	9-391
