Contents

<i>List of Contributors</i>	xv
<i>Preface</i>	xvii
ART 1 PRINCIPLES OF OPERATION	1-1
<hr/>	
1 Basic Concepts	1-3
1.1 Components of Cells and Batteries	1-3
1.2 Operation of a Cell	1-4
1.3 Theoretical Cell Voltage and Capacity	1-7
1.4 Classification of Cells and Batteries	1-9
2 Electrochemical Principles and Reactions	2-1
2.1 History	2-1
2.2 Thermodynamic Background	2-1
2.3 Electrode Processes	2-2
2.4 Electrical Double-Layer Capacity and Ionic Adsorption	2-9
2.5 Mass Transport to the Electrode Surface	2-14
2.6 Electroanalytical Techniques	2-16
3 Considerations for Selection and Application of Batteries	3-1
3.1 General Characteristics	3-1
3.2 Factors Affecting Battery Capacity	3-2
3.3 Major Considerations in Selecting a Battery	3-14
3.4 Battery Applications	3-15
3.5 Comparative Features and Performance Characteristics	3-19

PART 2	PRIMARY BATTERIES	4-1
4	Introduction	4-3
4.1	General Characteristics and Applications of Primary Batteries	4-3
4.2	Types and Characteristics of Primary Batteries	4-5
4.3	Comparison of the Performance Characteristics of the Primary Battery Systems	4-10
4.4	Recharging Primary Batteries	4-21
4.5	Standardization of Primary Batteries	4-23
5	The Zinc-Carbon (Leclanche) Cell	5-1
5.1	General Characteristics	5-1
5.2	Chemistry	5-2
5.3	Types of Cells	5-3
5.4	Construction	5-4
5.5	Cell Components	5-7
5.6	Performance Characteristics	5-11
5.7	Special Designs	5-32
5.8	Cell and Battery Types and Sizes	5-36
6	Magnesium and Aluminum Cells	6-1
6.1	General Characteristics	6-1
6.2	Chemistry	6-2
6.3	Construction—Mg/MnO ₂ Cells	6-4
6.4	Performance Characteristics—Mg/MnO ₂ Cells	6-5
6.5	Cell Sizes and Types—Mg/MnO ₂ Cells	6-11
6.6	Other Types of Magnesium Primary Batteries	6-11
6.7	Aluminum Primary Cells	6-12
7	Alkaline Manganese Dioxide Cells	7-1
7.1	General Characteristics	7-1
7.2	Chemistry	7-2
7.3	Cell Components and Materials	7-3
7.4	Construction	7-7
7.5	Performance Characteristics	7-9
7.6	Cell and Battery Types and Sizes	7-13
8	Mercuric Oxide Cells	8-1
8.1	General Characteristics	8-1
8.2	Chemistry	8-2
8.3	Cell Components	8-2
8.4	Construction	8-6

8.5	Performance Characteristics: Zinc/Mercuric Oxide Cell	8-12
8.6	Performance Characteristics: Cadmium/Mercuric Oxide Cell	8-20
8.7	Cell Types and Sizes	8-23
8.8	Handling, Use and Disposal of Mercury Cells	8-23
8.9	Applications	8-25
9	Silver Oxide Cells	9-1
9.1	General Characteristics	9-1
9.2	Chemistry and Components	9-2
9.3	Cell Construction	9-4
9.4	Performance Characteristics	9-4
9.5	Cell Sizes and Types	9-10
9.6	Divalent Silver Oxide Cell	9-10
10	Zinc/Air Cells	10-1
10.1	General Characteristics	10-1
10.2	Chemistry	10-2
10.3	Construction	10-3
10.4	Performance Characteristics—Button Cells	10-7
10.5	Performance Characteristics—Industrial Batteries	10-20
11	Lithium Cells	11-1
11.1	General Characteristics	11-1
11.2	Chemistry	11-5
11.3	Characteristics of Lithium Primary Batteries	11-10
11.4	Safety and Handling of Lithium Batteries	11-19
11.5	Lithium/Sulfur Dioxide (Li/SO ₂) Cells	11-21
11.6	Lithium/Thionyl Chloride (Li/SOCl ₂) Cells	11-31
11.7	Lithium/Oxychloride Cells	11-42
11.8	Lithium/Manganese Dioxide (Li/MnO ₂) Cells	11-47
11.9	Lithium/Carbon Monofluoride [Li/(CF) _n] Cells	11-55
11.10	Lithium/Copper Sulfide (Li/CuS) Cells	11-62
11.11	Lithium/Copper Oxide (Li/CuO) Cells	11-69
11.12	Lithium/Iron Sulfide (Li/FeS ₂ and Li/FeS) Cells	11-74
11.13	Lithium/Bismuthate (Li/Bi ₂ Pb ₂ O ₇ and Li/Bi ₂ O ₇) Cells	11-79
11.14	Lithium/Silver Chromate (Li/Ag ₂ CrO ₄) Cells	11-81
11.15	Lithium/Chromium Oxide (Li/CrO ₃) Cells	11-83
12	Solid-Electrolyte Batteries	12-1
12.1	General Characteristics	12-1
12.2	Li/LiI (Al ₂ O ₃)/Metal Salt Cells	12-3
12.3	The Lithium/Iodine Cell	12-9
12.4	Other Solid-Electrolyte Cells	12-21

PT 3	SECONDARY BATTERIES	13-1
<hr/>		
Introduction		13-3
13.1	General Characteristics and Applications of Secondary Batteries	13-3
13.2	Types and Characteristics of Secondary Batteries	13-5
13.3	Comparison of the Performance Characteristics of the Secondary Battery Systems	13-9
13.4	Standardization of Secondary Batteries	13-20
D-ACID BATTERIES		
Lead-Acid Batteries		14-1
14.1	General Characteristics	14-1
14.2	Chemistry	14-6
14.3	Constructional Features, Materials and Manufacturing Methods	14-14
14.4	SLI (Automotive) Batteries: Construction and Performance	14-34
14.5	Deep-Cycle and Traction Batteries: Construction and Performance	14-51
14.6	Stationary Batteries: Construction and Performance	14-61
14.7	Portable Lead-Acid Batteries: Construction and Performance	14-74
14.8	Charging and Charging Equipment	14-79
14.9	Maintenance, Safety and Operational Features	14-92
14.10	Applications and New Markets	14-99
Sealed Lead-Acid Batteries		15-1
15.1	General Characteristics	15-1
15.2	Chemistry	15-2
15.3	Cell Construction	15-3
15.4	Performance Characteristics	15-4
15.5	Charging Characteristics	15-17
15.6	Safety and Handling	15-27
15.7	Cell Types and Sizes	15-28
KEL-CADMIUM BATTERIES		
Vented Pocket Plate Nickel-Cadmium Batteries		16-1
16.1	General Characteristics	16-1
16.2	Chemistry	16-2
16.3	Construction	16-2
16.4	Performance Characteristics	16-4
16.5	Charging Characteristics	16-11

16.6	Manufacturers and Cell Sizes	16-12
16.7	Applications	16-13
17	Vented Sintered-Plate Nickel-Cadmium Batteries	17-1
17.1	General Characteristics	17-1
17.2	Chemistry	17-2
17.3	Construction	17-3
17.4	Performance Characteristics	17-6
17.5	Charging Characteristics	17-16
17.6	Maintenance Procedures	17-20
17.7	Reliability	17-23
17.8	Cell and Battery Designs	17-26
18	Sealed Nickel-Cadmium Batteries	18-1
18.1	General Characteristics	18-1
18.2	Chemistry	18-2
18.3	Cell Construction	18-3
18.4	Performance Characteristics	18-5
18.5	Charging Characteristics	18-14
18.6	Cell Types and Sizes	18-17
OTHER ALKALINE SYSTEMS		
19	Nickel-Zinc Batteries	19-1
19.1	General Characteristics	19-1
19.2	Chemistry	19-2
19.3	Cell Components	19-2
19.4	Construction	19-6
19.5	Performance Characteristics	19-10
19.6	Charging Characteristics	19-14
19.7	Applications	19-16
19.8	Special Handling	19-18
20	Iron Electrode Systems	20-1
20.1	General Characteristics	20-1
20.2	Chemistry	20-2
20.3	Conventional Nickel-Iron Batteries	20-4
20.4	New Developments	20-12
21	Silver Oxide Batteries	21-1
21.1	General Characteristics	21-1
21.2	Chemistry	21-3

CONTENTS

21.3	Cell Construction and Components	21-3
21.4	Performance Characteristics	21-7
21.5	Charging Characteristics	21-16
21.6	Cell Types and Sizes	21-17
21.7	Special Features and Handling	21-18
21.8	Applications	21-21
21.9	Recent Developments	21-23

HYDROGEN SYSTEMS

2 Nickel-Hydrogen Batteries 22-1

22.1	General Characteristics	22-1
22.2	Chemistry	22-2
22.3	Cell Design and Construction	22-3
22.4	Ni-H ₂ Battery Design and Construction	22-8
22.5	Performance Characteristics	22-12

3 Silver-Hydrogen Batteries 23-1

23.1	General Characteristics	23-1
23.2	Chemistry	23-1
23.3	Cell Components	23-2
23.4	Cell Construction	23-4
23.5	Performance Characteristics	23-5
23.6	Charging and Charge Control	23-6

OTHER RECHARGEABLE SYSTEMS—PORTABLE TYPES

Rechargeable "Primary Type" Batteries 24-1

24.1	General Characteristics	24-1
24.2	Rechargeable Zinc/Alkaline/Manganese Dioxide Cells	24-1
24.3	Rechargeable Zinc/Silver Oxide Button Cells	24-3

Lithium Batteries (Ambient Temperature) 25-1

25.1	General Characteristics	25-1
25.2	Chemistry	25-1
25.3	Cell Design and Performance Characteristics—LiAl/TiS ₂ Cells	25-3
25.4	Engineering Prototype Cells	25-5
25.5	New Developments	25-6

PART 4	ADVANCED SECONDARY BATTERIES	26-1
26	Introduction	26-3
26.1	Performance Requirements for Advanced Secondary Batteries	26-3
26.2	Types and Characteristics of Advanced Battery Systems	26-6
26.3	Near-Term Advanced Secondary Batteries	26-7
26.4	Advanced Secondary Batteries—General Characteristics	26-11
27	Aqueous Redox Flow Cells	27-1
27.1	General Characteristics	27-1
27.2	Description of Electrochemical System	27-2
27.3	Construction	27-3
27.4	Performance Characteristics	27-5
27.5	Applications and System Design	27-7
28	Zinc/Chlorine Batteries	28-1
28.1	General Characteristics	28-1
28.2	Description of Electrochemical System	28-1
28.3	Construction	28-4
28.4	Performance Characteristics	28-5
28.5	Applications and System Design	28-7
29	Zinc/Bromine Batteries	29-1
29.1	General Characteristics	29-1
29.2	Description of Electrochemical System	29-1
29.3	Construction	29-3
29.4	Performance Characteristics	29-6
29.5	Applications and System Design	29-8
30	Metal/Air Batteries	30-1
30.1	General Characteristics	30-1
30.2	Zinc/Air Batteries	30-2
30.3	Lithium/Air Batteries	30-7
30.4	Aluminum/Air Batteries	30-10
31	Lithium/Iron Sulfide Batteries	31-1
31.1	General Characteristics	31-1
31.2	Description of Electrochemical System	31-1
31.3	Construction	31-2

31.4	Performance Characteristics	31-4
31.5	Applications and System Design	31-9

Sodium/Sulfur Batteries	32-1
-------------------------	------

32.1	General Characteristics	32-1
32.2	Description of Electrochemical System	32-2
32.3	Hollow-Fiber Sodium/Sulfur Battery	32-3
32.4	Ceramic Tube Sodium/Sulfur Battery—Design 1	32-8
32.5	Ceramic Tube Sodium/Sulfur Battery—Design 2	32-15
32.6	Applications and System Design	32-20

P T 5	RESERVE AND SPECIAL BATTERIES	33-1
--------------	--------------------------------------	-------------

Introduction	33-3
--------------	------

33.1	Classification of Reserve Batteries	33-3
33.2	Characteristics of Reserve Batteries	33-4

Water-Activated Batteries	34-1
---------------------------	------

34.1	General Characteristics	34-1
34.2	Chemistry	34-2
34.3	Types of Water-Activated Batteries	34-3
34.4	Construction	34-4
34.5	Performance Characteristics	34-11
34.6	New Developments	34-23
34.7	Battery Application	34-24

Lithium/Water Batteries	35-1
-------------------------	------

35.1	General Characteristics	35-1
35.2	Chemistry	35-2
35.3	General System Description	35-5
35.4	Characteristics of Specific Systems	35-7
35.5	Special Features and Handling	35-11

Zinc/Silver Oxide Reserve Batteries	36-1
-------------------------------------	------

36.1	General Characteristics	36-1
36.2	Chemistry	36-2
36.3	Construction	36-2
36.4	Performance Characteristics	36-7
36.5	Cell and Battery Types and Sizes	36-12
36.6	Special Features and Handling	36-12
36.7	Cost	36-14

37	Spin-Activated Batteries	37-1
37.1	General Characteristics	37-1
37.2	Chemistry	37-3
37.3	Design Considerations	37-4
37.4	Performance Characteristics	37-5
38	Ammonia Batteries	38-1
38.1	General Characteristics	38-1
38.2	Chemistry	38-2
38.3	Construction	38-3
38.4	Performance Characteristics	38-7
38.5	Battery Types and Characteristics	38-8
39	Ambient-Temperature Lithium Anode Reserve Batteries	39-1
39.1	General Characteristics	39-1
39.2	Chemistry	39-2
39.3	Construction	39-4
39.4	Performance Characteristics	39-11
39.5	Battery Types and Characteristics	39-17
40	Thermal Batteries	40-1
40.1	General Characteristics	40-1
40.2	Description of Electrochemical Systems	40-2
40.3	Chemistry	40-5
40.4	Cell Construction	40-6
40.5	Performance Characteristics	40-9
40.6	Testing and Life Surveillance	40-12
40.7	Lithium Anode Thermal Batteries	40-13
PART 6 FUEL CELLS		41-1
41	General Characteristics	41-3
41.1	Description of the Fuel Cell	41-3
41.2	Properties of Fuel Cell Power Plants	41-4
41.3	Operation of the Fuel Cell	41-5
41.4	Major Components of the Fuel Cell	41-7
41.5	General Performance Characteristics	41-8
41.6	Classification of Fuel Cell Systems	41-9
41.7	Descriptions of Fuel Cell Systems	41-11

CONTENTS

Low-Power Fuel Cell Systems	42-1
42.1 General Characteristics	42-1
42.2 Spacecraft Fuel-Cell Systems	42-2
42.3 Portable Fuel Cells (1 to 100 W)	42-6
42.4 Indirect Methanol Fuel Cell Power Plants	42-11
Utility Fuel Cell Power Plants	43-1
43.1 General Characteristics	43-1
43.2 Utility Fuel Cell Power Plant Programs	43-4
43.3 Phosphoric Acid Fuel Cells	43-6
43.4 Molten-Carbonate Fuel Cells	43-18
43.5 High-Temperature Solid-Oxide Fuel Cells	43-26
43.6 Prognosis	43-31

T 7 APPENDICES

Definitions	A-1
Standard Reduction Potential	B-1
Properties of Battery Materials	C-1
Standard Symbols and Constants	D-1
Conversion Factors	E-1
Bibliography	F-1
Major Battery Manufacturers	G-1
<i>Index follows Appendices</i>
