| Acknowledgments | xxi |

1 Introduction 1

2 Interference: A Primer 3

| | |
|--|----|
| 2.1 Light Waves | 3 |
| 2.2 Intensity in an Interference Pattern | 5 |
| 2.3 Visibility of Interference Fringes | 6 |
| 2.4 Interference with a Point Source | 6 |
| 2.5 Localization of Fringes | 7 |
| 2.6 Summary | 9 |
| 2.7 Problems | 10 |
| Further Reading | 12 |

3 Two-Beam Interferometers 13

| | |
|--|----|
| 3.1 Wavefront Division | 13 |
| 3.2 Amplitude Division | 14 |
| 3.3 The Rayleigh Interferometer | 15 |
| 3.4 The Michelson Interferometer | 16 |
| 3.4.1 Fringes Formed with a Point Source | 17 |
| 3.4.2 Fringes Formed with an Extended Source | 17 |
| 3.4.3 Fringes Formed with Collimated Light | 17 |

- 3.4.4 *Applications* 18
- 3.5 The Mach–Zehnder Interferometer 18
- 3.6 The Sagnac Interferometer 19
- 3.7 Summary 20
- 3.8 Problems 20
 - Further Reading 22

4

Source-Size and Spectral Effects 23

- 4.1 Coherence 23
- 4.2 Source-Size Effects 24
 - 4.2.1 *Slit Source* 24
 - 4.2.2 *Circular Pinhole* 25
- 4.3 Spectral Effects 25
- 4.4 Polarization Effects 25
- 4.5 White-Light Fringes 26
- 4.6 Channeled Spectra 27
- 4.7 Summary 28
- 4.8 Problems 28
 - Further Reading 30

5

Multiple-Beam Interference 31

- 5.1 Multiple-Beam Fringes by Transmission 31
- 5.2 Multiple-Beam Fringes by Reflection 33
- 5.3 Multiple-Beam Fringes of Equal Thickness 34
- 5.4 Fringes of Equal Chromatic Order (FECO Fringes) 34
- 5.5 The Fabry–Perot Interferometer 35
- 5.6 Summary 36
- 5.7 Problems 36
 - Further Reading 36

6 The Laser as a Light Source 39

- 6.1 Lasers for Interferometry 39
- 6.2 Laser Modes 40
- 6.3 Single-Wavelength Operation of Lasers 42
- 6.4 Polarization of Laser Beams 43
- 6.5 Wavelength Stabilization of Lasers 43
- 6.6 Laser-Beam Expansion 43
- 6.7 Problems with Laser Sources 45
- 6.8 Laser Safety 46
- 6.9 Summary 46
- 6.10 Problems 46
 - Further Reading 48

7 Photodetectors 49

- 7.1 Photomultipliers 49
- 7.2 Photodiodes 50
- 7.3 Charge-Coupled Detector Arrays 51
 - 7.3.1 *Linear CCD Sensors* 52
 - 7.3.2 *Area CCD Sensors* 52
 - 7.3.3 *Frame-Transfer CCD Sensors* 52
- 7.4 Photoconductive Detectors 54
- 7.5 Pyroelectric Detectors 54
- 7.6 Summary 54
- 7.7 Problems 55
 - Further Reading 56

8 Measurements of Length 57

- 8.1 The Definition of the Metre 57
- 8.2 Length Measurements 58

- 8.2.1 *The Fractional-Fringe Method* 59
- 8.2.2 *Fringe Counting* 59
- 8.2.3 *Heterodyne Techniques* 59
- 8.2.4 *Synthetic Long-Wavelength Signals* 60
- 8.2.5 *Frequency Scanning* 61
- 8.2.6 *Environmental Effects* 62
- 8.3 *Measurements of Changes in Length* 62
 - 8.3.1 *Phase Compensation* 62
 - 8.3.2 *Heterodyne Methods* 62
 - 8.3.3 *Dilatometry* 62
- 8.4 *Summary* 63
- 8.5 *Problems* 63
 - Further Reading* 66

9

Optical Testing 67

- 9.1 *The Fizeau Interferometer* 67
- 9.2 *The Twyman–Green Interferometer* 70
- 9.3 *Analysis of Wavefront Aberrations* 71
- 9.4 *Laser Unequal-Path Interferometers* 72
- 9.5 *The Point-Diffraction Interferometer* 72
- 9.6 *Shearing Interferometers* 73
 - 9.6.1 *Lateral Shearing Interferometers* 74
 - 9.6.2 *Radial Shearing Interferometers* 76
- 9.7 *Grazing-Incidence Interferometry* 77
- 9.8 *Summary* 77
- 9.9 *Problems* 78
 - Further Reading* 81

10

Digital Techniques 83

- 10.1 *Digital Fringe Analysis* 83

- 10.2 Digital Phase Measurements 84
- 10.3 Testing Aspheric Surfaces 85
 - 10.3.1 *Direct Measurements of Surface Shape* 86
 - 10.3.2 *Long-Wavelength Tests* 86
 - 10.3.3 *Tests with Shearing Interferometers* 86
 - 10.3.4 *Tests with Computer-Generated Holograms* 87
- 10.4 Summary 88
- 10.5 Problems 88
 - Further Reading 91

11

Macro- and Micro-Interferometry 93

- 11.1 Interferometry of Refractive Index Fields 93
- 11.2 The Mach–Zehnder Interferometer 93
- 11.3 Interference Microscopy 95
- 11.4 Multiple-Beam Interferometry 96
- 11.5 Two-Beam Interference Microscopes 96
- 11.6 The Nomarski Interferometer 99
- 11.7 Summary 100
- 11.8 Problems 101
 - Further Reading 103

12

White-Light Interference Microscopy 105

- 12.1 White-Light Interferometry 105
- 12.2 White-Light Phase-Shifting Microscopy 106
- 12.3 Spectrally Resolved Interferometry 107
- 12.4 Coherence-Probe Microscopy 107
- 12.5 Summary 109
- 12.6 Problems 109
 - Further reading 110

13

Holographic and Speckle Interferometry 111

- 13.1 Holographic Interferometry 111
- 13.2 Holographic Nondestructive Testing 112
- 13.3 Holographic Strain Analysis 112
- 13.4 Holographic Vibration Analysis 113
- 13.5 Speckle Interferometry 114
- 13.6 Electronic Speckle-Pattern Interferometry 117
- 13.7 Studies of Vibrating Objects 118
- 13.8 Summary 119
- 13.9 Problems 119
 - Further Reading 120

14

Interferometric Sensors 121

- 14.1 Laser-Doppler Interferometry 121
- 14.2 Measurements of Vibration Amplitudes 122
- 14.3 Fiber Interferometers 123
- 14.4 Rotation Sensing 125
- 14.5 Laser-Feedback Interferometers 126
- 14.6 Gravitational Wave Detectors 127
- 14.7 Optical Signal Processing 128
 - 14.7.1 *Interferometric Switches* 128
 - 14.7.2 *Interferometric Logic Gates* 128
- 14.8 Summary 129
- 14.9 Problems 129
 - Further Reading 132

15

Interference Spectroscopy 133

- 15.1 Resolving Power and Etendue 133
- 15.2 The Fabry-Perot Interferometer 134

- 15.2.1 *The Scanning Fabry–Perot Interferometer* 135
- 15.2.2 *The Confocal Fabry–Perot Interferometer* 135
- 15.2.3 *The Multiple-Pass Fabry–Perot Interferometer* 136
- 15.3 Interference Filters 136
- 15.4 Birefringent Filters 137
- 15.5 Interference Wavelength Meters 137
- 15.6 Laser Frequency Measurements 138
- 15.7 Summary 139
- 15.8 Problems 140
 - Further Reading 143

16

Fourier Transform Spectroscopy 145

- 16.1 The Multiplex Advantage 145
- 16.2 Theory 146
- 16.3 Practical Aspects 148
- 16.4 Computation of the Spectrum 149
- 16.5 Applications 149
- 16.6 Summary 149
- 16.7 Problems 149
 - Further Reading 151

17

Interference with Single Photons 153

- 17.1 Interference—The Quantum Picture 153
- 17.2 Single-Photon States 154
- 17.3 Interference with Single-Photon States 156
- 17.4 Interference with Independent Sources 157
- 17.5 Fourth-Order Interference 161

- 17.6 Summary 162
- 17.7 Problems 162
 - Further Reading 163

18

- Building an Interferometer 165**
 - Further Reading 167

A

- Monochromatic Light Waves 169**
 - A.1 Complex Representation 169
 - A.2 Optical Intensity 170

B

- Phase Shifts on Reflection 171**

C

- Diffraction 173**
 - C.1 Diffraction Gratings 174

D

- Polarized Light 177**
 - D.1 Production of Polarized Light 177
 - D.2 Quarter-Wave and Half-Wave Plates 177
 - D.3 The Jones Calculus 179
 - D.4 The Poincaré Sphere 180

E

- The Pancharatnam Phase 183**
 - E.1 The Pancharatnam Phase 183
 - E.2 Achromatic Phase Shifters 183
 - E.3 Switchable Achromatic Phase Shifters 185

F

The Twyman–Green Interferometer: Initial Adjustment 187

G

The Mach–Zehnder Interferometer: Initial Adjustment 191

H

Fourier Transforms and Correlation 193

H.1 Fourier Transforms 193

H.2 Correlation 194

I

Coherence 195

I.1 Quasi-Monochromatic Light 195

I.2 The Mutual Coherence Function 196

I.3 Complex Degree of Coherence 197

I.4 Visibility of the Interference Fringes 197

I.5 Spatial Coherence 198

I.6 Temporal Coherence 199

I.7 Coherence Length 199

J

Heterodyne Interferometry 201

K

Laser Frequency Shifting 203

L**Evaluation of Shearing Interferograms 205**

L.1 Lateral Shearing Interferometers 205

L.2 Radial Shearing Interferometers 205

M**Phase-Shifting Interferometry 209**

M.1 Error-Correcting Algorithms 210

N**Holographic Imaging 211**

N.1 Hologram Recording 211

N.2 Image Reconstruction 212

O**Laser Speckle 215****P****Laser Frequency Modulation 219**

Index 221
