CONTENTS

PREFACE.	v
ABBREVIATIONS	xi

SECTION 1. SOLID FUELS

1. FUEL SOURCES, TRENDS, AND RESERVES IN THE UNITED STATES AND ABROAD	3
Sources of energy. General trends in the use of energy. World mineral-fuel reserves. Mineral-fuel reserves of the United States.	
2. GENERAL CHARACTERISTICS OF SOLID FUELS.	33
Classification of coals by rank. Petrographic constituents of coal. Miscellaneous solid fuels.	
3. PENNSYLVANIA ANTHRACITE AND OTHER ANTHRACITE COALS.	51
Anthracite. Pennsylvania anthracite. Location of fields. Mining and recovery methods. Anthracite specifications. Analyses of Pennsylvania anthracites. General application of the sizes of anthracite. Nonfuel uses of anthracite. Physical characteristics of anthracite. Comparison between fresh-mined and weathered coal. Mixtures of bituminous coal and anthracite. Anthracitic coals (other than Pennsylvania anthracite). Meta-anthracite and graphitic anthracite. Semianthracite. True anthracites.	
4. BITUMINOUS COAL, SUBBITUMINOUS COAL, AND LIGNITE.	81
Bituminous coal. Subbituminous coal and lignite.	
5. PEAT, WOOD, WOOD WASTES, CHARCOAL, AND AGRICULTURAL WASTES	105
Peat. Wood. Cordwood. Hogged fuel. Industrial use of wood waste. Wood bark. Burning wood bark and refuse in combination with coal and separately. Tanbark. Residue from turpentine extraction process. Charcoal. Agricultural products and agricultural wastes.	
6. MANUFACTURED SOLID FUELS, COKES, AND BRIQUETTES.	129
Methods of making coke. Coke from coal. Carbonization of coal. Types of coke. Selection of coals for coking. Blending coals for coking. Petroleum coke. Fuel briquettes. Packaged fuel. Pelletizing anthracite fines.	

SECTION 2. LIQUID AND GASEOUS FUELS AND MISCELLANEOUS SOURCES OF HEAT AND POWER

7. PETROLEUM AND PETROLEUM DERIVATIVES	173
Petroleum. Composition of petroleum. Scope of fuel-oil specifications. Petroleum terms, tests, and characteristics and significance of tests on petroleum. Diesel fuels.	
8. LIQUID FUELS OTHER THAN THOSE DERIVED DIRECTLY FROM CRUDE PETROLEUM	225
Coal-in-oil fuels (colloidal). Petroleum products from shale. Synthetic motor fuels. Miscellaneous liquid fuels.	
9. GASEOUS FUELS	251
Natural gas. Analyses and characteristics. Manufactured gases. Present methods of gas manufacture. Coke-oven gas. Water gas. Oil gases. Reformed gas. Producer gas. Liquefied petroleum gases. Retort coal gas. Blast-furnace gas. Sewage gases. Synthesis gas. Mixed gases.	

10. MISCELLANEOUS SOURCES OF HEAT AND POWER 309
 Electric heating. Water power. Power from ocean waves. Wind as a source of power. Solar heat. Thermal springs. Thermit. Atomic energy.

SECTION 3. COMBUSTION

11. THE COMBUSTION OF FUELS. 345
 The fundamental reactions of combustion. Calculation of gas volumes. Requisites to proper combustion. Rate of combustion vs. air supplied. Thermal value of fuels. Effect of hydrogen content on the net or useful heat of fuels. Flame. Explosive limits of various gases and vapors. Fuel-bed depths. Clinker formation and control. Temperature data.
12. DETERMINATION AND CALCULATION OF HEAT BALANCES. 383
 Heat balances. Method 1. Rough field check of heat balances. Method 2. Nomograph method of computing heat balances. Method 3. Direct chemical-mathematical method of computing combustion results and heat balances. Boiler heat losses and their causes.
13. DRAFTS AND CHIMNEYS. 423
 Draft produced by chimneys. Design of industrial chimneys. Performance of residential chimneys. Mechanical draft.
14. SMOKE, FINE PARTICLES, AND OTHER COMBUSTION REJECTS, INCLUDING SLAGS. 453
 The formation and prevention of smoke. Overfire air. Industrial dust and air pollution. Reasons for the collection of dusts. Equipment available for collecting fine dusts. Commercial potentialities of solid-fuel refuse. External deposits on boiler heating surfaces.

SECTION 4. SELECTION OF A FUEL

15. FACTORS INVOLVED IN THE SELECTION AND PURCHASE OF FUEL. 493
 Design approach for a fuel-burning plant. Factors in the purchase of coal. Coal specifications. Cost of fuel and electricity in various industries.

SECTION 5. PREPARATION OF COAL FOR UTILIZATION

16. TREATING AND DRYING COAL 529
 Chemical treatment of coal and coke. Fuel savers. Dustproofing coal by chemical treatment. Removal of soot by the use of salts or compounds. Freezeproofing treatment. Coal dewatering and drying. Coal dewatering. Thermal drying. Drying low-rank coal.
17. THE CRUSHING AND PULVERIZATION OF COAL 565
 The crushing of coal. Coal crushers. The pulverization of coal. The grindability of coal. Pulverizers. Pulverized-coal distribution.

SECTION 6. FUEL-HANDLING METHODS

18. HANDLING AND STORING SOLID FUELS. 601
 Coal-handling equipment. Storage of bituminous coal. Spontaneous combustion. Dust-explosion hazards.
19. HANDLING AND STORING LIQUID AND GASEOUS FUELS. 653
 Fuel-oil handling. Gas handling.

SECTION 7. THE TRANSFER AND GENERATION OF HEAT

20. HEAT TRANSFER AND INSULATION 671
 Heat transfer. Conduction. Convection. Radiation. Effect of wind velocity on heat losses. Insulation. Raw materials used as insulating mediums. General uses and selection of insulation. Insulating bricks. Insulation for low temperatures. Insulation of hot-water tanks. Antisweat pipe insulation.

21. BOILERS AND STEAM GENERATORS	703
Definitions and terms. Fundamentals of boiler design. Care and operation of power boilers. Steam-generator types. Fire-tube steam boilers. Water-tube steam generators. High-pressure steam generators. Cylindrical furnaces for the petroleum industry.	
22. FUNDAMENTALS OF FURNACE DESIGN.	751
General requirements for furnaces. Furnace temperature. Furnace design factors. Small oil-fired fireboxes.	
23. METHODS OF FIRING SOLID FUELS	765
Lighting boiler fires—kindlers. Hand Firing. Single-retort underfeed stokers. Multiple-retort stokers. Spreader stokers. Traveling-grate stokers. Pulverized-coal firing. Increasing the steaming capacity of existing stoker installations. Increasing the capacity of existing pulverized-coal installations.	
24. FIRING LIQUID AND GASEOUS FUELS	821
Firing fuel oil. Oil preparation. Industrial oil burners. Domestic oil burners. Firing gas. Classification of gas burners. Air-supply methods. Burner applications. Control of furnace atmospheres. Gas-burner auxiliaries.	
25. SOME SPECIFIC NON-STEAM-MAKING USES OF FUEL	859
Sintering fine ores. Gas turbines. Dual-fuel internal-combustion engines. Use of anthracite as metallurgical and cupola fuel. Pennsylvania anthracite (Anthrafilt) as a filter medium. Firing ceramic products. Manufacture of carbon dioxide.	
SECTION 8. GENERAL	
26. BOILER MEASUREMENTS AND TESTS	883
General use of combustion instruments. Flue-gas analysis. Measurement of furnace temperature. Measuring draft. Errors in coal analysis due to variations in composition. Boiler test codes.	
INDEX	899
