CONTENTS

Preface	xiii
About the Author	xiv

Chapter 1 General Information 1.1

Introduction	/ 1.1
History of Plastic Pipe Materials	/ 1.2
Common Applications	/ 1.2
Definitions and Abbreviations	/ 1.3
Acronyms and Abbreviations	/ 1.5
Plastic Piping Codes and Standards	/ 1.6
Codes	/ 1.6
Standards	/ 1.6

Chapter 2 Plastic Piping Characteristics 2.1

Advantages and Limitations of Plastic Piping	/ 2.1
Advantages	/ 2.1
Limitations	/ 2.2
Thermoplastic Piping Materials	/ 2.3
Principal Materials	/ 2.3
Available Products	/ 2.4
Plastic Piping Components	/ 2.15

Chapter 3 Fluid Flow 3.1

General	/ 3.1
Liquid Flow	/ 3.1
The Energy Principle	/ 3.2
The Energy Equation	/ 3.4
Hydraulic and Energy Grades	/ 3.4
Pipe Sizing	/ 3.4
Energy Losses in Pipes	/ 3.5
Pressure Flow of Liquids	/ 3.6
Water Hammer/Pressure Surge	/ 3.10

- Compressible Gas Flow / 3.12
- Gas Laws / 3.13
- Gas Pipeline Hydraulics / 3.17

Chapter 4 General Design Procedures

4.1

- Introduction / 4.1
- Design Methodology / 4.1
 - The Design Analyses / 4.1
- Drawings / 4.3
 - Process Flow Diagram (PFD) / 4.3
 - Piping and Instrumentation Diagram (P&ID) / 4.3
- Design Bases / 4.4
- Service Conditions / 4.4
- Loading Conditions / 4.7
 - Sustained Loads / 4.7
 - Occasional Loads / 4.8
- Piping Layout / 4.10
- Computer Aided Drafting and Design / 4.10
 - Piping Layout Design / 4.10
- Preliminary Design Data / 4.11
- Pipeline Life Requirements / 4.11
- Flow Requirements / 4.12
 - Compatibility / 4.12
- Installation Considerations / 4.13
- Design Considerations For Plastic Piping Systems / 4.14
 - Corrosion / 4.15
 - Operating Pressures and Temperatures / 4.16
 - Sizing / 4.16
 - Joining / 4.17
 - Thermal Expansion / 4.17
- Piping Support and Burial / 4.19
- General Design Considerations / 4.23
- System Flow Requirements / 4.24
 - Pressurized Full Flow / 4.24
- Pressure Loss in Fittings / 4.25
- Gravity Flow / 4.26
- Sliplining Flow Capacity / 4.28
 - Slurry Critical Flow / 4.28
- Gas Flow / 4.30
- Life Expectancy / 4.30
- System Pressure / 4.30
- Positive Pressure Pipelines / 4.31
 - Cyclic Overpressure / 4.33
 - Longitudinal Stress from Internal Pressure / 4.33
 - Thermal Expansion and Contraction / 4.34
 - Supported Pipelines / 4.34
 - Overland Pipes / 4.34

- Buried Pipelines / 4.35
- Transition Connections / 4.35
- Design of Collar / 4.37
- Design Considerations for Various Thermoplastic Pipe Materials / 4.37
 - Polyvinyl Chloride (PVC) / 4.37
 - Acrylonitrile-Butadiene-Styrene (ABS) / 4.38
 - Chlorinated Polyvinyl Chloride (CPVC) / 4.39
 - Polyethylene (PE) / 4.39

Chapter 5 Above Ground Pipe Design 5.1

- Receiving Materials / 5.3
- General Above-Ground Recommendations / 5.6
 - Support Spacing / 5.6
 - Hangers / 5.7
- Polyethylene Pipe / 5.11
 - Expansion / 5.12
 - Ultraviolet Effects / 5.15
 - Durability / 5.15
- External Damage / 5.15
- Installing PE Pipe On Grade / 5.15
- Anchored Pipe Runs / 5.16
- Installing PE Pipe Above Grade / 5.17
- Following Instructions / 5.17

Chapter 6 Buried Pipe Design 6.1

- Preliminary Work / 6.2
- Digging / 6.2
- The Bed / 6.3
- Placing Pipe / 6.4
- Thermal Contraction / 6.4
- Avoiding Bending and Stress / 6.5
- Thrust Blocks / 6.5
- Vertical Pipe Sections / 6.7
- Plowing / 6.7
- Backfilling / 6.7
- General Design Procedure / 6.8
 - Dead Load / 6.8
 - Prism Load / 6.8
 - Arching / 6.9
 - Marston Load / 6.9
 - Soil Creep / 6.10
 - Surcharge Loads / 6.10
 - Wall Compressive Strength / 6.10
 - Shallow Cover / 6.13
- Groundwater / 6.13

- Manholes / 6.14
- Designing for a Water Environment / 6.14
- Unconstrained Buckling / 6.14
- Different Types of Pipe / 6.18

Chapter 7 Pipe Handling and Construction

7.1

- PVC Pipe / 7.1
- Solvent-Welded Joints / 7.6
- Gasket Joints / 7.9
- Trench Installation / 7.9
- Polyethylene Pipe / 7.10
- Pipe-Joining Procedures / 7.11
 - Electrofusion / 7.13
- CPVC Plastic Pipe / 7.13
- Other Types / 7.15

Chapter 8 Horizontal Directional Drilling

8.1

- Advantages of HDD / 8.1
 - Applications / 8.2
- HDD Process / 8.2
 - Bore Installation / 8.3
 - Drilling and Steering / 8.4
 - Tracking / 8.5
 - Drilling Fluids / 8.6
- HDD Considerations / 8.7
 - Feasibility / 8.7
 - Subsurface Soil Material / 8.8
 - Design Factors / 8.8
 - General Guidelines / 8.9
- HDD Site Characterization / 8.10
 - Site Survey / 8.10
 - Geotechnical Factors / 8.10
 - Soil Type Classification / 8.13
 - Surface Working Space / 8.15
- Drilled Path Design / 8.16
- Construction Monitoring / 8.16
 - Drilled Path / 8.18
 - Pilot Hole / 8.18
- HDD Performance / 8.20
 - Downhole Survey Calculations / 8.20
 - Average Angle Method / 8.22
 - Balanced Tangential Method / 8.22
 - Minimum Curvature Method / 8.23
 - Radius of Curvature Calculations / 8.23
- Pipe Installation / 8.24

HDD Stresses and Forces / 8.24	
HDD Design Considerations for Plastic Pipe / 8.26	
Pull Back Force / 8.26	
Frictional Drag Resistance / 8.27	
Capstan Force / 8.27	
Guidelines and Specifications for Installation by HDD Technology / 8.29	
Contract Considerations / 8.29	
Contractor Proposal/Bid / 8.30	
Construction Plan / 8.30	
Drilling Fluids Management Plan / 8.31	
Previous Experience / 8.31	
Safety / 8.31	
Contingency Plans / 8.32	
Communication Plan / 8.32	
Traffic Control / 8.32	
List of Subcontractors / 8.32	
Other Considerations / 8.33	
Site Evaluation / 8.33	
Pre-Construction / 8.33	
Drilling Operations / 8.34	
Equipment Setup and Site Layout / 8.35	
Drilling and Back-Reaming / 8.35	
Segment Jointing (Butt-Fusion/Welding) / 8.36	
Tie-Ins and Connections / 8.36	
Alignment and Minimum Separation / 8.37	
Break-Away Pulling Head / 8.37	
Drilling Fluid—Collection and Disposal Practices / 8.38	
Site Restoration and Post Construction Evaluation / 8.38	
Glossary / 8.39	

Chapter 9 Chemical Resistance of Plastics and Elastomers	9.1
---	------------

Chapter 10 Sliplining Sewers	10.1
-------------------------------------	-------------

Preparation / 10.2	
Blockages / 10.2	
Installation / 10.3	
Grouting / 10.4	
Connections / 10.4	
Backfilling / 10.4	
Cost Effectiveness / 10.5	

Chapter 11 Testing	11.1
---------------------------	-------------

Low-Pressure Test / 11.3	
High-Pressure Test / 11.4	

- Underground Piping / 11.4
- Test Caps / 11.5
- Above Ground Tests / 11.5

Chapter 12 Protecting Public Safety Through Excavation Damage Prevention

12.1

- Introduction / 12.1
- Overview of Subsurface Infrastructure and Regulatory and
Legislative Initiatives / 12.4
- Subsurface Infrastructure / 12.4
- Regulatory and Legislative Initiatives / 12.5
- Damage Prevention Practices / 12.8
- Mandatory Participation / 12.8
- One-Call Notification System / 12.14
 - Function and Structure of the Centers / 12.14
 - Methods of Operation / 12.16
 - Excavation Notification Tickets / 12.17
- Effective Sanctions / 12.17
- Excavation Marking / 12.20
- Employee Qualifications and Training / 12.21
 - Discussion / 12.26
- Accuracy of Information Regarding Buried Facilities / 12.27
 - Underground Detection Technologies / 12.27
- Vertical/Depth Location / 12.28
- Directional Boring/Trenchless Technology / 12.30
- Mapping / 12.32
- Subsurface Utility Engineering / 12.34
- System Performance Measures / 12.36
- Risk Exposure / 12.37
- Accident Reporting Requirements of RSPA / 12.38
- Accident Causes / 12.40
- Conclusions / 12.44
- Recommendations / 12.46

Chapter 13 Brittle-Like Cracking in Plastic Pipe for Gas Service 13.1

- Introduction / 13.1
- Investigation / 13.4
 - Accident History / 13.4
 - Strength Ratings, Ductility, and Material Standards for
Plastic Piping / 13.7
 - Century Pipe Evaluation and History / 13.13
 - Installation Standards and Practices / 13.18
 - Gas System Performance Monitoring / 13.23
- Conclusions / 13.25
- Recommendations / 13.26

Appendix A Specifications for Materials and Construction for a Natural Gas System	A.1
Appendix B Transportation of Natural or Other Gas by Pipeline: Minimum Federal Safety Standards	B.1
Appendix C Plastic Piping Systems Components	C.1
Appendix D Plastic Pipe Fittings	D.1
Appendix E Glossary	E.1
Index	I.1
