

# CLUSTER-BASED INDUSTRIAL DEVELOPMENT

An East Asian Model

*Tetsushi Sonobe and Keiji Otsuka*

# Contents

<i>List of Figures</i>	ix
<i>List of Tables</i>	x
<i>Preface</i>	xiv
<b>1 Introduction</b>	<b>1</b>
1.1 Roles of industrial clusters	4
1.2 Economic geography	6
1.3 Empirical studies of industrial clusters	11
1.4 Globalization and industrial clusters	15
1.5 Theory of product life cycle	18
1.6 Summary	20
<b>2 The Development of Industrial Clusters in East Asia</b>	<b>22</b>
2.1 Similarities of development patterns	22
2.2 Study sites	23
2.3 An endogenous process of industrial development	27
2.4 Scope of the book	33
<b>3 The Geography of Industrial Development in East Asia</b>	<b>35</b>
3.1 Dispersion of industries in Tokyo and its vicinity	36
3.2 Development of suburban clusters in Taiwan	44
3.3 Development of clusters in the Southern Yangtze River region	50
3.4 Setting of the case studies in East Asia	58
<b>4 An Inquiry into Merchant-Led Industrialization: The Garment Industries in Zhejiang and Hiroshima</b>	<b>60</b>
4.1 Hypotheses	61
4.2 The Chinese case	64
4.3 The Japanese case	74
4.4 Concluding remarks	86
<b>5 An Inquiry into Engineer-Led Industrialization: The Motorcycle Industries in Japan and Chongqing</b>	<b>87</b>
5.1 Hypotheses	88
5.2 The Japanese case	90
5.3 The Chinese case	102
5.4 Concluding remarks	115

<b>6</b>	<b>Innovation in Industrial Clusters: The Machine Tool Industry in Taichung and the Low-Voltage Electric Appliance Industry in Wenzhou</b>	<b>117</b>
6.1	Hypotheses	119
6.2	The Taiwanese case	120
6.3	The Chinese case	138
6.4	Concluding remarks	154
<b>7</b>	<b>The Changing Roles of Imitation and Innovation in Industrial Clusters: The Printed Circuit Board Industry in Northern Taiwan and Jiangsu Province</b>	<b>156</b>
7.1	Hypotheses	158
7.2	The Chinese case	159
7.3	The Taiwanese case	172
7.4	Concluding remarks	182
<b>8</b>	<b>Towards an Endogenous Model of Industrial Development</b>	<b>184</b>
8.1	A summary of the findings	185
8.2	An endogenous model of cluster-based industrial development	190
8.3	A strategy of industrial development in the globalizing world	200
8.4	Issues of future research	205
	Appendix: A formal model of innovation and imitation	206
	<i>Notes</i>	210
	<i>References</i>	222
	<i>Author Index</i>	236
	<i>Subject Index</i>	240

# List of Figures

2.1	Illustrated changes in quantity of production and productivity in the course of industrial development	30
3.1	Map of the Greater Tokyo region	38
3.2	Map of study areas in Taiwan	45
3.3	Map of study areas in China	51
4.1	Location of Bingo garment cluster in Hiroshima prefecture	61
5.1	The number of operating enterprises, entries, and exits in the motorcycle industry in Japan	91
5.2	Annual growth rate of total motorcycle production in Japan	92
5.3	Average quality of engines by surviving and exiting enterprises in Japan	94
5.4	The numbers of motorcycle enterprises and motorcycles produced in China, 1980–2003	103
6.1	Changes in the real value of production and NC ratio in the machine tool industry in Taiwan	121
6.2	Changes in export values in the machine tool industry in Taiwan by product type and enterprise group, 1990–99	131
6.3	Index of real GDP per capita in the Yueqing cluster, Wenzhou city, and China, 1978–2001 (China in 1978 = 100)	139
6.4	Average value added by enterprise type relative to the innovator in Wenzhou	147
7.1	Genealogy of the printed circuit board enterprises starting from Taiwan AMPEX	174
8.1	Market equilibrium in the initiation phase	191
8.2	Market equilibrium in the quantity expansion phase	193
8.3	Cluster-based industrial development strategy	201
8.A.1	Private marginal benefit and marginal cost of innovation attempts	208
8.A.2	Gap between social and private marginal benefits of innovation attempts	209
