CONTENTS

FOREWORD	iii
INTRODUCTION	v
COMMITTEES	vi
1 NOMENCLATURE	xxiii
2 CLASSIFICATION OF RIGID MOLDING MATERIALS	1
Introduction	1
System of Classification	1
Official Specifications	8
Plastics Included in the Classification	5
Practical Significance of Properties	5
3 COMPRESSION MOLDING	8
History	8
Technique and Materials	8
<i>Thermosetting Materials</i>	8
<i>Thermoplastics</i>	9
Combination of Injection and Compression	9
Molding of Phenol-Formaldehyde Compounds	9
Molding of Urea-Formaldehyde and Melamine-Formaldehyde Compounds	11
Molding of General-Purpose Polyester Molding Compounds	11
Molding of Alkyd Materials	12
Molding of Thermoplastic Materials	12
Molding of Fluorocarbons	12
Advantages of Compression Molding	13
Limitations of Compression Molding	13
Details of Procedure for Compression Molding	14
Types of Compression Molds	16
Machinery and Equipment	16
<i>Presses</i>	16
<i>Hydraulic System</i>	17
<i>Heating and Cooling of Molds</i>	17
Automatic Compression Molding	17
<i>Description</i>	17
<i>Advantages</i>	18
<i>Applicability</i>	18
<i>Basic Requirements for Automatic Compression Molding</i>	18
<i>Equipment Available</i>	20
<i>Automatic Electronic Preheating</i>	21

4	TRANSFER MOLDING	22
	Definition	22
	History	22
	Description of Process	23
	Transfer Molds	25
	<i>Loose-Plate Molds</i>	25
	<i>Integral Molds</i>	26
	<i>Auxiliary-Ram Molds</i>	26
	Advantages of Transfer Molding	29
	<i>Molding Cycles</i>	29
	<i>Tool and Maintenance Costs</i>	29
	<i>Molding Tolerances</i>	29
	<i>Finishing Costs</i>	30
	Limitations of the Process	30
	<i>Mold Costs</i>	30
	<i>Loss of Material</i>	30
	<i>Effect on Mechanical Strength</i>	30
	Materials Used	30
	<i>Phenol-Formaldehyde</i>	31
	<i>Melamine-Formaldehyde</i>	31
	<i>Silicones</i>	31
	Theoretical and Design Considerations	31
	<i>Mold Design</i>	31
	<i>Runners, Gates and Vents</i>	31
	<i>Selection of Material</i>	32
	<i>Molding Pressures</i>	32
	<i>Design Calculations</i>	33
	<i>Other Considerations</i>	34
5	INJECTION OF THERMOSETTING MATERIALS	36
6	COLD MOLDING	39
	History and General Considerations	39
	Cold-Molding Materials and Their Preparation	41
	<i>Nonrefractory (Organic)</i>	41
	<i>Refractory (Inorganic)</i>	41
	Cold-Molded Insulation	42
	Limitations of Cold-Molded Articles	42
	Molds and Fixtures	42
	Finishing Operations	44
	Advantages of Cold-Molded Articles	44
7	INJECTION MOLDING OF THERMOPLASTICS	45
	History	45
	General Discussion of Technique and Equipment	45
	Pressure and Temperature	47
	Reuse of Material	48
	Hot-Runner and Multiple-Nozzle Molding	48
	Finishing	49
	Design of Molds	49
	Mold Lubricants	50

CONTENTS

Characteristics of Injection-Molding Compounds	51
Details of Injection-Molding Machines	52
General Considerations	54
8 PREFORMING, DRYING AND PREHEATING	55
PREFORMING	55
Introduction	55
Definition	55
Reasons for Preforming	55
Reasons for not Preforming	55
Types and Shapes of Preforms	55
Standard Round Flat-Faced Preforms	55
Rectangular Preforms	55
Ball-Shaped Preforms	55
Preforms of Special Shapes	56
Importance of Design	59
Influence of Properties of Powder on Preforming	60
Charts of Weights, Sizes, and Thicknesses	61
Preforming Presses	67
Single-Stroke Presses	67
Rotary Preforming Machines	68
Operation of Preforming Presses	69
Preforming Dies	69
Operating Difficulties and Remedies	70
DRYING AND PREHEATING	73
Thermoplastics	73
Thermosetting Plastics	74
Equipment and Operation	75
Hot Plates	75
Ovens with Circulation of Air	75
Heating in Vacuo	76
Heating by Infrared Radiation	76
Dielectric Heating	77
Hopper Preheaters	78
9 EXTRUSION AND EXTRUSION MACHINES	81
Introduction	81
Equipment	81
Design for Vulcan Extrusion	82
Screw Design	82
Adiabatic Extrusion	83
Control of Cylinder Temperature	83
Vented Screws and Cylinders	84
Machines for New Polymers	85
Multiple-Die Extruder Heads	85
Take-Offs	85
Extrusion of Film and Sheet	85
Continuous Vacuum Forming	87
Bottle-Blowing	87
Extrusion Molding	88
Covering of Wire and Cable	89
Compounding	90

10 FABRICATION OF ARTICLES FROM THERMOPLASTIC SHEETS 91

Introduction	91
Materials	91
Pertinent Properties of Materials	92
<i>Plastic Memory</i>	92
<i>Hot Elongation</i>	92
<i>Hot Strength</i>	92
<i>Temperature Range for Forming</i>	92
Methods of Heating	92
<i>Evenness of Temperature</i>	92
<i>Speed of Heating</i>	93
<i>Infrared Radiant Heaters</i>	93
<i>Convection (Ovens)</i>	93
<i>Conduction (Platens)</i>	96
<i>In-Line Forming</i>	96
Fundamentals of Forming	96
<i>Redistribution of Material</i>	96
Methods of Forming	97
<i>Cavity Forming</i>	97
<i>Plug-Assist Forming</i>	99
<i>Drape Forming</i>	101
<i>Plug-and-Ring Forming</i>	101
<i>Ridge Forming</i>	101
<i>Slip Forming</i>	101
<i>Snap-Back Forming</i>	103
<i>Reverse-Draw Techniques</i>	103
<i>Special Methods</i>	107
Design and Construction of Molds	109
<i>Mold Shrinkage</i>	109
<i>Draft in the Mold</i>	110
<i>Thermal Requirements</i>	110
<i>Miscellaneous Details</i>	110
<i>Materials for Molds</i>	110
<i>Holes</i>	110
Machinery for Forming	111
<i>Necessary Components</i>	111
<i>Types of Machines</i>	111
<i>Trimming</i>	114
Finishing and Decorating	116

11 REINFORCED PLASTICS 118

What are Reinforced Plastics?	118
Resins, Catalysts, and Promoters	119
Reinforcing Materials and Fillers	119
Methods of Molding	120
<i>Preforming</i>	121
<i>Premixing</i>	121
<i>Contact Molding</i>	122
<i>Vacuum-bag Molding</i>	122
<i>Matched-die Molding</i>	122
<i>Pressure-bag Molding</i>	123
<i>Autoclave Molding</i>	123
<i>Flexible-plunger Molding</i>	123

CONTENTS

<i>Special Processes</i>	123
<i>Use of Molding Compounds</i>	124
Molds and Tooling	124
<i>Tooling with Plaster</i>	124
<i>Tooling with Plastics</i>	124
<i>Metal-spray Tooling</i>	125
<i>Steel and Aluminum Molds</i>	125
Parting Agents	125
Finishing	126
Properties of Molded Articles	127
Electrical Properties	129
Basic Rules of Design	129
Hygiene and Safety	131
References	133
12 CELLULAR PLASTICS	136
INTRODUCTION	136
BLOWING AGENTS	138
Safety Precautions	138
CELLULAR CELLULOSE ACETATE	139
Manufacture	139
Properties	139
Fabrication	140
Applications	140
EPOXY FOAMS	140
General	140
<i>Prefoamed Sheets, etc.</i>	141
<i>Pack-in-Place Systems</i>	141
<i>Foam-in-Place Systems</i>	142
Manufacture	142
Formulation (General)	142
<i>Relation of Compressive Strength to Density</i>	143
<i>Concentration of Blowing Agent</i>	143
<i>Concentration of Solvent-Diluent</i>	143
<i>Concentration of Curing Agent</i>	143
<i>Initial Temperature</i>	143
<i>Temperature of Equipment</i>	144
<i>Volume of Foam</i>	144
Formulation (Specific)	144
Properties of Epoxy Foams	146
<i>Versatility of Formulation</i>	146
<i>Handling Properties</i>	146
<i>Dimensional Stability</i>	146
<i>Mechanical Properties</i>	146
<i>Adhesion</i>	146
<i>Resistance to Chemicals, Solvents and Water</i>	146
<i>Electrical Properties</i>	146
Applications of Epoxy Foams	147
PHENOLIC FOAMS	147
Reactive-Type Foams	147
Resins	147
Blowing Agents	147

<i>Catalysts</i>	147
<i>Wetting Agents</i>	147
<i>Mixing and Foaming</i>	148
<i>Mechanical Properties</i>	148
<i>Flammability</i>	149
<i>Service Temperature</i>	149
<i>Effects of Water and Humidity</i>	149
<i>Transmission of Water Vapor</i>	149
<i>Thermal Conductivity</i>	149
<i>Coefficient of Linear Thermal Expansion</i>	149
<i>Toughness</i>	150
<i>Adhesion to Surfaces</i>	150
<i>Corrosiveness</i>	150
<i>Biological Resistance</i>	150
<i>Applications</i>	150
Syntactic Foams	150
<i>Compositions</i>	150
<i>Technique</i>	150
<i>Properties</i>	151
<i>Applications</i>	151
CELLULAR POLYETHYLENE	151
<i>Production</i>	151
<i>Properties</i>	152
<i>Applications</i>	154
POLYSTYRENE FOAMS	155
<i>Introduction</i>	155
<i>Extruded Polystyrene Foam</i>	156
<i>Expandable Polystyrene for Molded Foam</i>	156
<i>Pre-expansion</i>	157
<i>Molding</i>	158
<i>Extrusion</i>	160
<i>Self-expanding Polystyrene Systems</i>	160
<i>Properties</i>	160
<i>Applications</i>	161
<i>Extruded Polystyrene Foam</i>	161
<i>Molded Polystyrene Foam</i>	161
<i>Self-expanded Polystyrene Foam</i>	164
<i>Summary</i>	164
SILICONE FOAMS	164
<i>Premixed Powders</i>	164
<i>Room-temperature-curing Resins</i>	165
<i>Elastomeric Foams</i>	166
<i>Applications</i>	166
UREA-FORMALDEHYDE FOAMS	170
<i>Open-cell Foams</i>	170
<i>Closed-cell Foams</i>	170
URETHANE FOAMS	171
<i>Chemistry</i>	171
<i>General Reactions</i>	171
<i>Methods of Producing Foams</i>	172
<i>Flexible Foams</i>	172
<i>Adipic Acid Polyesters</i>	172

CONTENTS

<i>Dimer-Acid Polyesters</i>	173
<i>Polyethers</i>	174
<i>Formation of Biuret</i>	174
<i>Formation of Allophanate</i>	174
<i>Formation of Urethane</i>	175
<i>Composition and Properties</i>	175
Rigid Foams	176
<i>Castor Oil and Derivatives</i>	176
<i>Polyesters of High Hydroxyl Content</i>	176
<i>Polyethers</i>	176
<i>Dimer-Acid Polyesters</i>	176
Manufacturing Techniques	177
<i>Mixing</i>	177
<i>Application by Spray</i>	177
Variables Affecting the Reaction of Foaming	179
<i>Raw Materials</i>	179
<i>Catalysts</i>	179
<i>Speed of Mixing</i>	179
<i>Duration of Mixing</i>	179
<i>Temperature</i>	180
<i>Humidity</i>	180
<i>Volume of Foam</i>	180
<i>Release Agents</i>	180
<i>Flexible Urethane Slab Stocks</i>	181
<i>Flexible Urethane Molded Foams</i>	184
<i>Rigid and Semirigid Foams</i>	186
<i>Development of the Urethane Foam Industry</i>	188
CELLULAR VINYL	188
Processes	189
Mechanical Blowing	189
<i>Flexible Open-Cell Vinyl Foams</i>	189
Chemical Blowing	190
<i>Chemical Blowing of Plastisol to Yield Open-Cell Foam</i>	190
<i>Chemical Blowing of Plastisol to Yield Closed-Cell Foam</i>	192
<i>Extrusion Processes</i>	193
13 CASTING	198
History	198
Forms; Methods of Processing	199
Molds	200
<i>Draw Molds</i>	201
<i>Split Molds</i>	201
<i>Cored Molds</i>	202
<i>Flexible Molds</i>	202
<i>Plaster Molds</i>	202
Methods of Fabrication	203
Outstanding Characteristics	204
Typical Uses	204
14 TOOLING WITH PLASTICS	206
Introduction	206
Materials	206

<i>Phenolic Resins</i>	207
<i>Polyester Resins</i>	207
<i>Epoxy Resins</i>	207
<i>Combinations</i>	207
Methods	207
Applications	207
Bibliography	208
15 EMBEDDING AND POTTING	209
Introduction	209
Methods	209
EMBEDDING	210
Materials Suitable for Embedding	210
Techniques and Equipment	210
Dehydration	210
Impregnation	211
Molds	211
Heating Medium	211
Materials and Procedures	211
Casting Acrylic Monomers and Sirups	212
Autoclave Curing of Methyl Methacrylate Monomer-Polymer Slurries	212
Casting Unfilled Polyester Resins	213
Molding Acrylic Polymers	214
POTTING	217
Introduction	217
Methods	217
Casting	217
Hot Pouring	221
Hot and Cold Dipping	221
Molding	221
16 VINYL DISPERSIONS	223
Historical	223
Definitions	223
Resins Used	224
Preparation of Dispersions	224
Methods of Use	224
Formulation	225
Plastisols	225
Organosols	226
PLASTISOLS	227
Types of Resin for Plastisols	227
Plasticizers for Plastisols	228
Measuring Viscosities of Plastisols	229
Methods of Varying the Flow Properties of Plastisols	230
Stabilizers and Lubricants	230
Pigmentation	231
Methods of Manufacture of Plastisols	231
Storage and Aging Characteristics	236
De-aeration of Plastisols	236
Fusion of Plastisols	238

CONTENTS

ORGANOSOLS	239
Plasticizers, Dispersants and Diluents	239
Methods of Varying Viscosity	244
Effect of Solids Content	244
Stabilizers and Lubricants	245
Pigmentation	246
Methods of Manufacture	246
Storage and Aging Characteristics	247
Fusion of Organosols	248
SPECIAL TYPES OF PLASTISOLS AND ORGANOSOLS	249
Low-Temperature-Fusing Plastisols	249
Expanded Plastisols	249
Plastigels and Organogels	249
High-Durometer Types	250
Low-Durometer Types	250
APPLICATIONS OF VINYL DISPERSIONS	250
Spread-coating	250
<i>Coating of Paper</i>	250
<i>Coating of Fabrics with Vinyl Dispersions</i>	257
<i>Continuous Coating of Metals with Vinyl Dispersions</i>	260
Casting Film from Vinyl Dispersions	261
Embossing of Vinyl-Dispersion Films	262
<i>Cast Films</i>	262
Films Coated on a Carrier which is an Integral Part of the Finished Product	262
Application of Dispersions by Dip-Coating	263
<i>Dip-Coating with Plastisols</i>	263
<i>Dip-Coating with Organosols</i>	265
<i>Technique of Dip-Coating</i>	265
<i>Typical Application of Plastisol Dip-Coatings</i>	265
Slush-Molding of Vinyl Plastisols	270
<i>Molds</i>	272
<i>Factors in Plastisol Formulations</i>	272
<i>Typical Methods of Manufacturing Vinyl Slush-Moldings</i>	272
<i>Molding Techniques and Advantages</i>	275
Rotational Casting or Molding of Plastisols	275
<i>Equipment</i>	276
<i>Molds</i>	277
<i>Plastisols for Rotational Molding</i>	278
Cavity-Molding of Plastisols	278
<i>Mold Design and Methods of Filling</i>	278
<i>Fusing</i>	279
<i>Removal from the Mold</i>	280
Extrusion of Plastisols	280
Coating of Wire, Various Filaments, and Woven Cords	282
<i>Formulation</i>	282
<i>Application</i>	282
<i>Fusion</i>	283
<i>Handling of Organosols</i>	283
<i>Handling of Plastisols</i>	284
Spraying	284
<i>Plastisols</i>	284
<i>Organosols</i>	284

17 DESIGN OF MOLDED ARTICLES	286
Scope	286
Basic Principles	286
Shrinkage	287
Flash Lines	293
Undercuts	294
<i>External Undercuts</i>	294
<i>Internal Undercuts</i>	294
Wall Thickness	295
Taper or Draft	297
Radii and Fillets	299
Ribs	301
Bosses	302
Holes	302
<i>Through Holes</i>	302
<i>Blind Holes</i>	303
<i>Drilled Holes</i>	303
<i>Threaded Holes</i>	304
<i>Side Holes</i>	304
Molded Threads	304
<i>Threaded Pieces</i>	304
<i>Threaded Holes</i>	305
Surface Treatment	307
Molded Lettering	308
18 STANDARDS FOR TOLERANCES ON MOLDED ARTICLES	310
19 DESIGN STANDARDS FOR INSERTS	347
Screw-Machine Inserts	348
<i>Dimensions and Tolerances</i>	348
Cold-Forged Inserts	349
<i>Materials</i>	351
<i>Tolerances without Finishing Operations</i>	351
<i>Tolerances with Finishing Operations</i>	352
Special Inserts	352
Selection of Metal for Inserts	352
Minimum Wall Thickness of Material Around Inserts	354
Anchorage	354
Torque and Tension Testing	355
Problems in Molding Usual Types of Inserts	356
<i>Floating of Inserts</i>	356
<i>Crushing of Inserts</i>	356
<i>Flow of Material into an Open-Hole Through-Type Insert</i>	356
<i>Flow of Material into a Blind-Hole Insert</i>	357
<i>Protruding Inserts</i>	357
Anchorage of Special Inserts	357
<i>Thin Tubular Inserts</i>	357
<i>Flat Plate-Type Inserts</i>	357
<i>Drawn Shell-Type Inserts</i>	358
<i>Drawn Pin-Type Inserts</i>	358
<i>Drawn-Shell Threaded Inserts</i>	359
<i>Intricate Inserts</i>	359

CONTENTS

	<i>Large-Surface Inserts</i>	359
	<i>Large Inserts with a Minimum of Wall Thickness of Material</i>	360
	<i>Irregular-Shaped Inserts</i>	360
	Leakproof Inserts	361
	Special Inserts for Reinforcement	361
	Nonmetallic Inserts	361
	Preparation of Inserts Before Molding	362
	<i>Cleaning of Inserts</i>	362
	<i>Preheating of Inserts</i>	362
	Cleaning Flash from Inserts	363
	Salvage of Inserts	363
	Relieving Molding Stresses Around Inserts	363
	Methods of Pressing in Inserts after Molding	363
	Comparison of Inserts	365
	"Don'ts" in Insert Design	366
20	DESIGN OF MOLDS AND DIES	367
	Design of Molds	367
	Scope	367
C -	Hand-Operated Compression Molds	367
	Semiautomatic Compression Molds	371
	<i>Semiautomatic Positive Mold</i>	371
	<i>Semiautomatic Semipositive Mold</i>	371
	<i>Semiautomatic Landed Positive Mold</i>	373
	<i>Semiautomatic Flash Mold</i>	373
	<i>Semiautomatic Floating Stack-Retainer Type</i>	374
	<i>Semiautomatic Mold for Spools or Articles with Undercuts in Side Walls</i>	376
	<i>How to Select the Type of Mold</i>	378
