
CONTENTS

Section 1. Introductory Review 1.1

Section 2. Control System Fundamentals 2.1

Control Principles / 2.4
Techniques for Process Control / 2.31
Basic Control Algorithms / 2.60
Safety in Instrumentation and Control Systems / 2.87

Section 3. Controllers 3.1

Distributed Control Systems / 3.5
Programmable Controllers / 3.32
Stand-Alone Controllers / 3.54
Timers and Counters / 3.61
Hydraulic Controllers / 3.68
Pneumatic Controllers / 3.82
Batch Process Control / 3.96
Automatic Blending Systems / 3.110
Distributed Numerical Control and Networking / 3.117
Computers and Controls / 3.127

Section 4. Process Variables—Field Instrumentation 4.1

Temperature Systems / 4.7
Fluid Pressure Systems / 4.47
Flow Systems / 4.89
Fluid Level Systems / 4.130
Industrial Weighing and Density Systems / 4.156
Humidity and Moisture Systems / 4.163

Section 5. Geometric and Motion Sensors 5.1

Metrology, Position, Displacement, and Thickness Transducers, Surface Texture,
Quality Control, and Production Gaging / 5.4
Position Sensors and Transducers / 5.19
Quality Control and Production Gaging / 5.46
Object Detectors and Machine Vision / 5.60
Speed, Velocity, Acceleration, and Vibration Instrumentation / 5.89

Section 6. Physicochemical and Analytical Systems 6.1

Classification of Analysis Instruments / 6.5
Sampling for On-Line Analyzers / 6.12
pH and Redox Potential Measurements / 6.20

Electrical Conductivity Measurements / 6.33
Thermal-Conductivity Gas Analyzers / 6.39
Process Chromatography / 6.48
Oxygen Determination / 6.58
Gas and Process Analyzers / 6.66
Spectroterminology / 6.81
Refractometers / 6.82
Turbidity Measurement / 6.86
Rheological Systems / 6.92

Section 7. Control Communications

Data Signal Handling in Computerized Systems / 7.2 7.1
Noise and Wiring in Data Signal Handling / 7.29
Industrial Control Networks / 7.36

Section 8. Operator Interface

Operator Interface—Design Rationale / 8.3 8.1
Process Operator Task Analysis and Training / 8.27
Distributed Display Architecture / 8.34
Indicators, Recorders, and Loggers / 8.43
Annunciators and Hazard Management / 8.55

Section 9. Valves, Servos, Motors, and Robots

Process Control Valves / 9.4 9.1
Control-Valve Cavitation—An Overview / 9.42
Control-Valve Noise / 9.54
Servomotor Technology in Motion Control Systems / 9.61
Solid-State Variable-Speed Drives / 9.103
Robots / 9.118
Current-to-Pressure Transducers for Control-Valve Actuation / 9.134

Index / 1.1
