<i>Woodhead Publishing Series in Textiles</i>	<i>xvii</i>	
Part I		
General aspects of dyeing	1	
1	Fundamental principles of dyeing	3
	M. CLARK, University of Leeds, UK	
1.1	Introduction	3
1.2	Principles of dyeing	3
1.3	Exhaust dyeing	4
1.4	Continuous dyeing	6
1.5	Printing	7
1.6	Classification systems for dyes	8
1.7	Classification of dyes by dye class	11
1.8	Conclusion	25
1.9	References	26
2	Structure and properties of textile materials	28
	S. GRISHANOV, De Montfort University, UK	
2.1	Introduction	28
2.2	Classification and properties of textile fibres	29
2.3	Fibre properties related to textile technology	32
2.4	Classification and properties of basic textile products	34
2.5	Physical chemistry of fibre polymers	42
2.6	Cellulosic fibres	49
2.7	Protein fibres	51
2.8	Man-made fibres	54
2.9	Sources of further information and advice	60
2.10	References	61

3	Pre-treatment and preparation of textile materials prior to dyeing	64
	A. K. ROY CHOUDHURY, Government College of Engineering and Textile Technology, Serampore, India	
3.1	Introduction	64
3.2	Impurities in textile fibres	65
3.3	Aims of preparatory processes	68
3.4	Preparation of cotton materials	69
3.5	Inspection and mending	69
3.6	Shearing and cropping	70
3.7	Singeing	72
3.8	Enzymatic processing	75
3.9	Desizing process	78
3.10	Scouring of cotton and other cellulosic fibres	86
3.11	Mercerisation	97
3.12	Preparation of proteineous materials	103
3.13	Carbonisation and scouring of wool	103
3.14	Shrink-resist treatment for wool	106
3.15	Degumming of silk	108
3.16	Preparation of synthetic materials	114
3.17	Bleaching	121
3.18	Improvement of whiteness	143
3.19	References	147
4	Chemistry of dyeing	150
	D. P. CHATTOPADHYAY, The Maharaja Sayajirao University of Baroda, India	
4.1	Fundamental principles of direct dyeing	150
4.2	Fundamental principles of reactive dyeing	157
4.3	Fundamental principles of disperse dyeing	162
4.4	Fundamental principles of acid dyeing	164
4.5	Fundamental principles of azoic dyeing	167
4.6	Fundamental principles of vat dyeing	173
4.7	Fundamental principles of sulphur dyeing	179
4.8	Conclusions	181
4.9	References	182

5	Thermodynamics and kinetics of dyeing and dyebath monitoring systems	184
	M. FERUS-COMELO, SmartLab Ltd, UK	
5.1	Introduction	184
5.2	Thermodynamics of dyeing	184
5.3	Kinetics of dyeing	192
5.4	Dyebath monitoring systems	198
5.5	Sources of further information	202
5.6	References	202
5.7	Appendix: mathematical symbols	206
6	An overview of dye fastness testing	207
	J. N. CHAKRABORTY, National Institute of Technology, Jalandhar, India	
6.1	Introduction	207
6.2	Overview of dye fastness testing	207
6.3	Grading of fastness properties	209
6.4	Factors influencing dye fastness	210
6.5	Application	213
6.6	Conclusions	221
6.7	Sources of further information and advice	222
6.8	References	222
7	Molecular modeling and predicting dye properties	225
	A. EL-SHAFEI, D. HINKS and H. S. FREEMAN, North Carolina State University, USA	
7.1	Introduction	225
7.2	Prediction of wavelength of maximum absorption	226
7.3	Effect of crystal packing on λ_{\max}	232
7.4	<i>Ab initio</i> calculations of crystal structures	239
7.5	Quantitative-structure activity relationship in dye-fiber affinity prediction	240
7.6	References	242
8	Methods and machinery for the dyeing process	245
	G. P. NAIR, Technical Advisor (Textiles), Technocrat Society, India	
8.1	Introduction	245
8.2	Jiggers	246
8.3	Beam dyeing machines	253

viii	Contents	
8.4	Winches	256
8.5	Jet dyeing machines with hydraulic flow system	257
8.6	Airflow dyeing machines with aerodynamic flow system	264
8.7	Atmospheric softflow/overflow dyeing machines	269
8.8	HT softflow/overflow dyeing machines	274
8.9	Machines to dye fabric in rope/open-width form	277
8.10	Semi-continuous and continuous open-width dyeing machines	278
8.11	Future trends	291
8.12	References	296
8.13	Appendix: list of machinery manufacturers	298
Part II	Dye types and processes	301
9	The chemistry of reactive dyes and their application processes D. M. LEWIS, University of Leeds, UK	303
9.1	Introduction	303
9.2	The history of reactive dye development	304
9.3	Chemistry of commercially available reactive dyes	307
9.4	The application of reactive dyes to cellulosic fibres	330
9.5	The application of reactive dyes to natural and synthetic polyamide fibres	337
9.6	Miscellaneous methods to covalently bond dyes to fibres	347
9.7	Conclusions	357
9.8	References	359
10	Disperse dyes M. L. GULRAJANI, Indian Institute of Technology, Delhi, India	365
10.1	Introduction	365
10.2	Developments in disperse dyes	367
10.3	Types of disperse dye	373
10.4	Properties of disperse dyes	386
10.5	Future trends	387
10.6	References	391
11	Natural dyes B. H. PATEL, The Maharaja Sayajirao University of Baroda, India	395

11.1	Introduction	395
11.2	Classification of natural dyes	396
11.3	Chemistry of natural dyes	402
11.4	Chemistry and types of mordants	412
11.5	Application of mordants to textiles	414
11.6	Application of natural dyes to textiles	416
11.7	Fastness properties of natural dyes	418
11.8	Future trends	421
11.9	Sources of further information and advice	421
11.10	References	421
12	Direct dyes	425
	N. SEKAR, Institute of Chemical Technology Mumbai, India	
12.1	Introduction	425
12.2	Classification of direct dyes according to dyeing characteristics	426
12.3	Classification based on chemical structure	428
12.4	Bisazine dyes and copper phthalocyanine dyes	441
12.5	Future trends	443
12.6	Sources of further information and advice	443
12.7	References	443
13	Metal-complex dyes	446
	J. N. CHAKRABORTY, National Institute of Technology, Jalandhar, India	
13.1	Introduction	446
13.2	General properties	447
13.3	Chemistry of dyes	449
13.4	Classification and nomenclature	452
13.5	Mordant dyes	454
13.6	Premetallised dyes	457
13.7	Fastness of dyed fabrics	461
13.8	The problem of waste water	461
13.9	Future trends	462
13.10	Sources of further information and advice	463
13.11	References	463
14	Sulphur dyes	466
	J. N. CHAKRABORTY, National Institute of Technology, Jalandhar, India	
14.1	Introduction	466

14.2	Properties of sulphur dyes	467
14.3	Chemistry of sulphur dyes	468
14.4	Synthesis	469
14.5	Classification of sulphur dyes	471
14.6	Practical application	472
14.7	Reducing systems	475
14.8	Oxidising agents	478
14.9	Bronzing of dyeing	479
14.10	Fastness of dyed textiles	479
14.11	Tendering effect on cellulose	480
14.12	Waste-water load from sulphur dyebath	480
14.13	Strengths and limitations	481
14.14	Stripping of sulphur dyes	482
14.15	Future trends	482
14.16	Sources of further information and advice	483
14.17	References	483
15	Acid dyes	486
	N. SEKAR, Institute of Chemical Technology Mumbai, India	
15.1	Introduction	486
15.2	Classification of acid dyes	487
15.3	Azo acid dyes	489
15.4	Anthraquinone dyes	499
15.5	Acid nitro dyes	504
15.6	Triphenylmethane acid dyes	505
15.7	Water-repellent dyes	509
15.8	Acid dyes with inherent light fastness	509
15.9	Acid dyes free from 1-naphthylamine	510
15.10	Future trends	510
15.11	Sources of further information and advice	510
15.12	References	511
16	Environmentally friendly dyes	515
	R. B. CHAVAN, Bahir Dar University, Ethiopia	
16.1	Introduction	515
16.2	Classification of dyes	517
16.3	Environmental issues in dyeing	524
16.4	Environmentally friendly dyeing of cotton with reactive dyes	545
16.5	Alternative reducing systems for the dyeing of cotton with vat and sulphur dyes	549

16.6	Environmentally friendly dyeing of wool	551
16.7	Environmentally friendly dyeing of polyester	552
16.8	Future trends	554
16.9	References	556
17	Fluorescent dyes	562
	R. M. CHRISTIE, Heriot-Watt University, UK	
17.1	Introduction	562
17.2	Fluorescence	563
17.3	Chemical types of fluorescent dye	567
17.4	Textile applications of fluorescent dyes	577
17.5	Other applications of fluorescent dyes	580
17.6	Future trends	583
17.7	Sources of further information	584
17.8	References	585
18	Near-infrared dyes	588
	S.-H. KIM, Kyungpook National University, South Korea and Y.-A. SON, Chungnam National University, South Korea	
18.1	Introduction	588
18.2	Properties of near-infrared (NIR) dyes	589
18.3	Types of NIR dyes	590
18.4	Applications	595
18.5	Future trends	598
18.6	References	599
19	Azoic dyeing	604
	D. P. CHATTOPADHYAY, The Maharaja Sayajirao University of Baroda, India	
19.1	Introduction	604
19.2	Advantages and disadvantages of azoic dyeing	605
19.3	Chemistry of azoic dyeing	605
19.4	Colours obtainable using azoic components	608
19.5	Methods for dissolution of naphthol	608
19.6	Naphtholation and dyeing of cotton	610
19.7	Intermediate treatments	612
19.8	Development	613
19.9	After-treatment	621
19.10	Dyeing of silk	621

xii Contents

19.11	Dyeing of polyester	621
19.12	Dyeing of nylon	622
19.13	Fastness properties	622
19.14	Stripping of azoic colours	622
19.15	Environmental issues associated with azoic colours	623
19.16	Conclusion	625
19.17	References	625
	<i>Index</i>	627

WOODHEAD PUBLISHING SERIES IN TEXTILES

Handbook of textile and industrial dyeing

Volume 2: Applications of dyes

<i>Contributor contact details</i>	<i>ix</i>
<i>Woodhead Publishing Series in Textiles</i>	<i>xi</i>
Part I Textile applications	1
1 The colouration of wool	3
D. M. LEWIS, The University of Leeds, UK	
1.1 Introduction	3
1.2 Overview of industry practice	5
1.3 The theoretical basis of wool dyeing	6
1.4 Environmental impact of wool colouration processes	15
1.5 Reactive dyes for wool	22
1.6 Wool protection during dyeing by using reactive dyes and/or anti-setting agents	24
1.7 Ink-jet printing of wool fabrics	32
1.8 References	35
2 Dyeing of synthetic fibres	40
A. K. ROY CHOUDHURY, Government College of Engineering and Textile Technology, Serampore, India	
2.1 Introduction	40
2.2 Mass colouration	41
2.3 Disperse dyes	47
2.4 Disperse dyes on acetate fibres	63
2.5 Disperse dyes on polyester fibres	63
2.6 Disperse dyes on texturised polyester	74
2.7 Disperse dyes on modified polyester	75
2.8 Disperse dyes on nylon	81
2.9 Disperse dyes on other fibres	82

2.10	Dyeing of nylon fibres	82
2.11	Anionic dyes on nylon	86
2.12	Reactive dyes on nylon	97
2.13	Dyeing of modified nylons	99
2.14	Dyeing of aramid fibres	101
2.15	Basic or cationic dyes	102
2.16	Dyeing of acrylic fibres with basic dyes	106
2.17	Dyeing of olefin fibres	121
2.18	Dyeing of elastomeric fibres	124
2.19	Future trends	125
2.20	References	125
3	Dyeing of cellulosic fibres	129
	J. KOH, Konkuk University, South Korea	
3.1	Introduction	129
3.2	Cellulosic fibres	129
3.3	Main methods of dyeing cellulosic fibres	133
3.4	Future trends	145
3.5	References	146
4	Dyeing of textile fibre blends	147
	N. A. IBRAHIM, National Research Centre, Egypt	
4.1	Introduction	147
4.2	Key fibre blends	148
4.3	Dyeing of textile blends	151
4.4	Main dyeing methods	156
4.5	Future trends	159
4.6	Sources of further information and advice	168
4.7	Acknowledgement	169
4.8	References	169
Part II	Industrial applications	173
5	Colourants and dyes for the cosmetics industry	175
	R. J. W. HEFFORD, Independent Cosmetic Advice Ltd, UK	
5.1	Introduction	175
5.2	Regulations and definitions	176
5.3	Raw material types and chemistry	181
5.4	Product types	196

5.5	Future trends	201
5.6	References	203
6	Dyes for the medical industry	204
	M. WAINWRIGHT, Liverpool John Moores University, UK	
6.1	Introduction	204
6.2	Dyes for indication	206
6.3	Dyes as colourants in medicines	208
6.4	Dyes for therapy	210
6.5	Medical photosensitisers	216
6.6	Potential adverse effects of dyes	222
6.7	Future prospects	226
6.8	References	227
7	Automotive dyes and pigments	231
	B. KAUR AND S. N. BHATTACHARYA, RMIT University, Australia	
7.1	Introduction	231
7.2	Key issues of automotive dyes and pigments	232
7.3	Major pigment types used in automotive coatings	235
7.4	Techniques commonly used to improve the technical performance of pigments	245
7.5	Application technology	246
7.6	Future trends in automotive pigments	248
7.7	References	250
8	Food colourants	252
	A. P. DAMANT, Food Standards Agency, UK	
8.1	Introduction	252
8.2	UK and EU legislation	254
8.3	Synthetic food colours	259
8.4	Illegal dyes	276
8.5	Natural dyes	278
8.6	Conclusions	296
8.7	Acknowledgements	297
8.8	References	297
