SIXTH EDITION

Elementary Statistics A Step by Step Approach

Annotated Instructor's Edition

Allan G. Bluman

Contents

Preface xi

CHAPTER

The Nature of Probability and Statistics 1

- 1-2 Descriptive and Inferential Statistics 3
- 1-3 Variables and Types of Data 6
- Data Collection and Sampling 1-4 Techniques 9
 - Random Sampling 10
 - Systematic Sampling 12
 - Stratified Sampling 12
 - Cluster Sampling 12
 - Other Sampling Methods 13
- 1-5 Observational and Experimental Studies 13
- 1-6 Uses and Misuses of Statistics 16

Suspect Samples 17 Ambiguous Averages 17 Changing the Subject 17 Detached Statistics 18 Implied Connections 18

- Misleading Graphs 18
- Faulty Survey Questions 18
- 1-7 Computers and Calculators 19
- 1-8 Summary 24

CHAPTER

Frequency Distributions and Graphs 33

- 2-1 Introduction 34
- 2-2 Organizing Data 35

Categorical Frequency Distributions 36 Grouped Frequency Distributions 37

Histograms, Frequency Polygons, 2-3 and Ogives 48 The Histogram 48 The Frequency Polygon 50

The Ogive 51 Relative Frequency Graphs 53 Distribution Shapes 55

- 2 4Other Types of Graphs 63 Pareto Charts 64 The Time Series Graph 65 The Pie Graph 66 Misleading Graphs 70 Stem and Leaf Plots 73
- 2-5 Summary 86

CHAPTER

Data Description 95

- 3-1 Introduction 96
- 3-2 Measures of Central Tendency 97 The Mean 98 The Median 101 The Mode 103 The Midrange 105 The Weighted Mean 106 Distribution Shapes 108 3-3 Measures of Variation 115

Range 116 Population Variance and Standard Deviation 117 Sample Variance and Standard Deviation 119 Variance and Standard Deviation for Grouped Data 121 Coefficient of Variation 124 Range Rule of Thumb 125 Chebyshev's Theorem 125 The Empirical (Normal) Rule 127

3-4 Measures of Position 133 Standard Scores 133 Percentiles 135 Quartiles and Deciles 141 Outliers 142
3-5 Exploratory Data Analysis 152

The Five-Number Summary and Boxplots 153

3–6 Summary 161

CHAPTER

Probability and Counting Rules 171

- **4–2** Sample Spaces and Probability 173 Basic Concepts 173 Classical Probability 176 Complementary Events 179 Empirical Probability 181 Law of Large Numbers 183 Subjective Probability 183 Probability and Risk Taking 184
- 4-3 The Addition Rules for Probability 1894-4 The Multiplication Rules and Conditional

Probability 199 The Multiplication Rules 199 Conditional Probability 204 Probabilities for "At Least" 207

4–5 Counting Rules 212 The Fundamental Counting Rule 212 Factorial Notation 215 Permutations 215 Combinations 217

4–6 Probability and Counting Rules 223

4-7 Summary 227

CHAPTER

Discrete Probability Distributions 237

- 5-1 Introduction 2385-2 Probability Distributions 239
- **5-3** Mean, Variance, Standard Deviation, and Expectation 245 *Mean 245*

- Variance and Standard Deviation 248 Expectation 250
- 5-4 The Binomial Distribution 256
- **5–5** Other Types of Distributions (Optional) 2 The Multinomial Distribution 269 The Poisson Distribution 270 The Hypergeometric Distribution 272
- 5-6 Summary 278

CHAPTER 6

The Normal Distribution 285

- 6-1 Introduction 286
- **6–2** Properties of a Normal Distribution 288
- 6-3 The Standard Normal Distribution 290

Finding Areas Under the Standard Normal Distribution Curve 291

A Normal Distribution Curve as a Probability Distribution Curve 299

6–4 Applications of the Normal Distribution 3 Finding Data Values Given Specific Probabilities 311

Determining Normality 313

- **6–5** The Central Limit Theorem 322 Distribution of Sample Means 322 Finite Population Correction Factor (Optiona
- **6–6** The Normal Approximation to the Binomia Distribution 331
- 6-7 Summary 338

CHAPTER

Confidence Intervals and **Sample Size** 347

- 7-1 Introduction 348
- **7–2** Confidence Intervals for the Mean (σ Known or $n \ge 30$) and Sample Size 349 Confidence Intervals 350

Sample Size 355

- **7–3** Confidence Intervals for the Mean (σ Unknown and n < 30) 362
- 7-4 Confidence Intervals and Sample Size for Proportions 369

Confidence Intervals 370

Sample Size for Proportions 371

ix

- 7-5 Confidence Intervals for Variances and Standard Deviations 377
- 7-6 Summary 384

Hypothesis Testing 391

- Steps in Hypothesis 8-2 Testing-Traditional Method 393
- 8-3 z Test for a Mean 405 P-Value Method for Hypothesis Testing 410
- 8-4 t Test for a Mean 419
- 8-5 z Test for a Proportion 429
- **8-6** χ^2 Test for a Variance or Standard **Deviation 437**
- 8-7 Additional Topics Regarding Hypothesis Testing 449

Confidence Intervals and Hypothesis Testing 449 Type II Error and the Power of a Test 451

8-8 Summary 453

CHAPTER

Testing the Difference Between Two Means, Two Variances, and Two Proportions 463

- 9-1 Introduction 464
- 9-2 Testing the Difference Between Two Means: Large Samples 465
- Testing the Difference Between 9-3 Two Variances 477
- 9-4 Testing the Difference Between Two Means: Small Independent Samples 487
- 9-5 Testing the Difference Between Two Means: Small Dependent Samples 497
- 9-6 Testing the Difference Between Proportions 509
- 9-7 Summary 517 Hypothesis-Testing Summary 1 525

Correlation and Regression 527

10-1 Introduction 528 10-2 Scatter Plots 529

10-3 Correlation 533

Correlation Coefficient 533 The Significance of the Correlation Coefficient 536 Correlation and Causation 540

10-4 Regression 544

Line of Best Fit 545 Determination of the Regression Line Equation 545

10-5 Coefficient of Determination and Standard Error of the Estimate 558 Types of Variation for the Regression Model 558 Coefficient of Determination 561 Standard Error of the Estimate 561

Prediction Interval 563

- **10–6** Multiple Regression (Optional) 566 The Multiple Regression Equation 568 Testing the Significance of R 570 Adjusted R² 571
- 10-7 Summary 575

CHAPTER

Other Chi-Square Tests 583

- 11-1 Introduction 584
- 11-2 Test for Goodness of Fit 585 Test of Normality (Optional) 590

11-4 Summary 612

CHAPTER

Analysis of Variance 619

- 12-1 Introduction 620
- 12-2 One-Way Analysis of Variance 621
- 12-3 The Scheffé Test and the Tukey Test 629 Scheffé Test 630 Tukey Test 631
- 12-4 Two-Way Analysis of Variance 636
- 12-5 Summary 650 Hypothesis-Testing Summary 2 657
