

LEATHER
TECHNICIAN'S
HANDBOOK

CONTENTS

<i>Chapter</i>	<i>Page</i>
FOREWORD, by the Chairman, Leather Producers' Association	v
AUTHOR'S PREFACE	1
1 WHAT IS LEATHER?	3
 PART 1: HIDES AND SKINS	
2 SUPPLY OF RAW HIDES AND SKINS TO THE TANNERY Methods of Preservation; Chief Processes used in Leather Manufacture	5
3 FLAYING AND CURING Flaying; Ripping; Casing; Curing; Short Term Preservation; Wet-salting; Brining; Dry-salting; Drying; Pickling; Pickling of Hides	8
4 TYPES OF HIDES AND SKINS AND PRINCIPAL USES Structure; Hide and Skin Defects; Downgrading of value due to faults; Types and Sources of Supply; Raw Stock Warehouse Control; World Supply of Hides and Skins	20
 PART 2: PREPARATION FOR TANNAGE	
5 MEASUREMENTS USED FOR CONTROL OF PROCESSES Weight; Area; Volume; Specific Gravity; Temperature; Heat; Humidity	37
6 "A LITTLE RELEVANT CHEMISTRY" Atomic Weight; Molecules; Molecular Weights; Chemical Arithmetic; Volumetric Analysis; Molar Solution; Types of Chemical Bonds; Cationic and Anionic Colloids; Oxidation and Reduction	52

<i>Chapter</i>	<i>Page</i>
7 ACIDITY AND ALKALINITY	70
8 SOAKING	76
Skin Store; Water; The Process of Soaking ; Addition of Disinfectants (Bactericides); Aids to Soaking ; Temperature; Chemical Additions; Mechanical Action; Soaking Faults	
9 TANNERY PROCESS VESSELS	86
Rocking Frames; Paddles; Drums and Processors	
10 UNHAIRING AND LIMING	96
Unhairing ; Sweating; Enzyme Unhairing; Paint Unhairing; Variations of the Process; Alternative Materials; Liming ; Straight Lime Liquors; One Pit Liming System; Modified One Pit System; Three Pit System; Drum Liming; Alternative Recipes; Salt; Sharpening Agents; Temperature	
11 FLESHING AND SPLITTING	114
Trimming; Hand Fleshing; Machine Fleshing ; Faults in Fleshing; Splitting ; Blue Chrome Splitting; Acid Blown Splitting; Splitting Yields; Splitting Faults; Lime Scudding; Rounding of Hides	
12 DELIMING	126
Washing; Chemical Deliming; Deliming Faults	
13 BATING	131
Origins; Effect of Bating; Modern Bating Materials; Rating of Bating Activity; Bating Method; Bate Scudding	
14 CONTROL OF ACIDITY FOR STORAGE OR TANNAGE; PARAFFIN DEGREASING	135
Control of Acidity; Bran Drenching; Pickling; Paraffin Degreasing; Dry Degreasing Processes; Tumble or Dry-cleaning System; Grease and Solvent Recovery	

PART 3: TANNING PROCESSES

15 TANNAGE	144
Principles; Vegetable Tans; Synthetic Tans; Mineral Tannages; Aldehyde Tannages; Other Tannages; Dehydration Methods; Methods; Characteristics of Tannages	
16 VEGETABLE TANNING MATERIALS	153
General Principles; Catechol Tans; Pyrogallol Tans; Vegetable Tan Leaching; Extract Manufacture; Spray-Dried Powders	

<i>Chapter</i>	<i>Page</i>
17 HEAVY LEATHER TANNAGE	160
Control of Vegetable Tan Liquors ; Tannin Analysis; Determination of Acidity; Vegetable Tannage of Sole Leather ; Long Tannage; Normal Tannage; Accelerated Tannages; Mechanical Aids; Chrome Tannage of Sole Leather ; Tannage; Wax Impregnation; Chrome Re-Tannage ; Belting Leather	
18 TANNAGE OF BELLIES, SHOULDERS, UPHOLSTERY LEATHER AND DRESSING HIDES	173
Bellies and Shoulders ; Vegetable Tannage; Combination Tannages; Upholstery Hides ; Dressing Hides	
19 VEGETABLE TANNAGE OF LIGHT LEATHERS	176
General; Sumac Tannage of Skivers; Pickle Tannages; Dry Tannage; Traditional East India Tannage	
20 CHROME AND OTHER MINERAL TANNAGES	183
Chrome Tannage ; Preparation of Chrome Liquors; Commercial Chrome Liquors and Powders; Basicity of Chrome Salts ; Chrome Salt Hydrolysis Equilibria; Adjustment of Basicity ; Short or No Float Tannages; Low Pickle; Warm Float; Masking Agents and Masking Action; "Two-Bath" Chrome Tannage; Modified Two-Bath Tannage; Self-Basifying Chrome Tanning Salts; Test for Completion of Chrome Tannage; Chrome Salts in the Effluent; "Blue" Chrome Leather; Alum Tannage ; Fur Dressing ; Zirconium Tannages	
21 ALDEHYDE AND OIL TANNAGES	208
Aldehyde Tannage ; Glutaraldehyde; Oil Tannage (For Chamois Leather)	
22 OTHER TANNAGES	220
Syntans ; Replacement Syntans; White Light Fast Syntans; Amphoteric Syntans; Chrome Syntans; Resin Tannages ; Sulphite Cellulose (Lignin Extract); Polymeric Additives ; Combination Tannages ; Retannage of Vegetable-Tanned Crust Leather; Semi-chrome Leather; Semi-alum Leather; Chrome Retan Leather; Combination Chamois	

PART 4: FINISHING

23 PROCESSES AFTER TANNAGE	234
Removal of Surplus Tan Liquor ; Horsing Up; Cessing or Piling; Washing ; Neutralising ; Adjustment of Thickness ; Splitting; Shaving; Removal of Excess Water ; Light Leather; Heavy Leather	

<i>Chapter</i>	<i>Page</i>
24 FINISHING HEAVY LEATHER	249
Sole Leather ; Bleaching; Drying and Rolling; Effects of Oil on Leather Drying ; Flexibility; Colour; Belting Butts ; Hand Stuffing; Drum Stuffing	
25 OILS, FATS AND WAXES	257
Type of Leather; Methods of Application; Types of Oils, Fats and Waxes; Mineral Oils and Waxes; Natural Oils and Fats; Typical Natural Oils used in Leather Manufacture ; Animal Oils and Fats; Vegetable Oils; Fish Oils; Fatliquors; Waxes	
26 SORTING FOR DYEING AND FINISHING	267
Costing of Selections	
27 DYESTUFF TYPES AND PROPERTIES ON DIFFERENT LEATHERS	273
Anionic Dyes; Acid Dyes—Wool Dyes; Dyewoods or Vegetable Extracts; Other types of Anionic Dyes; Chrome-Mordant Dyes; Premetallised Dyes; Amphoteric Dyes; Sulphonated Basic Dyes; Reactive-Triazinyl Chloride Dyes (Procion Dyes); Sulphur Dyes; Vat Dyestuffs; Cationic Dyes—Basic Dyes; Standardisation of Dyestuffs; Homogeneous and Non-Homogeneous Dyes	
28 COLOUR MATCHING IN THE TANNERY DYEHOUSE	288
Metameric Matches; Colour Matching Cabinets; Instrumental Colour Matching; Subtractive Colour Mixes; The Colour Circle; Practical Colour Matching using “Transparent” Dyes or Stains; Some Common Dyestuffs	
29 DYEING METHODS	299
Vegetable-Tanned Leather Dyeing ; Chrome Leather Dyeing ; Chrome Retan Leather ; Dried Chrome Leathers ; Short No Float or Dry Leather Techniques; Other Dyeing Methods ; Woolskin and Fur Dyeing ; Woolskins for Clothing Leather ;	
30 FATLIQUORING OF LIGHT LEATHERS	322
Principles; Surfactants; Soap Fatliquors; Sulphated Oils; Sulphited Oils; Types of Fatliquor; Behaviour of Fatliquored Leathers in Subsequent Operations; Fatliquoring Methods	
31 DRYING	340
Convection Drying ; Alternative Methods of Drying ; Hanging; Drying under Tension; Paste Drying; Vacuum Drying; Radiant Heat Drying; High Frequency Drying; Heat Pump System; Fluid Bed Drying; High Velocity Air Driers; Freeze Drying; Solvent Drying	

<i>Chapter</i>	<i>Page</i>
32 FINISHING LIGHT LEATHERS	355
Trimming; Conditioning; Softening Processes—Staking; Boarding; Buffing; Other Mechanical Finishing Processes; Wheeling; Rolling and Glazing; Rotary Ironing; Embossing and Plating	
33 LIGHT LEATHER FINISHES	374
Seasons; Season Additives; Film Formation from Water Based Binder Systems; Application of Finishes; Hand Processes; Spraying; Spraying Machines; Curtain Coating; Pigment Finishing; Binders; Various Finish Formulations	
PART 5: FUR TECHNOLOGY	
34 FUR TECHNOLOGY	425
PART 6: EFFLUENT	
35 EFFLUENT AND BY-PRODUCT PROBLEMS	452
PART 7: RESISTANCE TO WATER	
36 THE RESISTANCE OF LEATHER TO WATER	465
PART 8: TANNERY COSTING	
37 TANNERY COSTING	469
<i>Appendix</i>	
1 OUTLINE RECIPES	477
Sole Leather; Upholstery Leather; Box Calf; Glacé Kid Leather; Chrome-Tanned Side Leather; Chrome-Tanned Gloving Leather; Clothing Leather; Suede Leather; Semi- Chrome Kip Upper Leather; Hard Grain or Morocco Leather; Woolskin (Shearling) Tannage; Pigskins	
2 QUALITY CONTROL STANDARDS	509
3 CONVERSION FACTORS AND TABLES	519
4 CHEMICALS COMMONLY USED IN LEATHER MANUFACTURE	528
5 SOME TANNERY PARAMETERS	537
6 RULES OF MIXING	541
7 MECHANICAL ACTION OF DRUMS	543
8 WEIGHTS AND AREA YIELDS OF HIDES, SKINS AND PROCESSED LEATHERS	550
9 PRODUCTS AND SUPPLIERS	554
INDEX	561
