Preface

vii

1. PHOTOELECTRIC AND NOISE CHARACTERISTICS OF PHOTODETECTORS

1.1 Introduction	1
1.2 Generation of Free Carriers in Semiconductors	6
1.3 Photoelectric Characteristics of Resistive Photodetectors	13
1.4 Photodetectors with P-N Junction	17
1.5 Elements of the Theory of Random Processes	22
1.6 Internal Noise in Photodetectors	31
1.7 Concepts of Noise Coefficient and Noise Temperature	41
1.8 Thermal and Quantum Noises. Elements of Microwave Radiometry	45

2. PHYSICAL PRINCIPLES OF INFRARED RADIOMETRIC SYSTEMS

2.1 Basic Characteristics of IR-Detectors	51
2.2 Threshold Characteristics of Photodetectors	53
2.3 Threshold Characteristics of IR Detectors and IR-Radiometer Design Principles	63
2.4 IR-Radiometer with External Modulation	72
2.5 IR-Radiometers with Internal Modulation	79
2.6 Methods of Calibration of IR-Radiometric Systems	86

3. GROWING TECHNOLOGY AND ELECTRO-PHYSICAL CHARACTERISTICS OF SOLID SOLUTIONS *PbSnTe*, *PbSnSe* and *CdHdTe*

3.1 Introduction	93
3.2 Physico-Chemical Properties of Solid Solutions <i>Pb_{1-x}Sn_xTe</i> , <i>Pb_{1-x}Sn_xSe</i> , and <i>Cd_xHg_{1-x}Te</i>	94
3.2.1 <i>PbTe - SnTe (Pb_xSn_xTe)</i>	94

3.2.2	<i>PbSe - SnSe (Pb_{1-y}Sn_ySe)</i>	99
3.2.3	<i>CdTe-HgTe (Cd_xHg_{1-x}Te)</i>	101
3.3	Technology for Growing the Single Crystals, Epitaxial Films, and Photo-Diode Structures	104
3.4	Growing Single Crystals of <i>Pb_{1-x}Sn_xTe</i> , [(<i>Pb_{1-x}Sn_x</i>) _{1-y} In _y]Te and [(<i>Pb_{1-x}Sn_x</i>) _{1-y} Cd _y]Te	110
3.4.1	Polycrystalline Material	110
3.4.2	Growing the Single Crystals of <i>Pb_{1-x}Sn_xTe</i> and <i>Pb_{1-x}Sn_xTe<In,Cd></i>	115
3.4.3	Electrical and Structural Characteristics of Single Crystals	118
3.4.4	Technology for Growing the Epitaxial Films of <i>Pb_{1-x}Sn_xTe</i> , and <i>Pb_{1-x}Sn_xTe<In></i>	120
3.5	Multi-Element Photodetectors	
3.5.1	Linear Arrays of <i>Pb_{1-x}Sn_xTe</i> Photo-Diodes	125
3.5.2	Photo-Conductivity of <i>Pb_{1-x}Sn_xTe<In></i> at Microwaves ($\lambda = 4-5$ mm)	129
3.5.3	Linear arrays of photosensitive field-effect transistors with easily reproducible technology	132
